Preface	V
Preface to the Second Edition	VIII

Part 1. Artificial Randomness

1.0. Survey	3
1.1. Random Generators	4
1.1.1 The Necessity of Sample Values	4
1.1.2 Random Numbers	5
1.1.3 Obtaining Random Numbers	5
1.1.4 Requirements	6
1.1.5 Pseudo Random Generators	6
1.1.5.1 Von Neumann Generator	7
1.1.5.2 Quadratic Residue Generator	7
1.1.5.3 Linear Congruential Generator	7
1.1.5.4 Tausworthe Generator	7
1.1.6 Linear Congruential Generators	8
1.1.7 Tausworthe Generators and Galois Fields	9
1.1.8 Tausworthe Generators: T-Machine	11
1.2. Our Collection of Random Generators	13
1.2.1 About our Collection	13
1.2.2 TurboPascal	13
1.2.3 Von Neumann	14
1.2.4 Multi	15
1.2.5 Linear1	18
1.2.6 Linear2	18
1.2.7 Quadres	19
1.2.8 Tausworthe1	20
1.2.9 Tausworthe2	21
1.2.10 Radio	23

1.3. Tests for Random Generators	24
1.3.1 Statistical Tests	24
1.3.1.1 χ^2 Goodness-of-fit Test	24
1.3.1.2 Classic Tests	27
1.3.1.3 Variable Sample Sizes	39
1.3.2 Time Series Analysis Tests	41
1.3.2.1 Methods of Time Series Analysis	41
1.3.2.2 The Autocovariance Function	42
1.3.2.3 Asymptotic Behavior of the Autocorrelation Coefficients	44
1.3.2.4 Fourier Transforms	44
1.3.2.5 The Periodogram	45
1.3.2.6 Computer Experiment	47
1.3.2.7 Results	49
1.3.3 Visual Tests	50
1.3.3.1 Uniform Generation	50
1.3.3.2 Geometric Structures	51
1.3.3.3 Patterns	54
1.4. Generating Sample Values	58
1.4.1 Generating Concepts	58
1.4.1.1 Transformation with \hat{F}	58
1.4.1.2 Convolution Operations	63
1.4.2 $N(0, 1)$ Sample Values	64
1.4.2.1 Box–Mueller Method	64
1.4.2.2 Polar–Marsaglia Method	67
1.4.2.3 Central Limit Theorem	71
1.4.3 Sample Values of Various Distributions	72
1.4.3.1 Binomial Distribution	72
1.4.3.2 Poisson Distribution	73
1.4.3.3 Geometric Distribution	75
1.4.3.4 Exponential Distribution	76
1.4.3.5 Fermi–Dirac Distribution	77
1.4.3.6 Erlang Distribution	78
1.4.3.7 χ^2 Distribution	79
1.5. Goodness-of-fit Tests for Arbitrary Distributions	80
1.5.1 Fundamentals	80
1.5.2 Computer Experiment	80
1.5.3 Test Results	81
1.6. Monte-Carlo Integration	83
1.6.1 Estimation of a Definite Integral	83
1.6.2 Hit-or-Miss and Mean-Value Methods	83
1.6.2.1 Hit-or-Miss Method	83

1.6.2.2	Mean-Value Method	84
1.6.3	Computer Experiment	85
1.7.	Bibliographical Comments	86
1.7.1	Random Generators	86
1.7.2	Tests for Random Generators	87
1.7.3	Generating Sample Values	87
1.7.4	Monte-Carlo Integration	88
<hr/>		
Part 2. Stochastic Models		
<hr/>		
2.0.	Survey	91
2.1.	Buffon Experiments	93
2.1.1	The Buffon Problem	93
2.1.2	Various Experiments	93
2.1.3	Computer Experiments	94
2.2.	Service Systems	95
2.2.1	Comparison of Two Service Modes	95
2.2.1.1	Waiting System	95
2.2.1.2	Service Modes	95
2.2.1.3	Performance of Service Systems	95
2.2.1.4	Model Description	96
2.2.1.5	Computer Experiment	98
2.2.2	Programs	98
2.2.2.1	Program “WaitingSystem”	98
2.2.2.2	Main Data Structure	100
2.2.2.3	Procedure <code>RunThrough</code>	100
2.2.2.4	The Elements of the Procedure <code>RunThrough</code>	100
2.3.	Kinetic Gas Theory	102
2.3.1	Ideal Gas	102
2.3.1.1	Contributions of Maxwell and Boltzmann	102
2.3.1.2	Momentum Absorption	102
2.3.1.3	Pressure	103
2.3.1.4	Stochastic Model	103
2.3.1.5	Temperature	105
2.3.1.6	State Equation	105
2.3.1.7	Computer Experiment	106
2.3.2	Programs	106
2.3.2.1	Program “IdealGas”	106
2.3.2.2	The Main Data Structure	107
2.3.2.3	Procedure <code>Init</code>	107
2.3.2.4	Procedure <code>RunThrough</code>	108

