<b>Part I. Fundamental Optics</b> <b>(General, Physical and Quantum Optics)</b>	
<hr/>	
<b>Optical Twist</b> .....	3
A. T. Friberg	
1 Introduction .....	3
2 Gaussian Twisted Beams .....	4
3 General Twisted Fields .....	11
4 Vortices and Angular Momentum .....	13
5 Conclusions .....	15
References .....	15
<b>Principles and Fundamentals of Near Field Optics</b> .....	18
M. Nieto-Vesperinas	
1 Introduction .....	18
2 Angular Spectrum Representation and the Limit of Resolution .....	19
3 Near Field Microscopy Configurations .....	20
4 The Optical Signal at the Tip .....	21
5 Inverse Scattering and Coherence .....	23
6 Applications, Artifacts, and Conclusions .....	24
References .....	25
<b>Spin-Orbit Interaction of a Photon:</b> <b>Theory and Experimentation on the Mutual Influence</b> <b>of Polarization and Propagation</b> .....	27
N. D. Kundikova and B. Ya. Zel'dovich	
1 Introduction .....	27
2 Optical Magnus Effect .....	29
3 Topological Optical Activity in a Rectilinear Optical Fiber .....	34
4 The Optical Effects Connected with Meridional Rays .....	36
References .....	39

**Atoms and Cavities:****The Birth of a Schrödinger Cat of the Radiation Field** . . . . . 40

J.-M. Raimond and S. Haroche

1	Introduction	40
2	Experimental Techniques	42
3	Non-resonant Interaction: A Quantum Meter	44
4	An Experiment on Complementarity	46
5	Dynamics of Decoherence	48
6	A Simple Model	50
7	Conclusion and Perspectives	52
	References	53

**Quantum Tomography of Wigner Functions****from Incomplete Data** . . . . . 54

V. Bužek, G. Drobný, and H. Wiedemann

1	Introduction	54
2	MaxEnt Principle and Observation Levels	55
3	States of Light: Phase-Space Description	57
4	Observation Levels for Single-mode Field	62
5	Optical Homodyne Tomography and MaxEnt Principle	66
6	Conclusions	69
	References	70

---

**Part II. Information Optics**

---

**Some New Aspects of the Resolution****in Gaussian Pupil Optics** . . . . . 75

S. S. Lee, M. H. Lee, and Y. R. Song

1	Introduction	75
2	Diffraction at the Gaussian Pupil and Transforms	76
3	Paraxial Gaussian Diffraction Amplitude and Resolution	78
4	Numerical Estimates and a Criterion for $\sigma$	80
5	Amplitude Modulation Plate (AMP) for the Gaussian Pupil	81
6	Optical Transfer Function (OTF)	83
7	Conclusions	83
	References	84

**Multichannel Photography with Digital Fourier Optics** . . . . . 86

G.G. Mu, L. Lin, and Z.-Q. Wang

1	Introduction	86
2	Superimposed Grating for Multichannel Photography	87
3	Multichannel Photography with Superimposed Grating	88
4	Retrieval of the Multispectrum Image with Digital Decoding	89

5 Local Decoding ..... 92  
 6 Experimental Results ..... 93  
 7 Conclusions ..... 93  
 References ..... 94

**Holographic Optics for Beamsplitting  
 and Image Multiplication ..... 96**

A. L. Mikaelian, A. N. Palagushkin, and S. A. Prokopenko

1 Introduction ..... 96  
 2 Review of the Literature ..... 97  
 3 Methods of Phase Hologram Synthesis ..... 98  
 4 CGH Design and Manufacture ..... 100  
 5 Conclusion ..... 107  
 References ..... 108

**Image Restoration, Enhancement and Target Location  
 with Local Adaptive Linear Filters ..... 111**

L. Yaroslavsky

1 Introduction ..... 111  
 2 Multi-component Local Adaptive Filters ..... 112  
 3 Selection of the Transform ..... 115  
 4 Filter Implementation: Local Adaptive Filters  
 with Nonlinear Processing in Transform Domain ..... 118  
 5 The Use of Other Transforms ..... 120  
 6 Modification of the Denoising Procedure:  
 Thresholding the Directional Laplacians ..... 124  
 7 Conclusion ..... 126  
 References ..... 126

**Fuzzy Problem for Correlation Recognition  
 in Optical Digital Image Processing ..... 128**

G. Cheng, G. Jin, M. Wu, and Y. Yan

1 Introduction ..... 128  
 2 Relationship Between Correlation and Matching ..... 130  
 3 Using Uncertain Pixels to Improve the Distortion-Invariant Ability . 134  
 4 Fuzzy Entropy Segmentation for Optical Correlation ..... 137  
 5 Conclusion ..... 141  
 References ..... 142

---

**Part III. Optical Communication  
(Photonics and Optoelectronics)**

---

**All-Optical Regeneration for Global-Distance  
Fiber-Optic Communications** ..... 147  
 E. Desurvire and O. Leclerc

1 Introduction ..... 147  
 2 Transoceanic Systems and Related Technologies ..... 148  
 3 All-Optical Regeneration: Theory ..... 154  
 4 All-Optical Regeneration: Experiments ..... 171  
 5 Electronic and Opto-electronic Versus All-Optical Regeneration .... 175  
 6 Conclusion ..... 179  
 References ..... 179

