<b>Nonlinear Phenomena Involving Dispersive Alfvén Waves</b> . . . . .	<b>1</b>
<i>P.K. Shukla, L. Stenflo</i>	
1 Introduction . . . . .	1
2 Dispersive Alfvén waves in a uniform plasma . . . . .	3
3 Generation of Alfvén waves . . . . .	5
4 Nonlinear effects caused by inertial Alfvén waves . . . . .	10
5 Amplitude modulation of kinetic Alfvén waves . . . . .	14
6 Modulation of EMICA waves . . . . .	16
7 Self-interaction between dispersive Alfvén waves in nonuniform plasmas . . . . .	18
8 Chaos in Alfvénic turbulence . . . . .	24
9 Summary and conclusions . . . . .	26
References . . . . .	28
<b>Whistler Solitons, Their Radiation and the Self-Focusing of Whistler Wave Beams</b> . . . . .	<b>31</b>
<i>V.I. Karpman</i>	
1 Introduction . . . . .	31
2 Basic equations. Slab ducts . . . . .	32
3 Full wave solutions for the slab ducts . . . . .	37
4 Slab whistler solitons . . . . .	41
5 Self-focusing of whistler wave beams . . . . .	44
6 Concluding remarks . . . . .	51
References . . . . .	52
<b>Alfvén Wave Filamentation and Plasma Heating</b> . . . . .	<b>54</b>
<i>S. Champeaux, A. Gazol, T. Passot, P.L. Sulem</i>	
1 Introduction . . . . .	54
2 Filamentation of dispersive Alfvén waves . . . . .	56
3 Filamentation of weakly dispersive wave trains . . . . .	64
4 Filamentation in the weakly dispersive longwavelength regime . . . . .	74
5 Conclusions . . . . .	80
References . . . . .	81
<b>Nonlinear Quasiresonant Alfvén Oscillations in a One-Dimensional Magnetic Cavity</b> . . . . .	<b>83</b>
<i>L. Nocera, M.S. Ruderman</i>	
1 Introduction . . . . .	83
2 Basic equations and assumptions . . . . .	84
3 Derivation of the governing equations . . . . .	87
4 Energetics . . . . .	90

## VIII

5	Multistability	91
6	Solutions with shocks and high-Reynolds-number bifurcations	98
7	Conclusions	101
	References	102

### **On the Reflection of Alfvén Waves in the Inhomogeneous Solar Wind** . . . . . **104**

*L.M.B.C. Campos, N.L. Isaeva, P.J.S. Gil*
