Table of Contents

Invited Papers

Learning and Mathematics 1
Dana Angluin

Learning Finite-State Models for Machine Translation 3
Enrique Vidal and Francisco Casacuberta

The Omphalos Context-Free Grammar Learning Competition 16
Bradford Starkie, François Coste, and Menno van Zaanen

Regular Papers

Mutually Compatible and Incompatible Merges
for the Search of the Smallest Consistent DFA 28
John Abela, François Coste, and Sandro Spina

Faster Gradient Descent Training of Hidden Markov Models,
Using Individual Learning Rate Adaptation 40
Pantelis G. Bagos, Theodore D. Liakopoulos, and Stavros J. Hamodrakas

Learning Mild Context-Sensitiveness:
Toward Understanding Children's Language Learning 53
Leonor Becerra-Bonache and Takashi Yokomori

Learnability of Pregroup Grammars 65
Denis Béchet, Annie Foret, and Isabelle Tellier

A Markovian Approach to the Induction of Regular String Distributions . . 77
Jérôme Callut and Pierre Dupont

Learning Node Selecting Tree Transducer
from Completely Annotated Examples 91
Julien Carme, Aurélien Lemay, and Joachim Niehren

Identifying Clusters from Positive Data 103
John Case, Sanjay Jain, Eric Martin, Arun Sharma, and Frank Stephan

Introducing Domain and Typing Bias in Automata Inference 115
*François Coste, Daniel Fredouille, Christopher Kermorvant,
and Colin de la Higuera*

Analogical Equations in Sequences: Definition and Resolution 127
Arnaud Delhay and Laurent Miclet

Representing Languages by Learnable Rewriting Systems 139
Rémi Eyraud, Colin de la Higuera, and Jean-Christophe Janodet

A Divide-and-Conquer Approach to Acquire Syntactic Categories 151
Pablo Gamallo, Gabriel P. Lopes, and Joaquim F. Da Silva

Grammatical Inference Using Suffix Trees 163
Jeroen Geertzen and Menno van Zaanen

Learning Stochastic Finite Automata 175
Colin de la Higuera and Jose Oncina

Navigation Pattern Discovery Using Grammatical Inference 187
Nikolaos Karampatziakis, Georgios Paliouras, Dimitrios Pierrakos, and Panagiotis Stamatopoulos

A Corpus-Driven Context-Free Approximation of Head-Driven Phrase Structure Grammar 199
Hans-Ulrich Krieger

Partial Learning Using Link Grammars Data 211
Erwan Moreau

eg-GRIDS: Context-Free Grammatical Inference from Positive Examples Using Genetic Search 223
Georgios Petasis, Georgios Paliouras, Constantine D. Spyropoulos, and Constantine Halatsis

The Boisdale Algorithm – An Induction Method for a Subclass of Unification Grammar from Positive Data 235
Bradford Starkie and Henning Fernau

Learning Stochastic Deterministic Regular Languages 248
Franck Thollard and Alexander Clark

Polynomial Time Identification of Strict Deterministic Restricted One-Counter Automata in Some Class from Positive Data 260
Mitsuo Wakatsuki, Kiyoshi Teraguchi, and Etsuji Tomita

Poster Papers

Learning Syntax from Function Words 273
David Brooks and Mark Lee

Running FCRPNI in Efficient Time for Piecewise and Right Piecewise Testable Languages 275
Antonio Cano, José Ruiz, and Pedro García

Extracting Minimum Length Document Type Definitions Is NP-Hard 277
Henning Fernau

Learning Distinguishable Linear Grammars from Positive Data 279
J.A. Laxminarayana, José M. Sempere, and G. Nagaraja

Extending Incremental Learning of Context Free Grammars in Synapse ... 281
Katsuhiko Nakamura

Identifying Left-Right Deterministic Linear Languages 283
Jorge Calera-Rubio and Jose Oncina

Efficient Learning of k-Reversible Context-Free Grammars from Positive Structural Examples 285
Shinnosuke Seki and Satoshi Kobayashi

An Analysis of Examples and a Search Space for PAC Learning of Simple Deterministic Languages with Membership Queries 288
Yasuhiro Tajima, Yoshiyuki Kotani, and Matsuaki Terada

Author Index 291
