Integration of Software Specification Techniques for Applications in Engineering: Introduction and Overview of Results	1
<i>Hartmut Ehrig</i>	

Part I: Reference Case Study Production Automation

Coordinator: Engelbert Westkämper

Basic Principles for Software Specification – Introduction to Subject Area Reference Case Study Production Automation	9
<i>Engelbert Westkämper, Matthias Bengel, Katja Fischer</i>	
Challenges of Next Generation Manufacturing Systems	23
<i>Paul Valckenaers</i>	
Development of Hierarchical Broadcasting Software Architectures Using UML 2.0	29
<i>Ingolf Krüger, Wolfgang Prenninger, Robert Sandner, Manfred Broy</i>	
An Engineer’s Workstation to Support Integrated Development of Flexible Production Control Systems	48
<i>Wilhelm Schäfer, Robert Wagner, Jürgen Gausemeier, Raimund Eckes</i>	
A Formal Component Concept for the Specification of Industrial Control Systems	69
<i>Benjamin Braatz, Markus Klein, Gunnar Schröter, Matthias Bengel</i>	

Part II: Reference Case Study Traffic Control Systems

Coordinator: Eckehard Schnieder

Specification Methodology, Case Studies, and Experiments – An Introduction to the Subject Area of Traffic Control Systems	89
<i>Eckehard Schnieder</i>	
Reference Case Study “Traffic Control Systems” for Comparison and Validation of Formal Specifications Using a Railway Model Demonstrator	96
<i>Frank Hänsel, Jan Poliak, Roman Slovák, Eckehard Schnieder</i>	

Precise Definition of the Single-Track Level Crossing
in Radio-Based Operation in UML Notation and Specification
of Safety Requirements 119
Saeid Arabestani, Friedemann Bitsch, Jan-Tecker Gayen

Executable HybridUML and Its Application to Train Control Systems ... 145
*Kirsten Berkenkötter, Stefan Bisanz, Ulrich Hannemann,
Jan Peleska*

The Use of UML for Development of a Railway Interlocking System 174
Karol Rástočný, Aleš Janota, Jiří Zahradník

Part III: Petri Nets and Related Approaches in Engineering

Coordinator: Jörg Desel

Process Description Languages and Methods:
Introduction to the Chapter
Petri Nets and Related Approaches in Engineering 199
Jörg Desel

Specification and Formal Verification of Temporal Properties
of Production Automation Systems 206
Stephan Flake, Wolfgang Müller, Ulrich Pape, Jürgen Ruf

STOP – Specification Technique of Operational Processes 227
Stefan Einer

Specification and Validation of an Edge Router Discovery Protocol
for Mobile Ad Hoc Networks 248
Lars Michael Kristensen, Kurt Jensen

A Guide to Modelling and Control with Modules of Signal Nets 270
*Jörg Desel, Hans-Michael Hanisch, Gabriel Juhás, Robert Lorenz,
Christian Neumair*

Conceptual Design of an Engineering Model
for Product and Plant Automation 301
K. Fischer, P. Göhner, F. Gutbrodt, U. Katzke, B. Vogel-Heuser

Part IV: Charts

Coordinator: Werner Damm

Introduction to Subject Area “Charts” 322
Werner Damm, Bernd Westphal

The RHAPSODY Semantics of Statecharts	325
<i>David Harel, Hillel Kugler</i>	
Interactive Verification of Statecharts	355
<i>Andreas Thums, Gerhard Schellhorn, Frank Ortmeier, Wolfgang Reif</i>	
Live Sequence Charts	374
<i>Matthias Brill, Werner Damm, Jochen Klose, Bernd Westphal, Hartmut Wittke</i>	
A Unifying Semantics for Sequential Function Charts	400
<i>Nanette Bauer, Ralf Huuck, Ben Lukoschus, Sebastian Engell</i>	

Part V: Verification

Coordinator: Wolfgang Reif

Introduction to Subject Area “Verification”	419
<i>Frank Ortmeier, Wolfgang Reif, Gerhard Schellhorn</i>	
“UML-ising” Formal Techniques	423
<i>Dines Bjørner, Chris W. George, Anne E. Haxthausen, Christian Krog Madsen, Steffen Holmslykke, Martin Pěnička</i>	
Model Based Formal Verification of Distributed Production Control Systems	451
<i>Martin Kardos, Franz-J. Rammig</i>	
Combining Formal Methods and Safety Analysis – The ForMoSA Approach	474
<i>Frank Ortmeier, Andreas Thums, Gerhard Schellhorn, Wolfgang Reif</i>	
Formal Verification of LSCs in the Development Process	494
<i>Matthias Brill, Ralf Buschermöhle, Werner Damm, Jochen Klose, Bernd Westphal, Hartmut Wittke</i>	
Verification of PLC Programs Given as Sequential Function Charts	517
<i>Nanette Bauer, Sebastian Engell, Ralf Huuck, Sven Lohmann, Ben Lukoschus, Manuel Remelhe, Olaf Stursberg</i>	
Modeling and Formal Verification of Production Automation Systems . . .	541
<i>Jürgen Ruf, Roland J. Weiss, Thomas Kropf, Wolfgang Rosenstiel</i>	

Part VI: Integration Modelling

Coordinator: Martin Große-Rhode

On Model Integration and Integration Modelling –
Introduction to the Subject Area Integration Modelling 567
Martin Große-Rhode

On the Integration of Modular Heterogeneous Specifications 582
Fernando Orejas, Elvira Pino

Semantical Integration
of Object-Oriented Viewpoint Specification Techniques 602
Benjamin Braatz, Markus Klein, Gunnar Schröter

Author Index 627
