Preface **xix**

PART I --- **BASIC CONCEPTS** **1**

Chapter 1 **The Role of Marketing Research** **1**

Who Does Marketing Research? **2**

What Is Marketing Research? **3**

The Role of Marketing Research in A Business **4**

The Role of the Marketing Researcher Vis-A-Vis the Manager **4**

Statistics and Marketing Research **7**

How Companies Get Research Done **8**

What Research Does Not Do **9**

Forces Shaping Research **9**

1. Limited Budgets 9, 2. The “De-Siloing” of Business 9, 3. Information Technology 12

The Ethical and Legal Environment **12**

The Changing Nature of Marketing Research **13**

The International Perspective **17**

The Approach of This Book **17**

References **20**

Chapter 2 **The Value of Information** **21**

Introduction **21**

What Is Worth Researching **23**

Influences on Information Use **24**

The Value of Information for Decision Making **25**

Internal Validity	147, External Validity	149
<i>Design: Managerial Issues</i>	150	
Time Series Designs	151, Between versus Within Subjects	152
<i>Design: Basic Notions</i>	153	
<i>Formal Experimental Designs</i>	154	
Single-Factor Designs	155, Multiple-Factor Designs	157, Experiments and Complex Relationships
	159, Summary	159
<i>Laboratory Experiments</i>	161	
An Example	162	
<i>Field Experiments</i>	163	
<i>Natural Experiments</i>	163	
An Example	163	
<i>Quasi-Experiments</i>	165	
<i>Continuous (Adaptive) Experimentation</i>	165	
<i>Planning for Analysis</i>	166	
<i>Summary</i>	166	
<i>Problems</i>	166	
<i>References</i>	168	

Chapter 7

Survey Design 170

Content 170

Segmenting Variables 171, Product Category Variables 176, Brand Equity 177, Quality/Satisfaction 177, Customer Focus/Market Orientation 177, Summary 177

Writing Questions 178

Open- versus Closed-End Questions 178, Direct versus Indirect 179, Aided versus Unaided 180, Phraseology 181, Response Format 182, General Suggestions 183

Question Sequence 188

Placement of Hard Questions 188, Placement of Sensitive Questions 188, Variety of Format 189, Branching 189

Pretest and Revision 191

Coding the Questionnaire 191

Type of Survey 191

Personal Interviews 192, Telephone Interviews 194, Mail Surveys 195, Drop-off, Callback 197, Preexisting Panels 197, Group Interviews 199, Location Interviews 199, Information Highway Methods 199, Combination Of Methods 199

Fielding the Survey 199

Examples 200

Commercial Survey 200, Nutritional Survey 201, Ownership and Values Survey 202

Summary 202

- Problems* 203
References 203
Appendix 7-A: Market Facts Consumer Panel Basic Data 209
Appendix 7-B: Commercial Personal Interview Survey 212
Appendix 7-C: Nutritional Questionnaire 220
Appendix 7-D: Ownership and Values Survey 228
Products and Services 229, Background 232

Chapter 8

Measurement and Scaling 234

- Scales and Scale Types* 234
Nominal (Categorical) 235, Ordinal 235, Interval 235,
Ratio 236
- The Effect of Scale Type on Analysis* 236
Nominal Scales 236, Ordinal Scales 236, Interval Scales 236,
Ratio Scales 237
- Common Examples* 236
Nominal Scales 237, Ordinal Scales 239, Interval Scales 243,
Ratio Scales 247
- Practical Considerations* 248
- Basic Concepts of Measurement* 251
Reliability 251, Validity 254, Bias 256, Efficient 256, Consistent 256,
So What? 256
- Measurement Error* 257
Multidimensional Constructs 259
- Other Issues* 261
Noncomparative versus Comparative Measures 261, Individual versus
Aggregate 261, Direct versus Indirect Probing 262, Soft (Survey) versus Hard
(Observed) Data 263
- An Error Typology* 264
Researcher 265, Sample 265, Measurement Process 266, Instrument 267,
Respondent 268, Controlling Errors 270
- Summary* 270
Measurement Theory 270, Scale Types 271, Typical Scales 271, Sources
of Error 271
- Problems* 271
References 272
Appendix 8-A: Law of Comparative Judgment 276
Appendix 8-B: The Delphi Procedure 279
Appendix 8-C: Multitrait-Multimethod Matrix 280
Appendix 8-D: Normalizing and Standardizing 281
Normalizing 281, Standardizing 282, Applications 283

Decision Analysis and Information Value: Concept* 27**Decision Analysis* 28**

Example 29, Problems with Using Decision Trees 33, Sensitivity Analysis 36,
Summary 37

***Value of Information: Quantitative Assessment* 37**

Example 38, Problems in Assessing the Value of Information 40

Summary* 41**Problems* 43*****References* 46*****Appendix 2-A: An Example of Expected Information Value Calculations* 47**

