

Contents

1	Introduction	1
1.1	Purposes of this Book	1
1.2	Constructing Characteristic Functions	5
1.3	Economic Interpretation of CFs	10
1.4	Examination of Existing Option Models	15
1.5	Equivalence of CFs to PDEs	19
2	Modular Pricing of Options (MPO)	25
2.1	Stochastic Factors as Modules	25
2.2	Stochastic Volatilities	28
2.2.1	An Introductory Survey	28
2.2.2	Square Root Process	30
2.2.3	Ornstein-Uhlenbeck Process	36
2.2.4	Double Square Root Process	49
2.3	Stochastic Interest Rates	56
2.3.1	An Introductory Survey	56
2.3.2	Square Root Process	58
2.3.3	Ornstein-Uhlenbeck Process	62
2.3.4	Double Square Root Process	65
2.4	Random Jumps	68
2.4.1	An Introductory Survey	68
2.4.2	Pure Jumps	72
2.4.3	Lognormal Jumps	74
2.4.4	Pareto Jumps	77
2.5	Integrating the Modules	80
2.5.1	Scheme of Integration	80
2.5.2	Pricing Kernels for Options and Bonds	87
2.5.3	Correlation with Stock Returns: SI versus SV	88
2.6	Appendices	93
2.6.1	A: Derivation of the CFs with O-U Process	93

2.6.2	B: Derivation of the CFs with Double Square Root Process	96
-------	--	----

3 Extensions of MPO to Exotic Options 99

3.1	Introduction	99
3.2	Barrier Options	100
3.2.1	Introduction	100
3.2.2	Two Special Cases	103
3.2.3	Numerical Examples	109
3.3	Lookback Options	115
3.3.1	Introduction	115
3.3.2	Pricing Formulae with Stochastic Factors	116
3.4	Asian Options	122
3.4.1	Introduction	122
3.4.2	The Black-Scholes World	123
3.4.3	Asian Options in a Stochastic World	128
3.4.4	Approximations for Arithmetic Average Asian Options	132
3.4.5	A Model for Asian Interest Rate Options	135
3.5	Correlation Options	138
3.5.1	Introduction	138
3.5.2	Exchange Options	142
3.5.3	Quotient Options	146
3.5.4	Product Options	147
3.6	Other Exotic Options	149
3.7	Appendices	151
3.7.1	C: Proofs for Probabilities Involving a Maximum or a Minimum	151
3.7.2	D: Derivation of the CFs for Correlation Options	154

4 Conclusions 157

List for Notations and Symbols 161
