Database Systems

Database System Architecture – A Walk Through Time: From Centralized Platform to Mobile Computing – Keynote Address	1
<i>Ali R. Hurson and Yu Jiao</i>	
Extending Wide-Area Replication Support with Mobility and Improved Recovery	10
<i>Hendrik Decker, Luis Irún-Briz, Francisco Castro-Company, Félix García-Neiva, and Francesc D. Muñoz-Escoí</i>	
Extending Databases to Precision-Controlled Retrieval of Qualitative Information	21
<i>Victor Polo de Gyves, Adolfo Guzman-Arenas, and Serguei Levachkine</i>	
An Approach for Solving Very Large Scale Instances of the Design Distribution Problem for Distributed Database Systems	33
<i>Joaquín Pérez O., Rodolfo A. Pazos R., Juan Frausto-Solís, Gerardo Reyes S., Rene Santaolaya S., Héctor J. Fraire H., and Laura Cruz R.</i>	

Distributed and Parallel Algorithms

On the Abstraction of Message-Passing Communications Using Algorithmic Skeletons: A Case Study	43
<i>Horacio González-Vélez</i>	
Implementing Distributed Mutual Exclusion on Multithreaded Environments: The Alien-Threads Approach	51
<i>Federico Meza, Jorge Pérez R., and Yadrán Eterovic</i>	
On Time Analysis of Random Walk Based Token Circulation Algorithms . .	63
<i>Alain Bui and Devan Sohier</i>	
Architecture for Media Streaming Delivery over P2P Networks	72
<i>Francisco de Asís López-Fuentes and Eckehard Steinbach</i>	
On the Role of Information Compaction to Intrusion Detection	83
<i>Fernando Godínez, Dieter Hutter, and Raúl Monroy</i>	
A Hybrid Framework of RR Scheduler to Ensure Priority, Low Complexity and Delay with Relative Fairness	98
<i>John Tsiligaridis and Raj Acharya</i>	

Data Hiding in Identification and Offset IP Fields 118
Enrique Cauich, Roberto Gómez Cárdenas, and Ryouske Watanabe

Interpretation of UML Sequence Diagrams as Causality Flows 126
Christophe Sibertin-Blanc, Omar Tahir, and Janette Cardoso

Real-Time Distributed Systems

A Proposal for On-Line Reconfiguration Based upon a Modification
of Planning Scheduler and Fuzzy Logic Control Law Response 141
Héctor Benítez-Pérez, A. García-Zavala, and Fabian García-Nocetti

Integrated Tool for Testing Timed Systems 153
*Hacène Fouchal, Sébastien Gruson, Ludovic Pierre, Cyril Rabat,
and Antoine Rollet*

Conformance Testing of Real-Time Component Based Systems 167
Abbas Tarhini and Hacène Fouchal

Cooperative Information Systems

Modeling Multiple Interactions Using Coloured Petri Nets:
A Case Study 182
*Francisco Camargo-Santacruz, Juan Frausto-Solís,
and Fernando Ramos-Quintana*

A Framework for Information Integration with Uncertainty 194
Ali Kiani and Nematollaah Shiri

Model Fragmentation for Distributed Workflow Execution:
A Petri Net Approach 207
Wei Tan and Yushun Fan

An Online Component Deployment System
for Dynamic Collaborative Sessions 215
Emir Hammami, Thierry Villemur, and Khalil Drira

Complexity in Collaborative Online Socio-Interactionist Environments:
A Good Reason for Distributed Systems 226
Hilton José Silva de Azevedo and Edson Emílio Scalabrin

Fault Tolerance

Injecting Communication Faults to Experimentally Validate
Java Distributed Applications 235
*Gabriela Jacques-Silva, Roberto Jung Drebes, Taisy Silva Weber,
and Eliane Martins*

Implementing Rollback-Recovery Coordinated Checkpoints 246
Clairton Buligon, Sérgio Cechin, and Ingrid Jansch-Pôrto

Information Retrieval

An Identity-Based Model for Grid Security Infrastructure	258
<i>Xiaoqin Huang, Lin Chen, Linpeng Huang, and Minglu Li</i>	
Lineage Tracing in Mediator-Based Information Integration Systems	267
<i>Nematollaah Shiri and Ali Taghizadeh-Azari</i>	
Combining Sources of Evidence for Recognition of Relevant Passages in Texts	283
<i>Alexander Gelbukh, NamO Kang, and SangYong Han</i>	
A Hierarchical and by Role Multi-agent Organization: Application to the Information Retrieval	291
<i>Emmanuel Adam and René Mandiau</i>	

