Cataract Surgery

CHAPTER 1

Topical and Intracameral Anaesthesia for Cataract Surgery

ROBERTO BELLUCCI, SIMONETTA MORSELLI

1.1	Introduction	1
1.1.1	Foreword	1
1.1.2	History	1
1.1.3	Definitions	2
1.2	Bases of Topical/Intracameral Anaesthesia in Cataract Surgery	2
1.2.1	Physiological Bases	2
1.2.2	Pharmacological Bases	2
1.2.3	Surgical Bases	3
1.3	Drugs Employed	3
1.3.1	Topical Anaesthetic Drugs	3
1.3.2	Ester-Bound Compounds	4
1.3.3	Amide-Bound Compounds	4
1.3.4	Influence of Formulation	5
1.4	Routes of Administration	6
1.4.1	Eyedrop Instillations	6
1.4.2	Gel Application	7
1.4.3	Drug-Soaked Sponges	8
1.4.4	Intracameral Irrigations	8
1.4.5	Viscoelastic-Borne Anaesthesia	9
1.5	Preferred Procedures	9
1.5.1	Patient Selection and Counselling	9
1.5.2	Surgery Adaptation	9
1.5.3	Management of Complications	10
1.5.4	Postoperative Instructions	10
1.6	Clinical Experience	10
1.6.1	Topical Anaesthesia	10
1.6.2	Intracameral Anaesthesia	11
1.7	No Anaesthesia Cataract Surgery	12
1.8	Current Recommendations	12
1.8.1	Treatment Schedule	12
1.8.2	Drug Selection	13
1.9	Conclusions	14
	References	14

CHAPTER 2

Surgical Techniques for Small Incision Cataract Surgery

I. HOWARD FINE, MARK PACKER,
RICHARD S. HOFFMAN

2.1	Introduction	19
2.2	Wound Construction and Architecture	19
2.3	Continuous Curvilinear Capsulorhexis	22
2.4	Hydrodissection and Hydrodelineation	24
2.4.1	Cortical Cleaving Hydrodissection	24
2.4.2	Hydrodelineation	24
2.5	Nucleofractis Techniques	25
2.5.1	Divide and Conquer Technique	26
2.5.2	Phaco Fracture Technique	26
2.5.3	Chip and Flip Technique	27
2.5.4	Crack and Flip Technique	27
2.5.5	Phaco Chop	28
2.5.6	Choo Choo Chop and Flip	28
2.5.7	Laser Phacoemulsification	32
2.5.8	Bimanual Ultrasound Phacoemulsification	33
2.6	Conclusion	34
	References	34

