Preface	ix
Part One: Objectives	1
1 Understanding the objectives	3
1.1 Introduction	3
1.2 Conflicting objectives	4
1.3 False objectives	9
1.4 Risk exposure concepts	11
1.5 'Total cost' objectives	14
Part Two: The variables	19
2 Quantifying the factors	21
2.1 The art of estimating	22
2.2 Economic factors	26
3 Operating efficiency	28
3.1 Operating costs	29
3.2 Falling output	34
4 Reliability and risk	47
4.1 The bath-tub and other curves	48
4.2 Timescales and physical boundaries	58
4.3 Patch-and-continue events	63
4.4 Reliability and risk data	71
4.5 Curve-fitting	73
4.6 Summary	80
5 Cost estimating	85
5.1 Direct costs	86
5.2 Indirect costs	91
6 Deferring capital expenditure	106
6.1 Prolonging equipment life	106
6.2 Time value of money	110

7	Safety and legal constraints	114
7.1	The premium paid for compliance	115
7.2	Injuries and loss of life	118

10	Levels of improvement	136
10.1	Total impact estimate	139
10.2	Project payback	142
11	Rates of change	153
11.1	Deteriorating efficiency	154
11.2	Risks that change with time	160
11.3	Opportunities	168
11.4	Case study notes	169
12	Compromise decisions	181
12.1	Block maintenance	182
12.2	Hierarchical compromise	186
12.3	Lateral compromise	190
Part Four: Decision-making environments		195
13	Decision-making environments: the management cycle	197
13.1	Decision-making stages	198
14	The design phase	200
14.1	Project and design evaluation	201
14.2	DCF, NPV and all that	208
14.3	Initial maintenance strategies	215
14.4	Initial spares requirements	223

15	Operational problem-solving	243
15.1	Problem identification	244
15.2	Problem interpretation	248
15.3	Selecting and evaluating solutions	256
15.4	Condition monitoring	258
16	Organization and management	281
16.1	The culture change	281
16.2	Direction	284
16.3	Training	284
16.4	Co-ordination	285
16.5	Management support	292
16.6	Measuring the effect	294
	Bibliography	297
	Index	303
