

# CONTENTS

<b>Authors</b>	vii
<b>Introduction</b>	xiii
Bruno Dupire of Nikko Financial Products	

## GENERALITIES

---

1	<b>Options: A Monte Carlo Approach</b>	5
	Phelim P. Boyle of University of Waterloo	
2	<b>Monte Carlo Methods for Security Pricing</b>	15
	Phelim P. Boyle of University of Waterloo, Mark Broadie and Paul Glasserman of Columbia University	
3	<b>Monte Carlo Toolkit</b>	45
	Bruno Dupire of Nikko Financial Products	

## PRICING

---

4	<b>Dimension Reduction and Other Ways of Speeding Monte Carlo Simulation</b>	51
	Bruno Dupire of Nikko Financial Products and Antoine Savine of General Re Financial Products	
5	<b>Average Intelligence</b>	65
	Edmond Levy of HSBC MIDLAND and Stuart Turnbull of Queens University, Canada	
6	<b>Beyond Average Intelligence</b>	73
	Michael Curran of RiskCare Ltd	
7	<b>Strata Gems</b>	75
	Michael Curran of RiskCare Ltd	
8	<b>Recovering Identity</b>	77
	Michael Curran of RiskCare Ltd	
9	<b>Greeks in Monte Carlo</b>	79
	Michael Curran of RiskCare Ltd	
10	<b>Quicker on the Curves</b>	81
	Les Clewlow of University of Warwick and Andrew Carverhill of University of Science and Technology, Hong Kong	
11	<b>Exact Exotics</b>	85
	Leif Andersen and Rupert Brotherton-Ratcliffe of General Re Financial Products	
12	<b>Monte Carlo Simulation of Options on Joint Minima and Maxima</b>	91
	Leif Andersen of General Re Financial Products	
13	<b>Model Calibration in the Monte Carlo Framework</b>	103
	Raphaël Douady of Ecole Normale Supérieure, CMLA	

## AMERICAN-STYLE

---

- |    |  |     |
|----|--|-----|
| 14 | <b>Valuing American Options in a Path-Simulation Model</b><br>James A. Tilley of Morgan Stanley  | 123 |
| 15 | <b>Numerical Valuation of High-Dimensional Multivariate American Securities</b><br>Jérôme Barraquand of Salomon Brothers International<br>and Didier Martineau of Long-Term Capital Management | 133 |
| 16 | <b>Monte Carlo Methods for Pricing High-Dimensional American Options: An Overview</b><br>Mark Broadie and Paul Glasserman of Columbia University   | 149 |

## FIXED INCOME

---

- |    |  |     |
|----|--|-----|
| 17 | <b>Pricing Interest Rate Exotics by Monte Carlo Simulation</b><br>Les Clewlow of Lacima Consultants Ltd, Warwick Business School and Chris Strickland of University of Technology, Sydney, Australia                 | 167 |
| 18 | <b>Efficient and Flexible Bond Option Valuation in the Heath, Jarrow and Morton Framework</b><br>Andrew Carverhill of Hong Kong University of Science and Technology and Kin Pang of Morgan Stanley Dean Witter & Co | 183 |
| 19 | <b>Term Structure Dynamics and Mortgage Valuation</b><br>Oren Cheyette of BARRA Inc  | 191 |

## VAR

---

- |    |  |     |
|----|--|-----|
| 20 | <b>Calculating Value-at-Risk with Monte Carlo Simulation</b><br>Evan Picoult of Citibank   | 209 |
| 21 | <b>Beyond VAR and Stress Testing</b><br>Julian Shaw of NatWest Markets   | 231 |
| 22 | <b>Using Non-Normal Monte Carlo Simulation to Compute Value-at-Risk</b><br>Gerald D. Quinlan of TrueRisk Inc                       | 245 |
| 23 | <b>Scrambled Nets for Value-at-Risk Calculations</b><br>Art Owen of Stanford University and Domingo Tavella of Align Risk Analysis | 255 |

## DETERMINISTIC METHODS

---

- |    |  |     |
|----|--|-----|
| 24 | <b>Quasi-Monte Carlo Methods in Numerical Finance</b><br>Corwin Joy of Positron Energy Consulting, Phelim P. Boyle and Ken Seng Tan of University of Waterloo  | 269 |
| 25 | <b>New Methodologies for Valuing Derivatives</b><br>Spassimir H. Paskov of Barclays Capital  | 281 |
| 26 | <b>Valuation of Mortgage-Backed Securities Using Brownian Bridges to Reduce Effective Dimension</b><br>Russel E. Caflisch of UCLA, William Morokoff of Goldman Sachs and Art Owen of Stanford University | 301 |
| 27 | <b>Smoothness and Dimension Reduction in Quasi-Monte Carlo Methods</b><br>Bradley Moskowitz of Bettis Laboratory and Russel E. Caflisch of UCLA  | 315 |
| 28 | <b>Beating Monte Carlo</b><br>Anargyros Papageorgiou and Joseph Traub of Columbia University   | 327 |
| 29 | <b>Monte Carlo Motoring</b><br>Rupert Brotherton-Ratcliffe of General Re Financial Products  | 331 |
| 30 | <b>Laudable Lattices</b><br>Craig Stetson of Arizona Public Service, Steve Marshall and David Loebell of Chase Manhattan   | 335 |
| 31 | <b>Inelegant Efficiency</b><br>John Barrett and Gerald Moore of Imperial College and Paul Wilmott of Imperial College and University of Oxford   | 339 |

- |  |                                      |     |
|--|--------------------------------------|-----|
|  | <b>Glossary of Monte Carlo terms</b> | 343 |
|--|--------------------------------------|-----|
