

Contents

Preface

- 1 Knowledge, Complexity and Innovation Systems: Prologue** 1
Manfred M. Fischer and Josef Fröhlich

PART A: Innovation Systems

- 2 Networks, National Innovation Systems and Self-Organisation**
Pier Paolo Saviotti
- 2.1 Introduction 21
2.2 Complexity and Evolutionary Theories 23
2.3 Implications of Evolutionary Theories for the NSI 31
2.4 Conclusions 43
- 3 Innovation Policy in the Systems of Innovation Approach: Some Basic Principles**
Charles Edquist
- 3.1 Introduction 46
3.2 Innovation Policy 46
3.3 Objectives of Innovation Policy 47
3.4 Reasons for Innovation Policy Intervention 47
3.5 The Role of Different Kinds of Innovations 48
3.6 Systems of Innovation 50
3.7 General Policy Implications of the SI Approach 50
3.8 The SI Approach as a Framework for Designing Specific Innovation Policy 55
- 4 The Globalisation of Technology and the European Innovation System**
Daniele Archibugi with Assistance of Alberto Coco
- 4.1 Introduction 58
4.2 The Globalisation of Technology 59
4.3 The Quantitative Significance of the Globalisation of Technology and the Position of Europe 61
4.4 Policy Analysis 68
4.5 Conclusions 74

PART B: Knowledge Creation and Spillovers

5 Scaling Knowledge Production: How Significant is the Region?

Arnoud Legendijk

5.1	Introduction	79
5.2	The Region as a 'Natural' and Unique Site of Knowledge Production	80
5.3	The Region as a System of Innovation	84
5.4	The Region as a Political Site of Knowledge Production	87
5.5	Intermezzo: The Region as a 'Spatially Reified' Site of Knowledge Production	91
5.6	The Region as a 'Socially Constructed' Site of Knowledge Production	96
5.7	Outlook: Region as a Site of Policy Innovation	100

6 Knowledge Spillovers in a Spatial Context – A Critical Review and Assessment

Charlie Karlsson and Agostino Manduchi

6.1	Introduction	101
6.2	Knowledge in Economic Theory	103
6.3	Knowledge Spillovers – a General Introduction	105
6.4	Knowledge Spillovers over the Industry Life-Cycle	109
6.5	Knowledge Spillovers – The Empirical Evidence	110
6.6	Knowledge Spillovers – Towards a Formalisation	114
6.7	Knowledge Spillovers and Spatial Interaction	118
6.8	Modelling the Influence of Knowledge Spillovers	119
6.9	Technology Policy in a World with Knowledge Spillovers	121
6.10	Conclusions	121

7 The Role of Space in the Creation of Knowledge in Austria - An Exploratory Spatial Analysis

Manfred M. Fischer, Josef Fröhlich, Helmut Gassler and Attila Varga

7.1	Introduction	124
7.2	Methodology and Data	125
7.3	Time-Space Patterns of Knowledge Production in Austria	130
7.4	Local Inputs to Innovation – an Assessment of Their Relative Significance in Knowledge Production	136
7.5	Conclusions	141

8	Knowledge Spillovers in High Technology Agglomerations: Measurement and Modelling	
	<i>Elsie Echeverri-Carroll</i>	
8.1	Introduction	146
8.2	Core–Periphery Spatial Models	148
8.3	Data and the Definition of High Technology	154
8.4	Statistical Results	155
8.5	Conclusions	158
PART C: Innovation, Knowledge and Regional Development		
9	Inventive Knowledge and the Sources of New Technology: Regional Changes in Innovative Capacity in the United States	
	<i>Luis Suarez-Villa in the United States'</i>	
9.1	Introduction	165
9.2	The Emergence of the Sunbelt	166
9.3	The Factors of Inversion	172
9.4	Conclusions	179
10	Urban Innovation and Collective Learning: Theory and Evidence from Five Metropolitan Cities in Europe	
	<i>Roberta Capello</i>	
10.1	Introduction	181
10.2	Learning in Cities	182
10.3	Data, Sample Characteristics and Methodology	188
10.4	Innovative Behaviour of Firms in Metropolitan Cities	191
10.5	The Determinants of Innovation in Cities	197
10.6	Dynamic Urbanisation Economies versus Milieu Economies in Innovative Behaviour: The Role of Firms' Size and Sectoral Specialisation	299
10.7	Conclusions	203
11	Distributed Knowledge in Complex Engineering Project Networks: Implications for Regional Innovation Systems	
	<i>Neil Alderman</i>	
11.1	Introduction	209
11.2	Complex Engineering Project Networks	211
11.3	Regional Innovation Systems and Project Value Systems	212
11.4	Case Studies	217
11.5	Conclusions	223

