PREFACE	xiii
ACKNOWLEDGMENTS	xix
1 MODELS AND METHODS FOR MANAGING AIRLINE IRREGULAR OPERATIONS	
<i>Michael F. Argüello, Jonathan F. Bard, and Gang Yu</i>	1
1 Introduction	2
2 Problem Definition	5
3 Mathematical Representation	7
4 Time-Band Approximation	17
5 Randomized Search Heuristic	29
6 Preliminary Results	35
7 Conclusions	42
REFERENCES	44
2 A LARGE-SCALE NEURAL NETWORK FOR AIRLINE FORECASTING IN REVENUE MANAGEMENT	
<i>Xiaoyun (Sherry) Sun, Erik Brauner, and Sharon Homby</i>	46
1 Introduction	46
2 Choosing a Forecasting Model	48
3 The Specific Problem Statement	51
4 The BANKET Approach	52
5 BANKET Performance and Implementation	61
6 Conclusion	64
REFERENCES	65

3	A TUTORIAL ON OPTIMIZATION IN THE CONTEXT OF PERISHABLE-ASSET REVENUE MANAGEMENT PROBLEMS FOR THE AIRLINE INDUSTRY	
	<i>Lawrence R. Weatherford</i>	68
1	Definition and Taxonomy of Perishable Asset Revenue Man- agement Problems	69
2	Taxonomy	72
3	Seat Allocation Decisions for the Fare Classes	82
4	Overbooking	85
5	Heuristics that Deal with Customer Diversion or Sell-up	86
6	Single Flight Leg vs. Network Origin and Destination Approach	87
7	Optimal Pricing	94
8	Summary	97
	REFERENCES	98
4	A SELECTIVE MULTICOMMODITY NETWORK FLOW ALGORITHM FOR AIR TRAFFIC CONTROL	
	<i>Marcia P. Helme</i>	101
1	Introduction	101
2	Problem Description	102
3	Assumptions of the Basic Space-Time Network Model	108
4	Solution Method	114
5	Conclusions	121
	REFERENCES	121
5	A METHOD FOR OPTIMALLY SOLVING THE ROSTERING PROBLEM	
	<i>Michel Gamache and François Soumis</i>	124
1	INTRODUCTION	125
2	The Rostering Problem	127
3	Proposed Model	131
4	Computational Performance of the Algorithm	140
5	Productivity and Solution Quality	149
	REFERENCES	155

6	AN APPROACH FOR JUST-IN-TIME AIRLINE SCHEDULING	
	<i>Ira Gershkoff</i>	158
1	The Unsung Cost Problem	158
2	Airline Demand Economics	161
3	Approach to Just-in-Time Scheduling	164
4	Implementation Problems	178
5	Strategic Benefits of JIT Capacity Adjustments	181
6	Setting Up a Just-in-Time Scheduling Operation	184
7	Conclusions	187
7	AIRCRAFT GROUND MOVEMENT SIMULATION	
	<i>Dennis F.X. Mathaisel and Husni Idris</i>	189
1	Background	190
2	The GMS Host	193
3	Human Interfaces	212
4	The GMS Graphics Display	218
5	Underlying Network for Taxiways and Runways	221
6	Modes of Operation	225
7	Hardware and Software Considerations	226
	REFERENCES	226
8	CREW PAIRING OPTIMIZATION	
	<i>Erik Andersson, Efthymios Housos, Niklas Kohl, and Dag Wedelin</i>	228
1	Introduction to Crew Pairing Optimization	229
2	Review of Existing Optimization Methods	233
3	The Carmen Pairing Construction System	244
4	Practical Experience with the Carmen System	253
5	Conclusions and Future Developments	256
	REFERENCES	256
9	A DECISION SUPPORT FRAMEWORK FOR CREW MANAGEMENT DURING AIRLINE IRREGULAR OPERATIONS	
	<i>Mark Song, Guo Wei, and Gang Yu</i>	259

1	Introduction	260
2	Crew Legalities and Crew Pairing Repair	264
3	Model and Mathematical Formulation	266
4	Solution Methodology	271
5	Computational Experiences	277
6	Conclusion	285
	REFERENCES	286
10	THE USE OF OPTIMIZATION TO PERFORM AIR TRAFFIC FLOW MANAGEMENT	
	<i>Kenneth Lindsay, E. Andrew Boyd, George Booth, and Charles Harvey</i>	287
1	Introduction	288
2	The Traffic Flow Management (TFM) Problem	289
3	Recent TFM Optimization Models	292
4	The Time Assignment Model (TAM)	302
5	Summary and Conclusions	307
	REFERENCES	309
11	THE PROCESSES OF AIRLINE SYSTEM OPERATIONS CONTROL	
	<i>Seth C. Grandeau, Michael D. Clarke, and Dennis F.X. Mathaisel</i>	312
1	Introduction	313
2	The Four Phases of Airline Schedule Development	315
3	The Airline Operations Control Center (OCC)	320
4	Analysis of Operational Problems	331
5	Areas For Improvement	352
6	Case Study: PT Garuda Indonesia Airlines	357
	REFERENCES	368
12	THE COMPLEX CONFIGURATION MODEL	
	<i>Bruce W. Patty and Jim Diamond</i>	370
1	Introduction	370
2	Problem Description	371
3	Problem Formulation	375
4	Model Implementation	379

5	Summary	383
	REFERENCES	383

13 INTEGRATED AIRLINE SCHEDULE PLANNING

	<i>Cynthia Barnhart, Fang Lu, and Rajesh Shenoi</i>	384
1	Introduction	385
2	Fleet Assignment and Crew Pairing Problems: Existing Models and Algorithms	388
3	An Integrated Approximate Fleet Assignment and Crew Pairing Model	393
4	An Advanced Integrated Solution Approach	395
5	Case Study	396
6	Conclusions and Future Research Directions	399
	REFERENCES	401

14 AIRLINE SCHEDULE PERTURBATION PROBLEM: LANDING AND TAKEOFF WITH NONSPLITABLE RESOURCE FOR THE GROUND DELAY PROGRAM

	<i>Songjun Luo and Gang Yu</i>	404
1	Introduction	405
2	An Overview of the Airline Schedule Perturbation Problem	406
3	Literature Review	412
4	Preliminaries	414
5	Landing Assignment	418
6	Landing and Takeoff: Single Resource	425
7	Conclusions	429
	REFERENCES	431

15 AIRLINE SCHEDULE PERTURBATION PROBLEM: GROUND DELAY PROGRAM WITH SPLITABLE RESOURCES

	<i>Songjun Luo and Gang Yu</i>	433
1	Introduction	434
2	Minimizing Maximum Delay Among Out-flights	435

3	Minimizing the Number of Delayed Flights	437
4	Model Simplification, Valid Inequalities, and a Heuristic	446
5	Computational Experiments	449
6	Conclusions	454
	REFERENCES	459