**Non-quantum Cryptography  
for Secure Optical Communications** ..... 183  
 J.P. Goedgebuer

1 Introduction ..... 183  
 2 Secure Communications by Coherence Modulation of Light ..... 184  
 3 Encrypting with Chaos ..... 190  
 4 Conclusion ..... 195  
 References ..... 196

---

**Part IV. Optical Materials and Processing**

---

**Pulsed Laser Deposition: An Overview** ..... 201  
 I. N. Mihailescu and E. György

References ..... 212

**Absolute Scale  
of Quadratic Nonlinear-Optical Susceptibilities** ..... 215  
 I. Shoji, T. Kondo, and R. Ito

1 Introduction ..... 215  
 2 SHG, PF, and DFG Determination ..... 217  
 3 Multiple-Reflection Effect ..... 224  
 4 Dispersion of Miller's  $\Delta$  ..... 225  
 5 Recommended Standards of Nonlinear-Optical Susceptibilities .... 226  
 References ..... 228

---

**Part V. Optical Technologies**

---

**Femtosecond Fourier Optics:**

**Shaping and Processing of Ultrashort Optical Pulses** ..... 233

A. M. Weiner

1	Introduction.....	233
2	Femtosecond Pulse Shaping .....	234
3	Holographic and Nonlinear Fourier Pulse Processing.....	238
4	Selected Applications of Shaped Pulses .....	243
	References .....	245

**Aperture-modulated Diffusers (AMDs)** ..... 247

H. P. Herzig and P. Kipfer

1	Introduction.....	247
2	Design of AMDs .....	248
3	Scaling Law for Focusing Lenses and Far-field Diffusers .....	250
4	Examples of Realized Diffractive AMDs.....	253
5	Conclusion .....	256
	References .....	257

**Optical Properties of Quasiperiodic Structures:**

**Linear and Nonlinear Analysis** ..... 258

M. Bertolotti and C. Sibilìa

1	Introduction.....	258
2	What Are Fractals? .....	259
3	Transmission Properties of Filters Realized with a Fractal Code....	261
4	Properties of a Fractal Filter. Dynamical Map .....	263
5	Time-Domain Response of the Filter .....	269
6	Nonlinear Model of the Filter .....	271
7	Mesoscopic Layered Structures.....	273
8	Conclusions .....	276
	References .....	276

---

**Part VI. Optical Metrology  
(Optical Systems)**

---

**Diffractive Optical Elements in Materials Inspection** ..... 281

R. Silvennoinen, K.-E. Peiponen, and T. Asakura

1	Introduction.....	281
2	Theory of Diffractive Elements .....	281
3	Applications.....	286
	References .....	292

<b>Multiple-Wavelength Interferometry for Absolute Distance Measurement</b> .....	294
R. Dändliker and Y. Salvadé	
1 Introduction .....	294
2 Multiple-Wavelength Interferometry .....	296
3 Multiple-Wavelength Source .....	301
4 Absolute Distance Measurement .....	308
5 Conclusions .....	315
References .....	316
<b>Speckle Metrology: Some Newer Techniques and Applications</b> .....	318
R. S. Sirohi	
1 Speckle Photography .....	318
2 Speckle Interferometry .....	321
3 Electronic Speckle Pattern Interferometry (ESPI) .....	323
References .....	327
<b>Limits of Optical Range Sensors and How to Exploit Them</b> ...	328
G. Häusler, P. Ettl, M. Schenk, G. Bohn, and I. Laszlo	
1 Introduction .....	328
2 About Smooth and Rough Surface Interferometry .....	329
3 Smooth Surface Mode .....	331
4 Rough Surface Mode .....	336
5 Conclusions .....	339
References .....	341
<b>Imaging Spectroscopy for the Non-invasive Investigation of Paintings</b> .....	343
A. Casini, F. Lotti, and M. Picollo	
1 Introduction .....	343
2 Historical Background .....	344
3 Imaging Spectroscopy Equipment .....	346
4 Applications .....	347
5 Conclusions .....	354
References .....	355
<hr/>	
<b>Part VII. Biomedical Optics</b>	
<hr/>	
<b>Optical Coherence Tomography in Medicine</b> .....	359
A. F. Fercher and C. K. Hitzenberger	
1 Introduction .....	359
2 Back-Scattering .....	361

3	Time-Domain OCT .....	364
4	Resolution in OCT .....	368
5	Frequency-Domain OCT .....	372
6	Doppler OCT .....	377
7	OCT Macroscopy and Morphometry .....	379
8	OCT Microscopy and Optical Biopsy .....	382
9	Conclusion .....	383
	References .....	384

**The Spectral Optimization of Human Vision:**

	<b>Some Paradoxes, Errors and Resolutions .....</b>	<b>390</b>
--	---	------------

B. H. Soffer and D. K. Lynch

1	Introduction .....	390
2	Spectral Radiant Density Distributions Contrasted with Sensitivity .....	392
3	Regarding Evolution .....	400
4	Summary .....	403
	References .....	404

---

**Part VIII. Others**

---

	<b>Optical Methods for Reproducing Sounds</b>	
	<b>from Old Phonograph Records .....</b>	<b>409</b>

J. Uozumi and T. Asakura

1	Introduction .....	409
2	Wax Cylinder: Laser Beam Reflection Method .....	410
3	Disk: Laser Diffraction Method .....	418
4	Negative Cylinder: Modification of the Laser Beam Reflection Method .....	421
5	Conclusion .....	424
	References .....	425
