Contents

Foreword xiii
Preface xv

Part I Introduction to Networking 1

Chapter 1 *Introduction* 3

1.1 Why Java? 3
1.2 Organization 4
1.3 Terminology and conventions 5
1.4 Examples 6

Part II IP — Internet Protocol 7

Chapter 2 *Fundamentals of IP* 9

2.1 IP 9
2.2 Network addressing 10
2.3 Multi-homing 13
2.4 IPv6 14

Part III TCP — Transmission Control Protocol 17

CHAPTER 3 *Fundamentals of TCP* 19

3.1 Basic TCP sockets 19
3.2 Features and costs of TCP 24
3.3 Socket initialisation—servers 27
3.4 Socket initialisation—clients 32
3.5 Accepting client connections 37
3.6 Socket I/O 38
3.7 Termination 43
3.8 Socket factories 48
3.9 Permissions in TCP 51
3.10 Exceptions in TCP 51
3.11 Socket options 54
3.12 Socket timeouts 54
3.13 Socket buffers 56
3.14 Multi-homing 59
3.15 Nagle's algorithm 60
3.16 Linger on close 61
3.17 Keep-alive 63
3.18 Urgent data 65
3.19 Traffic class 66
3.20 Performance preferences 68
3.21 Putting it all together 69

CHAPTER 4 *Scalable I/O* 73

4.1 Introduction 73
4.2 Channels 75
4.3 Buffers 80
4.4 Non-blocking I/O 96
4.5 Multiplexing 98
4.6 Concurrent channel operations 109
4.7 Exceptions in new I/O 113

CHAPTER 5 *Scalable TCP* 117

5.1 Channels for TCP 117
5.2 TCP channel operations 119
5.3 Multiplexing in TCP 124

CHAPTER 6 *Firewalls* 129

6.1 Types of firewall 129
6.2 SOCKS 132
6.3 HTTP tunnelling 133
6.4 Java solutions 133
6.5 Network Address Translation 134

CHAPTER 7 *Secure Sockets* 135

7.1 A brief introduction to security 135
7.2 Introduction to SSL 136
7.3 Secure sockets in Java 141
7.4 Socket factory methods 143
7.5 Secure socket operations 146
7.6 Sessions 155
7.7 Binding & binding listeners 159
7.8 Session context 160
7.9 JSSE and channel I/O 162
7.10 SSL and RMI 162
7.11 Debugging 164
7.12 The SSLContext 165
7.13 Recommendations 168
7.14 HTTPS 170
7.15 Exceptions in JSSE 172
7.16 SSL system properties 173
7.17 Sample SSL client and server 175
7.18 The Java GSS-API 181

CHAPTER 8 *Scalable secure sockets* 185

8.1 Introduction 185
8.2 The SSLEngine class 186
8.3 Designing an SSLEngineManager class 191
8.4 Implementing the SSLEngineManager class 193
8.5 Using the SSLEngineManager class 205
8.6 Exercises 212

Part IV UDP — USER DATAGRAM PROTOCOL 215

CHAPTER 9 *Unicast UDP* 217

9.1 Overview 217
9.2 Simple UDP servers and clients 221

9.3 Datagram socket initialization 229
9.4 Datagram I/O 233
9.5 Termination 235
9.6 Socket factories 236
9.7 Permissions 237
9.8 Exceptions 237
9.9 Socket options 239
9.10 Timeout 239
9.11 Buffers 240
9.12 Multi-homing 241
9.13 Traffic class 243
9.14 Putting it all together 243
9.15 Reliable UDP 245

CHAPTER 10 *Scalable UDP* 261

10.1 Channels for UDP 261
10.2 DatagramChannel I/O 262
10.3 Multiplexing 264

CHAPTER 11 *Multicast UDP* 269

11.1 Introduction 269
11.2 Benefits 275
11.3 Limitations 275
11.4 Applications of multicast 277
11.5 Broadcasting in Java 278
11.6 Multicasting in Java 281
11.7 Multicasting and channel I/O 290
11.8 Broadcast and multicast permissions 291
11.9 Multicast address allocation 291
11.10 Reliable multicast 292

Part V IN PRACTICE 297

CHAPTER 12 *Server and client models* 299

12.1 Import statements 300
12.2 Servers 300
12.3 Channel I/O servers 319
12.4 Client models 334
12.5 JDK 1.5 executors 336
12.6 Staged event-driven architectures 336

CHAPTER 13 *Fallacies of networking* 339

13.1 Eight fallacies of networking 339
13.2 Further fallacies 342
13.3 In conclusion 345

Part VI APPENDICES 347

A TCP port states 349
B Platform dependencies 353
C References 357
Java Cross-Index 359
General Index 373
