

CONTENTS

Series Editor's Introduction 5

1. Introduction 7

The Analysis of Interaction Effects 8

A Review of Multiple Regression 15

Terminology 19

Overview of Book 19

2. Traditional Product Term Analysis 20

The Form of the Interaction 22

The Test for the Presence of an Interaction Effect 24

The Strength of the Effect 24

The Nature of the Effect 25

The Interpretation of Regression Coefficients 26

Simple Effects and "Interaction Comparison"

Analysis of Regression Coefficients 27

Levels of Measurement 28

Simple Transformations and Multicollinearity 30

A Numerical Example 31

3. Additional Issues with Traditional Product Term Analysis 33

Standardized Solutions 33

The Interpretation of Main Effects

in the Presence of a Significant Interaction 34

Power Analysis for Interaction Terms 35

Structural Equation Models 36

The Problem of Measurement Error 38

Interaction with Three Continuous Independent Variables 40

The Case of a Qualitative Moderator and a

Continuous Independent Variable 42

Alternative Approaches to Product-Term Analysis 48

4. More Complex Interactions 50

Nonlinear Relationships in

Multiple Regression: A Review 50

Effects as a Quadratic Function of a

Moderator Variable 55

Nonlinear Relationships and Interaction Analysis	59
Model Specification of Complex Interactions	62
Interaction Analysis of Complex Causal Models	63
Exploratory Analyses	64

5. Moderator Analysis of Correlation Coefficients 65

Correlations versus Slopes	66
Analysis of the Difference Between Independent Correlations	68
Analysis of Correlations Using the General Linear Model	70
Analysis of the Difference Between Dependent Correlations	72

6. Methodological and Substantive Issues 72

"False" Interaction Effects	73
Failure To Detect Interaction Effects	74
Ordinal and Disordinal Interactions	75
Concluding Comments	78

Appendix A

Computation of Standard Errors	80
--------------------------------	----

Appendix B

Computer Programs	81
BASIC Code	83

Notes 89
