

Table of Contents

Signature and Access Control Policies for XML Documents	1
<i>Elisa Bertino, Elena Ferrari, and Loredana Parasiliti Provenza</i>	
Authorization and Access Control in Adaptive Workflows	23
<i>Dulce Domingos, António Rito-Silva, and Pedro Veiga</i>	
Flexible Regulation of Distributed Coalitions	39
<i>Xuhui Ao and Naftaly H. Minsky</i>	
Initiator-Resilient Universally Composable Key Exchange	61
<i>Dennis Hofheinz, Jörn Müller-Quade, and Rainer Steinwandt</i>	
Multi-round Secure Light-Weight Broadcast Exclusion Protocol with Pre-processing	85
<i>Yuji Watanabe and Masayuki Numa</i>	
Precisely Answering Multi-dimensional Range Queries without Privacy Breaches	100
<i>Lingyu Wang, Yingjiu Li, Duminda Wijesekera, and Sushil Jajodia</i>	
Passive Attack Analysis for Connection-Based Anonymity Systems	116
<i>Andrei Serjantov and Peter Sewell</i>	
Rapid Mixing and Security of Chaum’s Visual Electronic Voting	132
<i>Marcin Gomulkiewicz, Marek Klonowski, and Mirosław Kutylowski</i>	
Towards Accountable Management of Privacy and Identity Information . . .	146
<i>Marco Casassa Mont, Siani Pearson, and Pete Bramhall</i>	
A Toolkit for Managing Enterprise Privacy Policies	162
<i>Michael Backes, Birgit Pfitzmann, and Matthias Schunter</i>	
Authenticating Mandatory Access Controls and Preserving Privacy for a High-Assurance Smart Card	181
<i>Helmut Scherzer, Ran Canetti, Paul A. Karger, Hugo Krawczyk, Tal Rabin, and David C. Toll</i>	
Hardware Encapsulation of Security Services	201
<i>Adrian Baldwin and Simon Shiu</i>	
A Formal Security Model of the Infineon SLE 88 Smart Card Memory Management	217
<i>David von Oheimb, Georg Walter, and Volkmar Lotz</i>	

Bridging Model-Based and Language-Based Security	235
<i>Rogardt Heldal and Fredrik Hultin</i>	
An On-the-Fly Model-Checker for Security Protocol Analysis	253
<i>David Basin, Sebastian Mödersheim, and Luca Viganò</i>	
Symmetric Authentication within a Simulatable Cryptographic Library . . .	271
<i>Michael Backes, Birgit Pfizmann, and Michael Waidner</i>	
An Improved Reference Flow Control Model for Policy-Based Intrusion Detection	291
<i>Jacob Zimmermann, Ludovic Mé, and Christophe Bidan</i>	
Visualisation for Intrusion Detection	309
<i>Stefan Axelsson</i>	
On the Detection of Anomalous System Call Arguments	326
<i>Christopher Kruegel, Darren Mutz, Fredrik Valeur, and Giovanni Vigna</i>	
Author Index	345