2.3.2.5	The Elements of the Procedure RunThrough	109
2.3.2.6	Procedure Evaluation	109
2.4.	Kinetic Dynamics and Equilibrium	110
2.4.1	The Contributions of Maxwell and Boltzmann as a Starting Point	110
2.4.2	Kinetic Dynamics	110
2.4.3	The Kernel Density Estimator	112
2.4.4	Computer Experiment	113
2.4.5	Asymptotics	114
2.4.6	Video Clips	115
2.5.	Bibliographical Comments	117
2.5.1	Buffon Experiments	117
2.5.2	Service Systems	117
2.5.3	Kinetic Gas Theory	118
2.5.4	Kinetic Dynamics and Equilibrium	118

Part 3. Stochastic Processes

3.0.	Survey	121
3.1.	Markov Chains	123
3.1.1	Conditioning on the Current State	123
3.1.1.1	Markov Property	123
3.1.1.2	The Markov Chain	123
3.1.1.3	Computer Experiment	125
3.1.2	An Application	125
3.1.2.1	Typical Applications	125
3.1.2.2	The Problem	125
3.1.2.3	Sketch of the Proof	126
3.1.2.4	Computer Experiment	126
3.1.3	Programs	127
3.1.3.1	The Concept	127
3.1.3.2	Description	128
3.2.	Birth and Death Processes	130
3.2.1	Evaluating Trajectories	130
3.2.1.1	The Simple Birth and Death Process	130
3.2.1.2	Mean and Extinction Probability	130
3.2.1.3	The Chapman–Kolmogorov Equation	131
3.2.1.4	Computer Experiment	132
3.2.2	Programs	132
3.2.2.1	Generating Trajectories	132

3.3. Diffusion Processes	134
3.3.1 Brownian Motion	134
3.3.1.1 The Physical Phenomenon	134
3.3.1.2 The Stochastic Process	134
3.3.1.3 Computer Experiment	135
3.3.2 Dirichlet Problem	136
3.3.2.1 A Physical Problem	136
3.3.2.2 Mathematical Formulation	136
3.3.2.3 Sketch of the Proof	137
3.3.2.4 Computer Experiment	138
3.3.3 Programs	140
3.3.3.1 Generating Trajectories	140
3.3.3.2 The Iteration	140
3.3.3.3 Data Structures	140
3.4. Control of Traffic Lights	143
3.4.1 The Green Time as Control Variable	143
3.4.1.1 The Technical Model	143
3.4.1.2 Volume of Traffic	144
3.4.1.3 Computer Experiment	145
3.4.2 The Critical Green Time	146
3.4.2.1 Traffic Flow	146
3.4.2.2 The Queueing Process	146
3.4.2.3 Iteration of Distributions	147
3.4.2.4 Discussion of the Model	148
3.4.2.5 Collapse of Traffic	148
3.4.2.6 The Critical Green Time	149
3.4.2.7 Computer Experiment	149
3.4.3 Ergodicity	150
3.4.3.1 Independence from the Initial Distribution	150
3.4.3.2 Proving Methods	150
3.4.3.3 Computer Experiment	151
3.4.4 Optimal Green Times	151
3.4.4.1 The Concept of Optimal Green Time	151
3.4.4.2 Numerical Analysis	152
3.4.4.3 RiLSA	152
3.4.4.4 Computer Experiment	153
3.4.5 Computer Validation	154
3.4.5.1 Objective	154
3.4.5.2 Computer Experiment	154

3.5. Bibliographical Comments 156
 3.5.1 Markov Processes 156
 3.5.2 Birth and Death Processes 156
 3.5.3 Diffusion Processes 156
 3.5.4 Control of Traffic Lights..... 157

Part 4. Evaluation of Statistical Procedures

4.0. Survey 161

4.1. Experimental Evaluation 163
 4.1.1 What is Statistics? 163
 4.1.2 Empirical Evaluation and Experimentation 164
 4.1.3 Evaluation 164

4.2. Neyman Pearson Lemma..... 166
 4.2.1 Test Problem 166
 4.2.2 The Solution Concept..... 167
 4.2.3 The Fundamental Lemma 167
 4.2.4 Computer Experiment 169

4.3. Wald Sequential Test 172
 4.3.1 Sequential Probability Ratio Test 172
 4.3.2 Test Procedure..... 172
 4.3.3 Operations Characteristic 174
 4.3.4 Computer Experiment 175

4.4. Bayesian Point Estimation 177
 4.4.1 Bayesian Model 177
 4.4.2 Bayesian Concept 178
 4.4.3 A Posteriori Distribution 178
 4.4.4 Various Loss Functions..... 179
 4.4.5 Computer Experiment 180

4.5. Hartigan Procedures 183
 4.5.1 Description 183
 4.5.1.1 Hartigan Procedure 183
 4.5.1.2 The Subsample Method 184
 4.5.1.3 Computer Experiment 185
 4.5.2 Computer Program 186
 4.5.2.1 Program Description 186
 4.5.2.2 Preliminary Considerations
 for the Subsample Method 186
 4.5.2.3 Problems with Storage Capacity
 During the Subsample Method..... 188

4.6. Bibliographical Comments	191
4.6.1 Experimental Evaluation	191
4.6.2 Neyman Pearson Lemma	191
4.6.3 Wald Sequential Test	191
4.6.4 Bayesian Point Estimation	192
4.6.5 Hartigan Procedures	192
References	195
Symbols	201
Index	205
