

# Table of Contents

Introduction .....	1
<hr/>	
<b>Part I Entropies for Finite Quantum Systems</b>	
<hr/>	
1 Fundamental Concepts .....	15
2 Postulates for Entropy and Relative Entropy .....	39
3 Convex Trace Functions .....	49
<hr/>	
<b>Part II Entropies for General Quantum Systems</b>	
<hr/>	
4 Modular Theory and Auxiliaries .....	69
5 Relative Entropy of States of Operator Algebras.....	79
6 From Relative Entropy to Entropy.....	101
7 Functionals of Entropy Type.....	113
<hr/>	
<b>Part III Channeling Transformation and Coarse Graining</b>	
<hr/>	
8 Channels and Their Transpose.....	137
9 Sufficient Channels and Measurements .....	153
10 Dynamical Entropy .....	175

**11 Stationary Processes** ..... 197

---

**Part IV Perturbation Theory**

---

**12 Perturbation of States** ..... 215

**13 Variational Expression  
of Perturbational Limits** ..... 231

---

**Part V Miscellanea**

---

**14 Central Limit and Quasi-free Reduction** ..... 251

**15 Thermodynamics  
of Quantum Spin Systems** ..... 269

**16 Entropic Uncertainty Relations** ..... 283

**17 Temperley-Lieb Algebras and Index** ..... 295

**18 Optical Communication Processes** ..... 307

**Bibliography** ..... 319

**Index** ..... 343
