Series Editor's Introduction ix

Acknowledgments xi

1. Introduction 1
   1.1. Types of longitudinal data 2
   1.2. Methods for analyzing event history data 3
   1.3. Missing data problems 5
   1.4. An outline of this book 7

2. Log-Linear Analysis 8
   2.1. Hierarchical log-linear models 9
   2.2. Sampling distributions 12
   2.3. Maximum likelihood estimation 14
   2.4. Model selection 19
   2.5. Non-hierarchical log-linear models 22
   2.6. Log-rate models or log-linear models with a weight vector 27
   2.7. Models with log-multiplicative effects 28
   2.8. Logit models and multinomial response models 31
   2.9. Causal log-linear models 35

3. Log-Linear Analysis With Latent Variables and Missing Data 46
   3.1. Latent variables 49
   3.2. Nonresponse 70

4. Event History Analysis 82
4.1. Why event history analysis? 83
4.2. Basic statistical concepts 87
4.3. Hazard rate models 91
4.4. Event history analysis using log-linear models 106
4.5. Censoring 117
4.6. Time-varying covariates, time, and time-covariate interactions 130
4.7. Different types of events 145
4.8. Multivariate hazard models 160

5. Event History Analysis With Latent Variables and Missing Data 181
5.1. General model 186
5.2. Unobserved heterogeneity 189
5.3. Measurement error 256
5.4. Partially missing data 274
5.5. Conclusions 290

A. Computation of the Log-Linear Parameters When Using the IPF Algorithm 293
A.1. Removing parameters from the estimated expected frequencies 293
A.2. Removing parameters from the cumulated multipliers 295

B. The Log-Linear Model as One of the Generalized Linear Models 297

C. The Newton-Raphson Algorithm 299
C.1. Log-linear models 299
C.2. Multinomial response models 300

D. The Uni-Dimensional Newton Algorithm 302
D.1. Log-linear models 302
D.2. Log-multiplicative models 304

E. Likelihood Equations for Modified Path Models 306
E.1. Multinomial logit model 306
E.2. Modified path model 308
E.3. Restricted modified path model 309

F. The Estimation of Conditional Probabilities Under Restrictions 312

G. The Information Matrix in Modified Path Models With Missing Data 316
