

Table of Contents

Specification and Verification of a Formal System for Structurally Recursive Functions	1
<i>Andreas Abel</i>	
A Predicative Strong Normalisation Proof for a λ -Calculus with Interleaving Inductive Types	21
<i>Andreas Abel and Thorsten Altenkirch</i>	
Polymorphic Intersection Type Assignment for Rewrite Systems with Abstraction and β -Rule	41
<i>Steffen van Bakel, Franco Barbanera, and Maribel Fernández</i>	
Computer-Assisted Mathematics at Work (The Hahn-Banach Theorem in Isabelle/Isar)	61
<i>Gertrud Bauer and Markus Wenzel</i>	
Specification of a Smart Card Operating System	77
<i>Gustavo Betarte, Cristina Cornes, Nora Szasz, and Alvaro Tasistro</i>	
Implementation Techniques for Inductive Types in Plastic	94
<i>Paul Callaghan and Zhaohui Luo</i>	
A Co-inductive Approach to Real Numbers	114
<i>Alberto Ciaffaglione and Pietro Di Gianantonio</i>	
Information Retrieval in a Coq Proof Library Using Type Isomorphisms . .	131
<i>David Delahaye</i>	
Memory Management: An Abstract Formulation of Incremental Tracing . .	148
<i>Healdene Goguen, Richard Brooksby, and Rod Burstall</i>	
The Three Gap Theorem (Steinhaus Conjecture)	162
<i>Micaela Mayero</i>	
Formalising Formulas-as-Types-as-Objects	174
<i>Qiao Haiyan</i>	
Author Index	195
