Table of Contents

Preface ..... **V**

Book Overview ..... **VII**

Acknowledgements ..... **IX**

Table of Contents ..... **XI**

1. Background **1**

1.1 Introduction 1

1.2 Basic Concepts 2

1.3 Temporal Aspects of IMDs 5

1.4 Spatial Aspects of an IMD 6

1.5 Multimedia Document Models 7

1.6 Multimedia Document Standards 9

1.6.1 Multimedia and Hypermedia Information Coding Experts Group (M H E G) 10

1.6.2 H Y T I M E 22

1.6.3 Comparison of MHEG and Hytime 34

1.6.4 SMIL 35

2. Modeling Interactive Multimedia Documents **43**

2.1 Interaction 44

2.1.1 Events Classification 45

2.1.2 Object-Oriented Modeling of Events 47

2.1.3 Algebraic Composition of Events 51

2.1.4 Spatiotemporal Composition of Events 52

2.2 Spatiotemporal Composition of Media Objects 53

2.2.1 Basic Concepts 53

2.2.2 Spatiotemporal Composition Model 57

2.3 Interactive Scenario Modeling 60

3. Authoring Interactive Multimedia Presentations....63

3.1 Actor Specifications and Transformations....64

3.2 Event Specification....66

3.3 Scenario Tuples Specifications....68

4. Spatiotemporal Specification & Verification for Multimedia Scenarios....73

4.1 Authoring Spatiotemporal Compositions for IMD Documents....75
4.1.1 Authoring Environment....75

4.2 Verification of IMD Documents....79
4.2.1 Temporal Layout Tool....80
4.2.2 Spatial Layout....81
4.2.3 Scenario Animation Tool....82
4.2.4 Execution Table....82

4.3 Conclusions....84

5. Transformation of Declarative Specifications to Algorithmic Representation....87

5.1 Events....88
5.1.1 User Events....89
5.1.2 Intra-objects Events....89
5.1.3 Application and System Events....90
5.1.4 Synch Events....90
5.1.5 Non-state Events....91
5.1.6 State Events....91
5.1.7 Complex Events....92

5.2 Scenario Tuples....94
5.2.1 Start Stop Event Detection Handlers....95
5.2.2 Enabling and Disabling Scenario Tuples....96

6. Rendering Interactive Multimedia Scenarios....97

6.1 A Single Threaded Approach....97
6.1.1 Overall Architecture....100
6.1.2 Auxiliary Structures....102
6.1.3 Event Detection and Evaluation....103
6.1.4 Scenario Rendering Algorithms....105
6.1.5 Presentation Engine....107

6.2 A Multithreaded Approach....108
6.2.1 The Server....110
6.2.2 Rendering Scheme Architecture - The Client....111

6.2.3 Event Handling....113
6.2.4 Starting and Interrupting Scenario Tuples....118
6.2.5 Synchronized Presentation of Media-Objects....120

7. Indexing Large Multimedia Applications: A Spatiotemporal Indexing Scheme....123

7.1 Introduction....123

7.2 A Sample Multimedia Composition....124

7.3 Indexing Schemes....127
7.3.1 A Simple Spatial and Temporal Indexing Scheme....128
7.3.2 A Unified Spatiotemporal Indexing Scheme....130
7.3.3 Retrieval of Spatiotemporal Operators Using R-trees....131

7.4 Estimation of the Retrieval Cost....134
7.4.1 Cost Analysis of R-trees....134
7.4.2 Analytical Comparison of the Indexing Schemes....136

APPENDIX A: IMD Scenario Script, a Sample Application....141

APPENDIX B: Scenario Model, the BNF Grammar....146

References....155

Subject Index....159