Questions 48, Decision with No Further Information 48,
Expected Value of Perfect Information (EVPI) 49, Expected Value of
Additional Information (EVAI) 51, Some Comments on the Methodology 55

Chapter 3**The Research Process 58*****Problem Definition* 60*****Information Needs* 62*****Research Objectives* 63*****Type of Study* 63**

Stating Hypotheses 64, Existing versus New Data 65

***Data Collection Methods* 65**

Observation 65, Questioning 66, Simulation 66, Who Will Be Sampled 67,
Who Will Do The Work 67, How Much Will Be Spent 68

Analysis Plan* 68**Data Collection* 69*****Analysis and Interpretation* 69*****Drawing Conclusions* 71*****The Research Report* 71*****A Typical Approach* 72*****Examples* 74**

Example 1: Nutritional Knowledge 74, Example 2: The Impact of Price
Promotions on Coffee Purchases 74

Summary* 76**Problems* 76*****References* 77****Chapter 4****Sources of Information 78*****Internal Secondary Sources* 78**

Sales/Accounting Data 78, Customer Records 80

***External Secondary Sources* 81**

Trade Associations 81, General Business Publications 81, Academic
Publications 81, Annual Reports 81, Financial Analysts 82,

Government 82, Other Government Sources 84, Other Sources 86, Guides
and Indexes 86, The Internet 87

*Primary Data Sources 87**Informal 88**Qualitative 89*

Participant-Observer 90, Depth Interviews 90, Focus Groups 90

Observations 91

Scope of Observation 91, Degree of Control over the Setting 92, Direct versus Indirect Measurement 92, Observer (Human versus Mechanical) 92, Obtrusiveness of Observer (Known versus Hidden Observer) 93

*Surveys 93**Panels 94*

Continuous Reporting Panels 94, Special-Purpose Panels 95, Standby Panels 96, Scanner Panels 96

Experiments 97

Laboratory 97, Field 97

*Models/Simulations 98**Summary 98**Problems 98**References 99**Appendix 4-A: Research Suppliers 101*The Supplier Business 101, Selecting a Supplier 102, Quality Control 104
Data Sources 106, Summary 120, Problems 120, References 127**PART II**
DATA COLLECTION 130**Chapter 5****Qualitative Research 130***Focus Groups 130*

Role of the Moderator 131, Methodological Issues 131, Electronic Focus Groups 134, Summary 135

Observation and Analysis 135

Windows on Meaning 136, Consumer Contact 137

Depth Interviews 137

Laddering/Means-Ends Chains 137, An Example: The Zaltman Metaphor Elicitation Technique 138

*Summary 139**Problems 139**References 140***Chapter 6****Experiments 143***Basic Concepts 143**Establishing Causality 144**Experiments 147*

Chapter 9**X Sampling In Marketing Research 284*****Basic Issues 284******Who Is the Target Population? 285******What Method Will Be Used? 286******How Many Will Be Sampled? 286***

Statistical Precision 286, Credibility 292, Company Policy (Generally Accepted Practice) 292, Financial Constraints 292

Selection of Sample Points: Probability Samples 293Simple Random Sampling 293, *n*th Name (Systematic) Sampling 296, Stratified Sampling 297, Universal Sampling (Census) 297, Cluster Sampling 303, Replicated and Sequential Sampling 303, Nonprobability Sampling 304, Sources of Sampling Points 305, Screening Questions 306***The Problem of Nonresponse 307***

Response Bias 307, Determinants of Response Rate 309, The Problem of Dropouts 313, Weighting to Account for Nonresponse 314, Item Nonresponse 315

Sample Design Examples 315Random Digit Dialing 315, The *Literary Digest* Poll 315, The Nutrition Study 315, The Ownership and Values Survey 318***Summary 319******Problems 320******References 323******Appendix 9-A: Review of Probability and Statistics 325***

Probability Distribution 325, Summary Statistics 326, Commonly Used Distributions 327, Estimates and Truth 330

Chapter 10**Data Coding and Editing 335*****Designing a Data File 335******Rough Screening 336***

Dealing with Bad Data 337

Coding 338

Coding Questionnaires 338, Coding Secondary Data 342

Data Input 343

Code Book 344

Cleaning the Data 344

Cleaning Data Before Analysis 345, Dealing with Missing Responses During Analysis 346

Summary 348***Problems 349******References 350******Appendix 10-A: Nutritional Study Codebook 350***

PART III

ANALYTICAL METHODS 362

Chapter 11

X Basic Analysis 362

Scale Type and Analyses 363

Describing a Single Variable 365

Simple Tabulation 365, Graphical Display 366, Simple Calculations 366,
Standard Deviation 369

