

Contents

1. An Introduction, and a First Summary	I
1. <i>Accounting for change in social and economic structure</i>	1
2. <i>The three convergences</i>	4
3. <i>Why the regularities?</i>	8
4. <i>Time-use theory and time-use evidence</i>	11
5. <i>A cross-national comparative time-use dataset</i>	13
2. Work and Leisure: Historical Change in the Conditions of Life	16
1. <i>Bloomsday: the extraordinary significance of the mundane</i>	16
2. <i>Time and development</i>	19
3. <i>The interdependence of production and consumption time</i>	21
4. <i>The logic of progress</i>	28
5. <i>High- and low-value services, production, and consumption</i>	33
3. Are We Running Out of Time?	46
1. <i>Two views of leisure and development</i>	46
2. <i>A current thesis: the end of leisure</i>	50
3. <i>Antithesis: growth and leisure</i>	58
4. <i>Synthesis: a changing class distribution of leisure time?</i>	69
4. The Individual's and the Society's Day: Micro- and Macro-Theories of Time Use	76
1. <i>Preliminary remarks</i>	76
2. <i>Determining daily events: microsequential theory</i>	84
3. <i>Allocating time: micro-aggregate theory</i>	93
4. <i>Balancing time: macro-theory</i>	97
5. <i>A summary</i>	100
5. The History and Future of Time Use: Empirical Evidence	105
1. <i>A multinational longitudinal time-diary data collection</i>	105
2. <i>Economic development and change in work and leisure time</i>	110
3. <i>Behavioural vs. structural change</i>	117
4. <i>The work-leisure balance</i>	131

6. Explaining Time Use	137
1. <i>National differences and historical change</i>	137
2. <i>The elements of the models</i>	141
3. <i>Decomposing variance</i>	150
4. <i>Conclusions</i>	157
7. A Concise Atlas of Time Use: Twenty Countries, Thirty-three Years' Change	160
1. <i>The principle of the conservation of the day</i>	160
2. <i>Four sorts of time use</i>	171
3. <i>A whole-world summary: the virtuous triangle revisited</i>	219
8. Time-Use Models of Economic Development	222
1. <i>Three final models</i>	222
2. <i>An empirical estimation</i>	223
3. <i>Welfare and change in time allocation: the UK case</i>	229
4. <i>Time use and welfare: the nature of social improvement</i>	231
5. <i>Technological innovation and change in a society's time budget: a two-class, two-good demonstration</i>	236
9. Humane Modernization	242
1. <i>Time use and 'progress'</i>	242
2. <i>Public policy for humane modernization</i>	243
3. <i>Liberty, equality—or fraternity</i>	247
Appendix 1. Telling the Time: Some Reflections on Time-Diary Methodology	249
1. <i>Estimating time use: two experiments</i>	249
2. <i>Narratives: telling the day</i>	253
3. <i>Constructing the diary</i>	255
Appendix 2. A Longitudinal, Multinational Collection of Time-Use Data—the MTUS (by Jonathan Gershuny, Kimberly Fisher, Anne Gauthier, Sally Jones, and Patrick Baert)	270
1. <i>The MTUS project</i>	270
2. <i>Methodological choices in time-budget research</i>	272
3. <i>A summary codebook for WORLD 5.5</i>	287