CHAPTER 3

Ophthalmic Viscosurgical Devices

STEVE A. ARSHINOFF

3.1	Introduction	37
3.2	History	38
3.3	Physical Properties of OVDs	39
3.4	Generic or Proprietary Nomenclature	40

3.5 Currently Marketed Polymers 40

3.5.1 Sodium Hyaluronates 40

3.5.2 Chondroitin Sulphate 42

3.5.3 Hydroxypropylmethylcellulose (HPMC) 43

3.6 Polymers no Longer Marketed as OVDs 43

3.6.1 Polyacrylamide 43

3.6.2 Collagen IV 43

3.7 The Physical (Rheologic) Properties of OVDs and Their Measurement .. 44

3.7.1 Viscosity (Dynamic) 44

3.7.2 Plasticity 44

3.7.3 Pseudoplasticity 44

3.7.4 Elasticity 45

3.7.5 Rigidity 46

3.7.6 Cohesion and Dispersion 46

3.8 Important Viscoelastic Rheologic Properties in the Various Steps of Cataract Surgery 47

3.9 Choosing Viscoelastics for Specific Procedures 49

3.9.1 Higher-Viscosity Cohesives 49

3.9.2 Lower-Viscosity Dispersives 50

3.10 The Viscoelastic Soft Shell Technique 50

3.10.1 Background and Rationale 50

3.10.2 The Dispersive-Cohesive Viscoelastic Soft Shell Technique .. 52

3.10.3 Method 52

3.10.4 Using the Soft Shell Technique 54

3.10.5 Application of the Soft Shell Technique to specific problems 55

3.11 Viscoadaptives – Healon5 56

3.11.1 Development 56

3.11.1 Viscoadaptive Use in Complications 58

3.11.2 The Ultimate Soft Shell Technique .. 58

3.11.3 Removal of Viscoadaptives 59

3.12 Conclusion 60

References 61

CHAPTER 4
Foldable Intraocular Lenses
 LILIANA WERNER, NICK MAMALIS

4.1 Introduction and Brief Overview of Biomaterials Used for the Manufacture of Foldable Intraocular Lenses 63

4.2 Silicone Intraocular Lenses 64

4.2.1 Plate Intraocular Lenses 64

4.2.2 Three-Piece Intraocular Lenses 65

4.3 Acrylic Intraocular Lenses 66

4.3.1 Hydrophobic Acrylic Intraocular Lenses 66

4.3.2 Hydrophilic Acrylic (Hydrogel) Intraocular Lenses 70

4.4 Specialized Foldable Intraocular Lenses 73

4.4.1 Multifocal Intraocular Lenses 73

4.4.2 Toric Intraocular Lenses 74

4.4.3 Aspheric Intraocular Lenses 75

4.4.4 Intraocular Lenses with Special Blockers (Blue Blocker) 76

4.4.5 Accommodative Intraocular Lenses 76

4.4.6 Intraocular Lenses for Very Small Incisions 78

4.4.7 Adjustable Power Intraocular Lenses 80

4.5 Summary 81

References 82

CHAPTER 5
“Accommodative” IOLs
 OLIVER FINDL

5.1 Introduction 85

5.1.1 Background 85

5.1.2 Apparent Accommodation or Depth of Field 86

5.1.3 Focus Shift Principle 86

5.1.4 Clinical Assessment 87

5.1.5 Accommodative IOLs 89

5.1.6 Lens Refilling 92

5.2 Clinical Experience with Available IOLs 92

5.2.1 Conventional IOLs 92

5.2.2 Accommodative IOLs 93

5.3 Current Clinical Practice and Recommendations 96

References 98

CHAPTER 6
Prevention of Posterior Capsule Opacification
 RUPERT M. MENAPACE

6.1 Definition, Types and Natural Behaviour of “After-Cataract” 101

6.2	Quantification of After-Cataract . . .	105	8.5.1	Timing of Surgery	136
6.3	Prevention of After-Cataract	105	8.5.2	Preoperative Anti-inflammatory Medication	136
6.3.1	Removing LEC from the Equator to Reduce the Proliferative Potential	105	8.6	Surgery	137
6.3.2	Erecting Mechanical Barriers to Prevent LEC Migration	106	8.6.1	Intraoperative Medication	137
6.4	Rationale for Investigating Alternatives: “Optic Edge Barrier Failures”	111	8.6.2	Approaches to Cataract Surgery	137
6.4.4	Factors Influencing Fibrotic After-Cataract Formation	114	8.7	Extracapsular Cataract Extraction . .	138