Comparing Variables 371

Plotting 371, Ranking 373, Indexing 373

Basic Analysis Examples 374

Relations Between Variables: Cross-Tabs 377

Two Variables 377, Highlighting Results 378, Checking for Statistical
Significance 379, Example 382, Multiway Tables 383, Cross-Tabs: Pros and
Cons 384

Correlation Coefficients 386

Pearson (Product-Moment) Correlation Coefficient 386, Correlation for Ranked
(Ordinal) Data 389

Data Adjustment Procedures 390

Recoding 390, Weighting for Unequal Response Rates 391

Summary 393

Problems 394

References 399

Appendix 11-A: Basic Analysis of Nutritional Habits Survey 400

Basic Results 400

Appendix 11-B: Sample Cross-Tab Output 417

Chapter 12

X Comparing Differences in Key Variables 420

The Notion of Statistical Inference 420

Tests Concerning One Sample, One Variable 422

Concept 422, Approach 422, Examples 423

Tests Concerning One Sample, One Percentage 425

Approach 425, Examples 426

Tests Concerning Two Means 426

Concept 426, Approach 427, Example 427

Matched Sample Tests 428

Sign Test 428, Paired Difference Test 429

Tests Concerning Two Percentages 430

Approach 430, Example 430

Tests Concerning Several Means: Anova 432

Motivation 432, Procedure 432

One-Way Anova 435

Formulas 435, Statistical Test 436, Numerical Example 436,
Interpretation 438

Two-Way Anova 439

Statistical Formulas: Unrelated Treatment Variables 440, Examples 441,
Managerial Interpretation 445

More General Anova 446

Analysis of Covariance 448

Multiple Dependent Variables 448

A Nutrition Example 448

Summary 450

Problems 451

References 456

Appendix 12-A: Sample Anova Output 456

Chapter 13

Regression Analysis 464

Simple (Two-Variable) Linear Regression Analysis 464

Basic Concept 464, Estimation 466, Interpretation 468, Two Examples of
Simple Linear Regression 472

Multiple Regression 474

Basic Concept 474, Estimation 474, General Interpretation 475, Statistical
Interpretation 476

Nutrition Survey Example 478

Overall Predictive Power 479, Key Determinants 481

Issues in Using Regression Analysis 482

Issues Affecting Estimation Quality 482, Issues Affecting the Model and Its
Interpretation 486

Some Uses of Regression Analysis 497

Forecasting 497, Segmentation 498, Parameter Estimation and Model
Evaluation 499

Causation versus Correlation 502

Simultaneous Causality 503

Making Regression Useful 505

Problems 506

References 508

Appendix 13-A: Hand Calculation 510

Appendix 13-B: Formula Derivation 511

General Linear Model 511

Appendix 13-C: Sample Regression Output 513

Appendix 13-D: Simultaneous Equation Regression 525

Problem 525, Method 525, Estimation 529

***Appendix 13-E: The Effect of Collinearity on the Standard Error of a Regression
Coefficient 530***

Two Independent Variables 530, Orthogonal and Nonorthogonal Designs 530

Appendix 13-F: Anova Regression 532

Systematic Effects of Sampling Points 533,

Appendix 13-G: Testing for Significant Improvement 537

Testing for the Significance of a Set of Variables 537, Testing for Differences
Across Segments 538

Chapter 14**Conjoint Analysis 540*****The Conjoint Model 540******A Numerical Example 541***

Uncovering Attribute Utilities from Overall Utility 542, Uses of Attribute Level
Utilities 543

Disjoint Analysis 545***Steps in Conjoint Analysis 546***

1. Determine Attributes and Attribute Levels 546, 2. Select Attribute Profiles to
Be Measured 546, 3. Choose a Method for Stimulus Representation 547,
4. Select a Response Method and Collect Data 548, 5. Choose a Method of
Data Analysis 548, 6. Analyze the Data 548, 7. Use the Results 549

Examples 549

Household Cleaner 549, Rechargeable Batteries 551

Actual Use of Conjoint 555***Pros and Cons 555******Choice-Based Conjoint 556******Recent Advances in Conjoint Analysis 558***

Latent Class Analysis 558, Consideration Sets in Conjoint Analysis 558

Summary 559***Problems 559******References 559******Appendix 14-A: Derivation of Attribute Utilities in Conjoint Analysis 561*****Chapter 15****Cluster Analysis 565*****Cluster Analysis Basics 565******Deciding Which Variables To Use as Bases for Clustering 567******Selecting Measures of Similarity 567***

Intervally Scaled Data 568, Categorical Data 572, Ordinal Data 573,
Ratio Scaled Data 574, Mixed Data 574

Choosing a Clustering Algorithm to Group Similar Objects 574

Partitioning Methods 555, Hierarchical Methods 575, Overlapping
Clusters 580, Choosing a Clustering Method 581, An Example: Breakfast
Foods 581

