

# Table of Contents

<b>1. Introduction</b> .....	1
1.1 Artificial Intelligence for Computer Games .....	1
1.2 Agents .....	2
1.2.1 Reactive Agents .....	3
1.2.2 Triggering Agents .....	4
1.2.3 Deliberative Agents .....	4
1.2.4 Hybrid Agents .....	5
1.2.5 Anytime Agents .....	6
1.3 Planning .....	6
1.3.1 Temporal Ontologies .....	6
1.3.2 Resources .....	8
1.4 Search Paradigms .....	15
1.4.1 Refinement Search .....	15
1.4.2 Local Search .....	18
1.4.3 Search-Paradigm Discussion .....	18
1.5 Search Frameworks .....	20
1.5.1 Operations Research .....	20
1.5.2 Propositional Satisfiability .....	20
1.5.3 Constraint Programming .....	21
1.5.4 Search Framework Discussion .....	22
1.6 Conclusion .....	23
<b>2. Using Global Constraints for Local Search</b> .....	25
2.1 Global Constraints .....	26
2.1.1 Global Constraints from a Local Search Perspective ...	26
2.1.2 Internal Structures .....	27
2.1.3 Improvement Heuristics .....	28
2.2 Granularity .....	28
2.3 Global Search Control .....	30
2.4 A Case Study: Dynamic Job-Shop Scheduling .....	31
2.4.1 Realization .....	33
2.4.2 Results .....	34
2.4.3 Constraint Weights .....	36

2.5	Susceptibility to Local Minima and Plateaus	39
2.5.1	Randomization	39
2.5.2	Random Walks	42
2.5.3	Tabu Lists	42
2.6	Extending the Constraints	44
2.6.1	More Knowledge	44
2.6.2	Aggressive Heuristics	45
2.7	Conclusion	45
<b>3.</b>	<b>Structural Constraint Satisfaction</b>	<b>47</b>
3.1	Graph Grammars	49
3.2	Graph Elements for SCSPs	50
3.3	Structural Constraints	51
3.4	Structural Constraint Satisfaction Problems	55
3.5	Generating the Search Space	56
3.5.1	Productions for Variables	57
3.5.2	Productions for Nonextensible Constraints	58
3.5.3	Productions for Extensible Constraints	59
3.5.4	Productions for Constraint Extensions	61
3.6	Avoiding Redundancy	62
3.7	Combination with the Global Constraint Approach	63
3.7.1	Application of Structural Constraints	64
3.7.2	Types of Global Constraints	64
3.7.3	Global Search Control	65
3.7.4	Goal Optimization	65
3.8	Conclusion	66
<b>4.</b>	<b>The Planning Model</b>	<b>69</b>
4.1	The Model's Basics	69
4.1.1	Actions, Action Tasks, and Action Resources	69
4.1.2	State Resources, State Tasks, and Precondition Tasks	70
4.1.3	Objects and References	72
4.1.4	Sensors and Existence	72
4.2	The Planning Model as SCSP	73
4.2.1	The Current Time	73
4.2.2	Actions	74
4.2.3	Operations	76
4.2.4	States	78
4.2.5	Objects	82
4.2.6	References	84
4.2.7	Sensors	85
4.2.8	Existence Projections	86
4.2.9	Correctness	87
4.2.10	Problem Formulation	88

4.3	Incomplete Knowledge .....	88
4.3.1	A Single-Plan Approach .....	88
4.3.2	Missing Information .....	90
4.3.3	Information Gathering .....	91
4.3.4	Partial Knowledge .....	92
4.4	Conclusion .....	95
<b>5.</b>	<b>Application</b> .....	<b>97</b>
5.1	Revisiting the Orc Quest Example .....	98
5.1.1	The Constraints .....	98
5.1.2	The Constraints' Heuristics .....	99
5.1.3	The Global Search Control .....	102
5.1.4	Evaluation .....	103
5.2	Domain-Independent Planning .....	104
5.2.1	Extending the ARC and TC .....	105
5.2.2	A State Resource Constraint with a Symbolic State Domain .....	105
5.2.3	Evaluation .....	112
5.3	Conclusion .....	122
<b>6.</b>	<b>Conclusion</b> .....	<b>127</b>
<b>7.</b>	<b>Future Work</b> .....	<b>131</b>
7.1	Search Guidance .....	131
7.2	Combination of Local and Refinement Search .....	132
7.3	Learning .....	132
7.4	Self-Reflective Planning .....	133
7.5	Social Aspects .....	133
<b>A.</b>	<b>Internet Links</b> .....	<b>135</b>
A.1	General AI .....	135
A.2	Artificial Intelligence for Computer Games .....	135
A.3	Agents .....	136
A.4	Planning .....	136
A.5	Search Frameworks .....	137
A.5.1	Operations Research .....	137
A.5.2	Propositional Satisfiability .....	138
A.5.3	Constraint Programming .....	138
<b>B.</b>	<b>The “Send More Money” Problem</b> .....	<b>139</b>
<b>C.</b>	<b>Choice Randomization</b> .....	<b>141</b>
C.1	Choice-Dependent Information .....	142
C.2	Choosing an Alternative .....	142
C.3	Utility Function vs. Random Choice .....	143

- C.4 Calculation Costs . . . . . 146
- C.5 Allowing for Non-positive Utility Values . . . . . 147
- C.6 Conclusion . . . . . 148
  
- D. Ensuring the Satisfaction of Structural Constraints . . . . . 151**
  - D.1 A Structurally Consistent Start Graph . . . . . 151
    - D.1.1 The Start Graph's Variables and EQUALS:X Constraints . . . . . 152
    - D.1.2 The Start Graph's STATE RESOURCES . . . . . 152
    - D.1.3 The Start Graph's TASK CONSTRAINTS . . . . . 158
    - D.1.4 The Start Graph's ACTION RESOURCE CONSTRAINTS. 158
    - D.1.5 Preparation for Closed Worlds . . . . . 160
  - D.2 Validating the Improvement Heuristics . . . . . 160
    - D.2.1 Adding an Action . . . . . 160
    - D.2.2 Removing an Action . . . . . 163
  
- References . . . . . 165**
  
- Index . . . . . 177**