6.4.5	The Role of Optic Material	115	8.8	Phacoemulsification	138
6.4.6	The Role of Patient Age	115	8.9	Lensectomy	139
6.4.7	Alternatives to the Sharp-Edged Optic	116	8.9.1	Pars Plana Approach to Lensectomy – Anterior Vitrectomy . .	139
References		120	8.9.2	Limbal Approach to Lensectomy – Anterior Vitrectomy	139
CHAPTER 7			8.10	IOL Implantation	140
Management of the Mature Cataract			8.10.1	General Concerns	140
SAMUEL MASKET			8.10.2	Indications and Contraindications . .	140
7.1	Introduction	123	8.10.3	Placement of the Intraocular Lenses	140
7.2	Cortical (Intumescent) Mature Cataracts	125	8.10.4	IOL Material	141
7.3	What to Do When Things Go Wrong	128	8.10.5	IOL Design	141
7.4	The Nuclear Mature (Brunescent) Cataract	128	8.10.6	IOL Explantation	141
7.5	Surgical Management	129	8.11	Combined Vitrectomy	142
References		131	8.11.1	Anterior Vitrectomy	142
CHAPTER 8			8.11.2	Pars Plana Vitrectomy (PPV)	142
The Treatment of Uveitic Cataract			8.12	Typical Intraoperative Complications and Their Management	143
ARND HEILIGENHAUS, CARSTEN HEINZ, MATTHIAS BECKER			8.12.1	Band Keratopathy	143
8.1	Introduction	133	8.12.2	Synechiae	143
8.2	Basics for Cataract Formation in Uveitis	133	8.12.3	Miosis	144
8.3	Basics for the Consideration of IOL Implantation	134	8.12.4	Hyphema	144
8.3.1	Uveal Biocompatibility	134	8.12.5	Vitreous Loss and Membranes	144
8.3.2	Capsular Biocompatibility	135	8.13	Typical Postoperative Complications and Their Management	145
8.4	Patient Selection	135	8.13.1	Inflammation	145
8.4.1	Aetiology of Uveitis	135	8.13.2	Ocular Hypertension and Glaucoma	145
8.4.2	Indications and Contraindications in Cataract Surgery	135	8.13.3	Ocular Hypotony	146
8.5	Timing of Surgery and Preoperative Management	136	8.13.4	Retinal Detachment, Macular Pucker and Uveal Effusion	146
			8.13.5	Synechiae	146
			8.13.6	Hyphema and Rubeosis	147
			8.13.7	Posterior Capsule Opacification . . .	147
			8.13.8	Deposits of cells on the IOL	147
			8.13.9	Contact Lenses and Amblyopia	148
			8.13.10	Cystoid Macular Oedema	148
			8.14	Visual Outcome After Cataract Surgery in Patients with Uveitis	149
			8.15	Final Remarks	149
			References		149

CHAPTER 9

Paediatric Cataract Surgery

CHARLOTTA ZETTERSTRÖM

9.1	Introduction	153
9.1.1	Aetiology	153
9.1.2	Morphology	154
9.1.3	Amblyopia and Congenital Cataracts	155
9.2	Congenital Dense Cataract	156
9.2.1	Pre-operative Examination	156
9.2.2	Surgical Technique in Infants	157
9.3	Cataracts in Older Children	159
9.3.1	Pre-operative Examination	159
9.3.2	Surgical Technique	160
9.4	IOL Power and Model	160
9.4.1	Post-operative Treatment	161
9.4.2	Post-operative Complications	162
9.5	Current Clinical Recommendations	164
	References	164

CHAPTER 10

**Prevention and Treatment
of Post-cataract Surgery Infection**

WOLFGANG BEHRENS-BAUMANN

10.1	Introduction	167
10.1.1	Incidence	167
10.1.2	Sources of Contamination	168
10.2	Prevention of Post-operative Endophthalmitis	168
10.2.1	Preoperative Prophylaxis	168
10.2.2	Intraoperative Prophylaxis	169
10.2.3	Postoperative Prophylaxis	170
10.3	Treatment of Post-cataract Endophthalmitis	170
10.3.1	Diagnostic Measures	170
10.3.2	Anti-infective Therapy	170
10.3.3	Anti-inflammatory Therapy	171
10.3.4	Surgery	171
10.4	Conclusion	172
	References	172

Refractive Surgery

CHAPTER 11

Future Trends in Refractive SurgeryJACQUELINE T. KOO, ERIC J. LINEBARGER,
RICHARD L. LINDSTROM, DAVID R. HARDTEN

