

Contents

Part I Bose–Einstein Condensation

Density Oscillations in Trapped Bose Condensates at Finite Temperature M. Fliesser and R. Graham.....	3
Coherent Vortex Dynamics in Two and Three Dimensional Bose–Einstein Condensates R.J. Ballagh and B.M. Caradoc-Davies	18
Quasicondensate Droplet Formation in Hydrogen R. Côté.....	28
Polarization Decay in a BCS Paired Fermi Gas B. Berhane and T.A.B. Kennedy.....	41
A Model of a Pumped Continuous Atom Laser N. Robins, C. Savage, and E. Ostrovskaya.....	50
The BEC Near a Feshbach Resonance: A Superfluid of Mutually Coherent Condensates[†] E. Timmermans	60
Collisional and Collapse Dynamics of a Twin Bose–Einstein Condensate with Negative Scattering Length W. Zhang, K.-P. Marzlin, L. Tribe, and B.C. Sanders.....	70
Schrödinger Cat State of a Bose–Einstein Condensate in a Double-Well Potential J. Ruostekoski.....	77

Part II Quantum Interference and Atom Optics

A Historical Perspective on Lasing Without Inversion[†] N. Bloembergen and G. Khitrova	91
---	----

The Coherent-Path Approach to Forward Scattering of Recoil-Free Resonant Gamma Radiation[†]
 G.R. Hoy 107

Parametric Amplification of Coupled Atomic and Optical Fields[†]
 M.G. Moore and P. Meystre 116

Quantum and QED Effects on Reflection from an Atomic Mirror[†]
 B. Segev 126

Atom Wave Lithography *via* Adiabatic Passage in Multilevel Systems
 Y. Rozhdestvensky and L. Plimak 136

Part III Quantum Information

Qudit Entanglement
 P. Rungta, W.J. Munro, K. Nemoto, P. Deuar, G.J. Milburn, and C.M. Caves 149

Grover’s Algorithm for Multiobject Search in Quantum Computing[†]
 G. Chen, S.A. Fulling, H. Lee, and M.O. Scully 165

New Tests of Macroscopic Local Realism
 M.D. Reid 176

Teleportation Criteria: Form and Significance
 T.C. Ralph 187

Quantum Information Processing Based on Cavity QED with Mesoscopic Systems[†]
 M. Lukin, M. Fleischhauer, and Atac Imamoglu 193

Quantum State Protection Using All-Optical Feedback
 P. Tombesi, V. Giovannetti, and D. Vitali 204

Part IV Cavity QED and Nonlinear Optics

Single-Photon Nonlinear Optics and Quantum Control
 S. Parkins, D. Walls, and A. Imamoglu 217

**Normal-Mode Coupling of Excitons and Photons
in Nanocavities – Toward the Quantum Statistical Limit[†]**
 E.S. Lee, S. Park, P. Brick, C. Ell, C. Spiegelberg, H.M. Gibbs,
 G. Khitrova, D.G. Deppe, and D.L. Huffaker 230

Cavity QED with Many Atoms
 U. Martini and A. Schenzle 238

**The Photonic Band Gap Laser: The Role of Spontaneous
Emission in the Theory of Solid-State Lasers and LEDs**
 R. Pike, A. Hughes, and M. Szymanska 250

**Superradiant and Subradiant Behavior
of the Overdamped Many-Atom Micromaser**
 V.V. Temnov, M.I. Kolobov, and F. Haake 261

**Bifurcations to Cooperative States
in Arrays of Coupled Nonlinear Optical Oscillators**
 K. McNeil 271

Part V Quantum Noise Processes

Nonlinear Quantum Fluctuations in the Parametric Amplifier
 P.D. Drummond and S. Chaturvedi 283

Quantum Phase Transitions in a Linear Ion Trap
 G.J. Milburn and P. Alsing 303

**Quantum Noise Transfer Functions: A Practical Tool
in Quantum Optics**
 H.-A. Bachor and T.C. Ralph 313

Self-Consistency of Thermal Jump Trajectories
 Y.-T. Chough and H.J. Carmichael 333

**Complementarity in Spontaneous Emission:
Quantum Jumps, Staggers and Slides**
 H. Wiseman 347

Ergodicity of Quantum Trajectory Detection Records
 J.D. Cresser 358

[†] Paper presented at the TAMU–ONR Workshop on Quantum Optics