Modeling and Simulation

Evaluating a Scientific SPMD Application on a Computational Grid with Different Load Balancing Techniques	301
<i>André Oliveira, Gabriel Argolo, Pablo Iglesias, Simone Martins, and Alexandre Plastino</i>	
Increasing the Training Speed of SVM, the Zoutendijk Algorithm Case . . .	312
<i>Rodolfo E. Ibarra Orozco, Neil Hernández-Gress, Juan Frausto-Solís, and Jaime Mora Vargas</i>	
Video Motion Detection Using the Algorithm of Discrimination and the Hamming Distance	321
<i>Josué A. Hernández-García, Héctor Pérez-Meana, and Mariko Nakano-Miyatake</i>	
An Efficient and Grain Preservation Mapping Algorithm: From ER Diagram to Multidimensional Model	331
<i>Yen-Ting Chen and Ping-Yu Hsu</i>	
Quadratic Optimization Fine Tuning for the Learning Phase of SVM	347
<i>Miguel González-Mendoza, Neil Hernández-Gress, and André Titli</i>	

Wireless Networks and Mobile Computing

<i>WFCTA</i> (Weighted Fair Channel Time Allocation) and Its Analysis for HR-WPAN	358
<i>WoongChul Choi, KwangSue Chung, Seung Hyong Rhee, and Jin-Woong Cho</i>	
Performance Analysis of Two Approaches to Service Discovery in Mobile Ad Hoc Networks	368
<i>Dante Arias-Torres and J. Antonio García-Macías</i>	

BCTMA(Bi-directional Cut-Through Medium Access) Protocol
for 802.11-Based Multi-hop Wireless Networks 377
WoongChul Choi, JinWoo Han, Byung Joon Park, and JiMan Hong

Some Security Issues of Wireless Systems 388
*Eduardo B. Fernández, Saeed Rajput, Michael VanHilst,
and María M. Larrondo-Petrie*

Overview the Key Management in Ad Hoc Networks 397
Gerardo del Valle and Roberto Gómez Cárdenas

On Performance Improvement
for 802.11-based Multi-hop Ad Hoc Wireless Networks 407
*WoongChul Choi, YongSuk Lee, Byung Joon Park,
and Kuk-Hyun Cho*

Analysis of Context Transfer in Seamless IP Mobility 417
Christian P. García-Martínez and J. Antonio García-Macías

Artificial Life and Multi-agent Systems

An Introduction to Evolutionary Algorithms and Their Applications 425
Carlos A. Coello Coello

Distributed Anticipatory System 443
Marco A. Ramos, Alain Berro, and Yves Duthen

Memory as an Active Component of a Behavioral Animation System 452
David Panzoli, Hervé Luga, and Yves Duthen

Growing Functional Modules, a Prospective Paradigm
for Epigenetic Artificial Intelligence 465
Jérôme Leboeuf Pasquier

Specifying Agent's Goals in 3D Scenarios Using Process Algebras 472
Fabiél Zúñiga, Félix Ramos, and H. Ivan Piza

A New Approach for Offer Evaluation in Multi-agent System Negotiation
Based in Evidential Paraconsistent Logic 483
Fabiano M. Hasegawa, Bráulio C. Ávila, and Marcos A.H. Shmeil

A Voice-Enabled Assistant in a Multi-agent System
for e-Government Services 495
Emerson Cabrera Paraiso and Jean-Paul A. Barthès

CAS – An Interface Generator in Natural Language
to Information System 504
Cezar Augusto Schipiura and Edson Emílio Scalabrin

A Formal Approach to Model Multiagent Interactions Using the B Formal Method	516
<i>Hind Fadil and Jean-Luc Koning</i>	
Behavioral Self-control of Agent-Based Virtual Pedestrians	529
<i>Emmanuelle Grislin-Le Strugeon, David Hanon, and René Mandiau</i>	
ISSADS 2004	
Security Challenges of Distributed <i>e</i> -Learning Systems	538
<i>Roberto Gómez Cárdenas and Erika Mata Sánchez</i>	
A Component-Based Transactional Service, Including Advanced Transactional Models	545
<i>Colombe Hérault, Sergiy Nemchenko, and Sylvain Lecomte</i>	
Author Index	557