How Many Clusters? 583***Defining and Naming Clusters 585******Testing the Cluster System 586******Uses of Cluster Analysis 587***

Market Segmentation 589, Market Structure Analysis 589, Identifying Potential
Test Markets 588, General Data Reduction 588

The Pharmaceutical Example Revisited 590

Summary 590

Problems 591

References 591

Appendix 15-A: Sample SPSS Output 593

Appendix 15-B: Quick Clustering 598

Chapter 16

Factor Analysis 600

Basic Notion 600

The Factor Analysis Model 603

How Factor Analysis Works: Method and Application 604

1. Choose the Variables to Analyze (Manager) 604,
2. Obtain Data on the Variables (Manager) 605,
3. Develop a Correlation Matrix from the Data (Computer) 606,
4. Find Factors and Factor Loadings (Computer) 606,
5. Select the Appropriate Number of Factors (Manager/Computer) 610,
6. Modify the Initial Factor Analysis Solution (Computer) 611,
7. Use the Factors (Manager) 611

Other Examples 617

Nutritional Example 617, A Lifestyle Example 617, Fifty States Data Example 619

Confirmatory Factor Analysis 620

Summary 621

Problems 621

References 624

Appendix 16-A: Foundations of Factor Analysis 625

Appendix 16-B: Sources of Correlation and Segmentation 627

Chapter 17

Geometric Representation of Objects 629

Multidimensional Scaling 629

Input Data 630, Simple Space 630, Output 634, Some Semitechnical Issues 634, Some Examples 637, Representations of Alternatives and Individuals 640, Other Approaches 640

Attribute-Rating Based Maps 641

Attribute Identification 641, Deriving Positions of Alternatives on the Attributes 641, Factor Analysis 642, Discriminant Analysis 642, Derived-Distance-Based MDS 642

Brand Choice and Switching-Based Maps 647

MDS and Cluster Analysis 649

Using Maps 647

New Product Identification 647, Repositioning 648, Limitations 649,

Summary 649

Problems 650

References 652

Appendix 17-A: SAS ALSCAL on 50 States Data 654

Chapter 18**Discriminant Analysis 656***Two-Group Discriminant Analysis 657*

Basic Concept 657, The Discriminant Function 658, Using Discriminant Analysis: Basics 659, Statistical Aspects of Interpretation 662, Application Issues 664, Examples 664

Multiple-Group Discriminant Analysis 668

A Nutritional Example 669

*Product Mapping 672**Summary 675**Problems 675**References 677**Appendix 18-A: Technical Aspects of Discriminant Analysis 678*

The Discriminant Function 678, Optimal Classification 678, Using the Discriminant Function for Classification 680

*Appendix 18-B: Sample Discriminant Analysis Output 681**Appendix 18-C: Classification Functions and Discriminant Analysis 689**Appendix 18-D: Canonical Correlation 690***Chapter 19****Logit Models 691***Logistic Regression 695*

Basics 695, Fitting the Logistic Regression Model 697, Testing the Significance of the Coefficients 698, Interpreting the Coefficients 698, Assessing Fit 699, Application: Telecommunications Adoption 699, Application: Database Marketing and Credit Cards 700

Multinomial Logit Models 701

Multinomial Logit 701, Statistical Procedures 703, Application: Ground Caffeinated Coffee 703, A Limitation 705

*Summary 706**Problems 706**References 708**Appendix 19-A: Maximum Likelihood Estimator of the Binary Logit Model 709**Appendix 19-B: Least Squares Estimation of the Binary Logit Model 710**Appendix 19-C: Likelihood Method of Testing the Significance of Coefficients 711**Appendix 19-D: Choice Theory Development of the Logit Model 711**Appendix 19-E: Sample SPSS Output for Binary Logit Model 712***Chapter 20****Additional Data Analytic Techniques 716***Correspondence Analysis 716**Log-Linear Models 717**Nonparametric Regression 722*

Segmentation Trees 722, Neural Networks 728

Structural Equation Modeling 731
Latent Class Models 732
Summary 733
References 734
Appendix 20-A: Sample SPSS Output for Log-Linear Models 735

Chapter 21

Summary 739

Which Procedure Is Appropriate? 739

Why Use Multivariate Procedures? 739, A Typology 740

Typical Research Approaches to Common Marketing Problems 742

Uncovering Customers' Needs 742, Segmenting Markets 743, Profiling

Users 743, Predicting Group/Segment Membership 744, Portraying

Competitive Structure 744, Assessing Marketing Mix Effectiveness 744,

Evaluating New Concepts 745, Forecasting 745, Summary 745

Cumulating Knowledge from Past Studies: Meta-Analysis 746

Conduct 746, Use 748

Conclusion 748