11.1	Introduction	177
11.2	Cornea	177
11.2.1	Corneal Tissue Removal	177
11.2.2	Corneal Volume Addition	180
11.2.3	Corneal Relaxation	181
11.2.4	Corneal Compression	181
11.3	Ciliary Body	182
11.4	Lens	182
11.5	Crystalline Lens Replacement	184
11.6	Phakic Intraocular Refractive Lenses	185
11.7	Conclusion	186
	References	186

CHAPTER 12

LASIK – Laser In Situ Keratomileusis

MICHAEL C. KNORZ

12.1	History	189
12.2	Patient Selection, Technique and Results	190
12.2.1	Patient Selection	190
12.2.2	Technique	192
12.2.3	Results	192
12.3	Complications	193
12.3.1	Microkeratome-Related Flap Complications	193
12.3.2	Other Flap Complications	194
12.3.3	Interface Complications	195
12.4	Quality of Vision	196
12.5	Customized Ablations	198
12.5.1	Wavefront Measurements	199
12.5.2	Wavefront-Guided Treatments	199
12.5.3	What Are the Benefits of Customised LASIK?	199
	References	200

CHAPTER 13
LASEK vs PRK
 CHUN CHEN CHEN, DIMITRI T. AZAR

13.1 Introduction 203
 13.2 Surgical Technique of LASEK
 and PRK 204
 13.2.1 Personal Experience
 (Azar's Technique) 204
 13.2.2 Camellin's Technique 206
 13.2.3 Vinciguerra's Technique
 (Butterfly Technique) 206
 13.2.4 Gel Assisted LASEK 206
 13.3 Clinical Results of LASEK vs PRK .. 207
 13.4 Electron Microscopy 208
 13.4.1 Preparation of Specimens
 for Electron Microscopy 208
 13.4.2 Electron Microscopic Analysis
 of Epithelial Sheets Removed
 Using 20% Alcohol 208
 13.5 Corneal Wound Healing After
 the Refractive Process 209
 13.5.1 Epithelial Wound Healing 210
 13.5.2 Stromal Wound Healing 210
 13.6 Epithelial Cell Viability 210
 References 215

CHAPTER 14
Refractive Keratotomy:
Does It Have a Future Role
in Refractive Surgery?
 MITCHELL P. WEIKERT, DOUGLAS D. KOCH

14.1 Introduction 217
 14.2 History of Refractive Keratotomy .. 217
 14.3 Principles of Refractive
 Keratotomy 218
 14.4 Techniques of Refractive
 Keratotomy [5] 220
 14.5 Major Clinical Trials in Refractive
 Keratotomy 223
 14.6 Complications of Refractive
 Keratotomy 225
 14.6.1 Hyperopic Drift 225
 14.6.2 Diurnal Fluctuation 225
 14.6.3 Other Complications 226
 14.7 Refractive Keratotomy for the
 Management of Astigmatism 227
 14.7.1 Cataract Incision Placement 227

14.7.2 Opposite Clear Corneal Incisions... 228
 14.7.3 Arcuate and Transverse
 Keratotomy 228
 14.7.4 Peripheral Corneal Relaxing
 Incisions 230
 14.8 Conclusion 232
 References 232

CHAPTER 15
Phakic Intraocular Lenses
 DENNIS C. LU, DAVID R. HARDTEN,
 RICHARD L. LINDSTROM

