

# Table of Contents

## Regular Papers

### Coordination Styles and Trends

OpenSpaces: An Object-Oriented Framework for Reconfigurable Coordination Spaces . . . . .	1
<i>S. Ducasse, T. Hofmann, and O. Nierstrasz</i>	
Scripting Coordination Styles . . . . .	19
<i>F. Achermann, S. Kneubuehl, and O. Nierstrasz</i>	
Coordination Technology for Workflows on the Web: Workspaces . . . . .	36
<i>R. Tolksdorf</i>	

### Tuple Space Semantics and Implementation

A Principled Semantics for <code>inp</code> . . . . .	51
<i>J.L. Jacob and A.M. Wood</i>	
Proving the Correctness of Optimising Destructive and Non-destructive Reads over Tuple Spaces . . . . .	66
<i>R. De Nicola, R. Pugliese, and A. Rowstron</i>	
On Timed Coordination Languages . . . . .	81
<i>J.-M. Jacquet, K. De Bosschere, and A. Brogi</i>	

### Coordination Policies

Coordination and Access Control in Open Distributed Agent Systems: The TuCSoN Approach . . . . .	99
<i>M. Cremonini, A. Omicini, and F. Zambonelli</i>	
Distributed Splitting of Constraint Satisfaction Problems . . . . .	115
<i>F. Arbab and E. Monfroy</i>	
Law-Governed Internet Communities . . . . .	133
<i>X. Ao, N. Minsky, T.D. Nguyen, and V. Ungureanu</i>	

### Dynamics of Coordination

Reconfiguration of Software Architecture Styles with Name Mobility . . . . .	148
<i>D. Hirsch, P. Inverardi, and U. Montanari</i>	

An Agent Mediated Approach to Dynamic Change  
in Coordination Policies ..... 164  
*P. Bose and M.G. Matthews*

Coordination Models for Dynamic Resource Allocation ..... 182  
*S. Johansson, P. Davidsson, and B. Carlsson*

**Mobility**

MobileML: A Programming Language for Mobile Computation ..... 198  
*M. Hashimoto and A. Yonezawa*

Hybrid Models for Mobile Computing ..... 216  
*M. Katara*

Mobile Agents Coordination in Mob<sub>adtl</sub> ..... 232  
*G. Ferrari, C. Montangero, L. Semini, and S. Semprini*

**Semantic Models**

A Logical Interface Description Language for Components ..... 249  
*F. Arbab, F.S. de Boer, and M.M. Bonsangue*

A Formalization of the IWIM Model ..... 267  
*P. Katis, N. Sabadini, and R.F.C. Walters*

GCCS: A Graphical Coordination Language for System Specification ..... 284  
*R. Cleaveland, X. Du, and S.A. Smolka*

**Short papers**

**Shifting Linda Perspectives**

A Timed Linda Language ..... 299  
*F.S. de Boer, M. Gabbrielli and M.C. Meo*

The LuCe Coordination Technology for MAS Design  
and Development on the Internet ..... 305  
*E. Denti, A. Omicini, and V. Toschi*

Scoped Coordination in Open Distributed Systems ..... 311  
*I. Merrick and A. Wood*

**Directions in Software Architecture**

Patterns for Coordination ..... 317  
*L.F. Andrade, J.L. Fiadeiro, J. Gouveia, A. Lopes, and M. Wermelinger*

Coordination Models and Software Architectures in a Unified Software Development Process . . . . .	323
<i>P. Inverardi and H. Muccini</i>	
Wilde: Supporting Change in Groupware . . . . .	329
<i>S. Barrett and B. Tangney</i>	
<b>Achieving Software Dependability</b>	
On the Verification of Coordination . . . . .	335
<i>P. Dechering and I. van Langevelde</i>	
Guaranteeing Coherent Software Systems when Composing Coordinated Components . . . . .	341
<i>M. Sánchez, J.L. Herrero, J.M. Murillo, and J. Hernández</i>	
Coordination-Based Design of Distributed Systems . . . . .	347
<i>J.N. Kok and K. Sere</i>	
<b>Author Index</b> . . . . .	353
