I Computational Electromagnetics

| | |
|--|-----|
| Multi-Time PDEs for Dynamical System Analysis | 3 |
| <i>J. Roychowdhury</i> | |
| Edge Finite Elements of Variable Order for Maxwell's Equations | 15 |
| <i>L. Demkowicz</i> | |
| A Common-Mode Skeleton Model for EMC Simulations | 35 |
| <i>R. Rietman</i> | |
| Computational Electromagnetism in Transformer and Switchgear Design: Current Trends | 55 |
| <i>A. Blaszczyk, H. Ketterer, A. Pedersen</i> | |
| Numerical Algorithms for the Calculation of Magneto-Quasistatic Fields Using the Finite Integration Technique | 63 |
| <i>M. Clemens, S. Drobny, M. Wilke, T. Weiland</i> | |
| Parallel Maxwell Solvers | 71 |
| <i>G. Haase, M. Kuhn, U. Langer, S. Reitzinger, J. Schöberl</i> | |
| Simulation of Electric Field Strength and Force Density on Contaminated H–V Insulators | 79 |
| <i>U. Schreiber, S. Keim, U. van Rienen</i> | |
| Commercial EM Codes Suitable for Modeling of Microwave Heating - a Comparative Review | 87 |
| <i>V.V. Yakovlev</i> | |
| On the Representation of Differential Forms by Potentials in Dimension 3 | 97 |
| <i>A. Bossavit</i> | |
| Hysteresis Models for Transient Simulation | 105 |
| <i>L.R. Dupre, R.V. Keer, J.A.A. Melkebeek, Y.I. Moroz, S.E. Zirka</i> | |
| Calculation of Frequency Domain Parameters in Lossfree and Lossy Structures Using the FI-Technique and a Modal Approach | 113 |
| <i>R. Schuhmann, T. Weiland</i> | |
| Statistical Simulation Approach to Inverse Geoelectric Problem | 121 |
| <i>I. Belinskaya-Abnizova</i> | |

| | |
|---|-----|
| A Scalar BEM for Time Harmonic Eddy Current Problems with Impedance Boundary Conditions | 129 |
| <i>O. Sterz, C. Schwab</i> | |
| Appraisal of Asymptotics in Electromagnetic Field Calculations | 137 |
| <i>M.Kedde</i> (Thomson CSF Signaal), <i>P.-P. Borsboom</i> (Thomson CSF Signaal), <i>C.R. Traas</i> (University of Twente) | |
| Shape Optimization of Homogeneous Electromagnets | 145 |
| <i>D. Lukáš</i> | |
| Field Calculations of High Accuracy by BEM Using Extrapolation | 153 |
| <i>G. Martínez, R. Becker</i> | |
| Calculation of Electromagnetic Eigenmodes in Complex Structures Using Coupled S-Parameter Calculation | 161 |
| <i>K. Rothmund, H.-W. Glock, M. Borecky, U. van Rienen</i> | |
| Multigrid Solvers for Poisson's Equation in Computational Electromagnetics | 169 |
| <i>G. Pöplau, U. van Rienen</i> | |

II Circuit Analysis

| | |
|---|-----|
| Model Design Criteria for Integrated Circuits to Have a Unique Solution and Good Numerical Properties | 179 |
| <i>C. Tischendorf</i> | |
| CHORAL — A One Step Method as Numerical Low Pass Filter in Electrical Network Analysis | 199 |
| <i>M. Günther, P. Rentrop, U. Feldmann</i> | |
| Periodic Steady-State Analysis of Free-running Oscillators | 217 |
| <i>S.H.M.J. Houben, J.M. Maubach</i> | |
| Efficient Analysis of Oscillatory Circuits | 225 |
| <i>R. Neubert, A. Schwarz</i> | |
| Robust Limit Cycle Calculations of Oscillators | 233 |
| <i>S. Lampe, H.G. Brachtendorf, E.J.W. ter Maten, S.P. Onneweer, R. Laur</i> | |
| Multirate ROW Methods of Mixed Type for Circuit Simulation | 241 |
| <i>A. Bartel</i> | |
| Neural Networks for Device and Circuit Modelling | 251 |
| <i>P.B.L. Meijer</i> | |

| | |
|--|-----|
| Sub-micrometer Bipolar Transistor Modeling Using Neural Networks | 259 |
| <i>A. Plebe, A.M. Anile, S. Rinaudo</i> | |
| Numerical Simulation for Lossy Microwave Transmission Lines Including PML | 267 |
| <i>G. Hebermehl, F. Hübner, R. Schlundt T. Tischler, H. Zscheile, W. Heinrich</i> | |
| Electromagnetic Simulation of Real-Life Circuits: A Mobile Phone Power Amplifier Module and an FM Radio Tuner PCB | 277 |
| <i>J. Niehof, N.J. Pulsford, I. Lodema, J. Meeuwis</i> | |
| Error Indicator and Adaptive Meshing for Hierarchical FEM-Simulation of Waveguides | 285 |
| <i>M. Bludszuweit, M. Kasper</i> | |
| A Parallelizable GMRES-type Method for p -cyclic Matrices, with Applications in Circuit Simulation | 293 |
| <i>W. Bomhof, H.A. van der Vorst</i> | |
| Parallel Algorithms for Solving Linear Equations in VLSI Circuit Simulation | 301 |
| <i>H.K. Dirks, M. Fischer, J. Rüdiger</i> | |
| Investigation of Time Step Control for the Mixed-Level Device/Circuit Simulation of SiGe Bipolar Microwave Power Amplifiers | 309 |
| <i>M. Bartels, B. Meinerzhagen</i> | |
| Symmetrical Retarded Current Source Model for Transient Field Coupling on Interconnects | 317 |
| <i>M. Kurten, U. Keller, W. John, K. Meerkötter, H. Reichl</i> | |
| Iterative Solution of Systems of Linear Equations in Microwave Circuits Using a Block Quasi-Minimal Residual Algorithm | 325 |
| <i>R. Schlundt, G. Hebermehl, F.-K. Hübner, W. Heinrich, H. Zscheile</i> | |

III Coupled Problems

| | |
|--|-----|
| A Survey on Parameter Extraction Techniques for Coupling Electromagnetic Devices to Electric Circuits | 337 |
| <i>I. Munteanu, D. Ioan</i> | |
| A Mathematical Framework for the Finite Element Modelling of Electromechanical Problems | 359 |
| <i>F. Henrotte, K. Hameyer</i> | |

| | |
|--|-----|
| Dual Magnetodynamic Finite Element Formulations with Natural Definitions of Global Quantities for Electric Circuit Coupling | 367 |
| <i>P. Dular</i> | |
| Induction Heating of Thin Slabs in Nonmagnetic Media | 379 |
| <i>P. Šolín, I. Doležel, M. Škopek, B. Ulrych</i> | |
| Krylov Subspace Methods for Harmonic Balanced Finite Element Methods | 387 |
| <i>H. De Gersem, S. Vandewalle, K. Hameyer</i> | |
| The "Modified Trapezoidal Rule" (θ -Method) for the Integration of DAEs Modelling an Electro-Mechanical Drive Including External Circuitry and Magnetic Field-Distribution | 397 |
| <i>M. Klocke</i> | |
| Analysis of Coupled Electromagnetic and Thermal Fields in the Instationary Case | 407 |
| <i>O. Michelsson, G. Scheinert, F.H. Uhlmann</i> | |
| On the Evaluation of Transients in Conducting Ferromagnetic Cores . . | 417 |
| <i>R.V. Keer, L.R. Dupre, J.A.A. Melkebeek, Y.I. Moroz, S.E. Zirka</i> | |