15.1 Introduction 235
 15.1.1 Limitations of Keratorefractive
 Procedures 235
 15.1.2 Role of Lenticular Refractive
 Procedures 236
 15.2 Evolution and Classification
 of Phakic IOLs 236
 15.2.1 Anterior Chamber Angle-Fixated
 Lenses 236
 15.2.2 Anterior Chamber Iris-Fixated
 Lenses 240
 15.2.3 Posterior Chamber Lenses 241
 15.3 Evaluation of the Phakic IOL
 Patient 243
 15.3.1 General Patient Factors 243
 15.3.2 Refraction 243
 15.3.3 Anatomic Factors 244
 15.3.4 Pre-existing Ocular Pathology 244
 15.3.5 IOL Sizing for Fixated Lenses 244
 15.3.6 IOL Calculations 244
 15.3.7 Peripheral Iridectomy
 or Iridotomy 245
 15.4 Surgical Technique 245
 15.4.1 Anterior Chamber Angle Fixated ... 245
 15.4.2 Anterior Chamber Iris Fixated 246
 15.4.3 Posterior Chamber Angle Fixated .. 246
 15.4.4 Posterior Chamber Phakic
 Refractive Lens 246
 15.5 Post-operative Course
 and Enhancements 246
 15.6 Results 247
 15.6.1 Myopic Results 247
 15.6.2 Hyperopic Results 247
 15.6.3 Toric Results 251
 15.7 Complications 251
 15.8 Conclusions 254
 References 254

CHAPTER 16

Refractive Lens ExchangeJOSE LUIS GÜELL, NANCY SANDOVAL,
FELICIDAD MANERO, OSCAR GRIS

16.1	Introduction	257
16.2	Myopia	258
16.2.1	Visual Results	258
16.2.2	Complications	259
16.3	Hyperopia	263
16.3.1	Visual Results	263
16.3.2	Complications	267
16.3.3	Multifocal IOLs	267
16.4	Surgical Technique: Phaco-rolling	268
	References	269

CHAPTER 17

The Concept**of Wavefront-Guided Corneal Surgery**

LI WANG, DOUGLAS D. KOCH

17.1	Principle of Wavefront Technology	271
17.1.1	Basics of Wavefront Aberration	271
17.1.2	Visual Benefit of Higher-Order Aberration Correction	272
17.1.3	Principles of Measuring Wavefront Aberration	273
17.1.4	Quantifying Wavefront Aberrations	275
17.2	Accuracy and Repeatability of Wavefront Aberrometers	279
17.2.1	WaveScan	279
17.2.2	Zywave	280
17.2.3	COAS	280
17.2.4	Tscherning Aberrometer	281
17.2.5	Tracey VFA	281
17.3	Clinical Outcome of Wavefront-Guided Corneal Surgery	281
17.3.1	Methods	281
17.3.2	Summary of Results	283
17.4	Limitations of Wavefront-Guided Corneal Surgery	285
17.5	Future of Wavefront-Guided Corneal Surgery	285
	References	286

CHAPTER 18

The Pupil and Refractive Surgery

EMANUEL ROSEN

18.1	Introduction	289
18.2	Pupillometry and Refractive Surgery	289
18.2.1	The Pupil and the Cornea	290
18.3	Planning Corneal Refractive Surgery	292
18.4	Pupils and Night Vision	294
18.5	Pupillary Unrest, Anisocoria and Measurement	295
18.6	How Should Pupils Be Measured?	296
18.6.1	Data Acquisition and Processing System	296
18.6.2	Illumination	296
18.7	Pupillometry Studies	298
18.7.1	Precision	298
18.7.2	Accuracy	299
	References	302

CHAPTER 19

Quality of Vision After Refractive SurgeryTHOMAS KOHNEN, JENS BÜHREN,
THOMAS KASPER, EVDOKSIA TERZI

19.1	Introduction	303
19.2	Defining Quality of Vision	303
19.2.1	Subjective Symptoms	304
19.2.2	Visual Function	305
19.2.3	Optical Image Quality	305
19.2.4	The Role of Anatomy	306
19.3	Measuring Quality of Vision	306
19.3.1	Subjective: Questionnaires	307
19.3.2	Functional	307
19.3.3	Optical: Wavefront Sensing, MTF, PS F	308
19.3.4	Anatomical: Biomicroscopy, Corneal Topography	310
19.4	Specific Changes in Quality of Vision After Refractive Surgery	310
19.4.1	Incisional Surgery	310
19.4.2	Excimer Surgery	311
19.4.3	Intraocular Lens Procedures	312
19.5	Future Approaches to Improve Quality of Vision After Refractive Surgery	312
	References	313