12 Endogenous Technological Change, Entrepreneurship and Regional Growth

Zoltán J. Ács

12.1	Introduction	228
12.2	Endogenous Technical Change	230
12.3	Entrepreneurial Discovery	233
12.4	Regional Growth	236
12.5	Theory and Empirical Results	242
12.6	Policy Implications	244

PART D: Modelling Complexities

13 Modelling of Knowledge, Capital Formation, and Innovation Behaviour within Micro-Based Profit Oriented and Correlated Decision Processes

Günter Haag and Philipp Liedl

13.1	Introduction	251
13.2	Modelling Nested Innovation Processes	254
13.3	Simulations for Selected Examples and Scenarios	264
13.4	Conclusions	273

14 Communication and Self-Organisation in Complex Systems: A Basic Approach

Frank Schweitzer and Jörg Zimmermann

14.1	Introduction	275
14.2	Complex Systems and Self-Organisation	276
14.3	Complex Versus Minimalistic Agents	278
14.4	An Information-Theoretic Approach	281
14.5	Basic Model of Communicating Agents	283
14.6	The Mean-Field Approach	286
14.7	Spatial Information Distribution	289
14.8	Conclusions	295

15 Agents, Interactions, and Co-Evolutionary Learning

David F. Batten

15.1	Introduction	297
15.2	Schelling's Self-Organising Neighbourhoods	298
15.3	Simulation via Cellular Automata	302
15.4	Growing an Innovative Silicon Society	306
15.5	Co-Evolutionary Learning	309
15.6	Discovering Artificial Economics	311
15.7	Some Final Thoughts	314

16 Major Actors of Innovation Diffusion Process

Michael Sonis

16.1	Introduction: Innovation Diffusion as a Way to Complexity through the Process of Complication	317
16.2	Major Actors in the Innovation Diffusion Process	318
16.3	The First Principle of Individual Choice within the Collective	328
16.4	Innovators and Innovating Elites	332
16.5	Active Environment and Socio-Ecological Niches	335
16.6	Conclusions	340

PART E: Policy Issues

17 Options, Innovation and Metropolitan Development: Novel Insights from Non-Linear Dynamics

Dimitrios Dendrinos

17.1	Background	345
17.2	Options and Metropolitan Development	347
17.3	Options and Their Prices	350
17.4	Derivatives, Speculation and Development	356
17.5	Derivatives Market Failures and Regulation	361
17.6	Conclusions	367

18 Spatial Dynamics and Government Policy: An Artificial Intelligence Approach to Comparing Complex Systems

Peter Nijkamp, Jacques Poot, and Gabriella Vindigni

18.1	Complexity in a Dynamic Spatial-Economic Context	369
18.2	Research Synthesis and Meta-Analysis	372
18.3	Rough Set Analysis as an Artificial Intelligence Tool for Research Synthesis	374
18.4	A Sample of Studies on Government and Growth	377
18.5	The Generalised Rough Set Method: A Multilevel Strategy Learning Approach	379
18.6	Conclusions	390

19 Does R&D-Infrastructure Attract High-Tech Start-Ups?

Dirk Engel and Andreas Fier

19.1	Introduction	402
19.2	Theoretical Reflections	402
19.3	Definitions and Data	405
19.4	High-Tech Start-Ups in Eastern Germany	406
19.5	Determinants for Regional Differences in the Number of High-Tech Start-Ups	410
19.6	Conclusions and Policy Implications	419
