

Contents

Dedication	v
Preface	xix
1: The Basics of Options	1
Introduction	1
Why Options exist	2
The Two Kinds of Options	3
Definitions	4
Explanation of Contract Terms	6
Disposition of Option Contracts	8
Exercise and Assignment of Options	11
Why Options are tied to the Underlying Market	12
Profit/Loss Profiles	14
Options as the “Good” and “Bad” Features of the Underlying Asset	15
Splitting a Short Underlying Position into “Good” and “Bad” Parts	17
2: Basic Concepts in Options Pricing	23
In-the-money	24
At-the-money	25
Out-of-the-money	25
The Fundamental Components of an Options Price	25
Intrinsic Value	26
Determining the Time Value	27
The Black and Scholes Model	27
Stochastic Dominance Arguments	28
Assumptions of the Black and Scholes Model	30
European versus American Call Option Prices	33
How Time Value is Estimated from the Black and Scholes Model	34
The Key Element in the Estimation of Time Value	41
from the Black and Scholes Formula	41
Effects of Time on the Price of an Option	42
The Implications of the Lognormal Distribution	45
The Impact of Volatility on the Price of an Option	45
How Volatility is Measured	46

Historical Volatility	46
Implied Volatility	47
Forecasted Volatility	48
Impact of Changing Volatility on the Price of a Call Option	48
Impacts of Interest Rates and Dividend on Options	50
Appendix to Chapter 2: Derivation of the Black and Scholes Formula	51
3: Advanced Concepts in Options Pricing	55
The Role Option Pricing Models Play in Option Evaluation	56
Option Derivatives Compared to Aeroplane Gauges	57
The Delta Concept	57
Delta as the Measure of Relative Change to the Underlying Asset	58
Delta as the Sloped Relationship between the Option Price and the Price of the Underlying Asset	58
Delta as the Measure of Relative Risk of the Option to a Buying Position in the Underlying Market	60
Delta as the Probability that the Option will Finish In-the-Money at Expiration	61
Uses of Delta	61
Delta Exposures of the Basic Strategies	62
The Concept of Delta Neutral	63
The Problem with the Delta	65
The Concept of Gamma	66
The Measure of Volatility Exposure - The Vega	69
The Exposure of the Option to Time Decay - The Theta	70
The Sensitivity of Options to Interest Rates - The Rho	72
The Gearing of an Option to the Underlying - The Lambda	73
The Appropriate Pricing Models for Options on Foreign Exchange	74
European Options on Spot Currency	74
European Options on Currency Forwards	76
American Options on Foreign Exchange	77
Formulae for the Derivatives of the Currency Option Pricing Models	81
Put-Call Parity : The Fundamental Arbitrage Relationship	83
Using Put-Call Parity to Create Synthetic Securities	84
The "Magic" Graphing Rules and Put-Call Parity	86
The Effects of Interest Rates on Options Prices	89
4: Volatility Estimation	95
Introduction to Volatility Analysis	95
Estimation of the Normal Distribution	99
Problems in Financial Markets with Normal Distributions	104
The Random Walk Hypothesis	105
Volatility as the Standard Deviation	111

The Types of Volatility	113
Estimation of Volatility Historically	114
Methods of Determining Asset Returns	114
Example of Historical Volatility Estimation	117
Sources of Error in the Volatility Estimate	118
Data Frequency for Estimation of Historical Volatility	120
The Impacts of Economic Days on the Historical Volatility	124
Sample Period for the Estimation of the Historical Volatility	131
Which Prices Should be Used for the Estimation of Volatility	133
Estimation of Seasonal Volatility	134
Estimation of the Implied Volatility	139
Assumptions of the Option Pricing Models	140
Techniques for the Determination of Implied Volatility	142
Weighting of Implied Volatilities to Determine a Composite Estimate	147
5: Advanced Issues in Volatility Estimation	153
The Volatility Matrix	154
Volatility Smiles for Various Markets	157
Analysis of the Smile Pattern for the FTSE	157
Analysis of the Smile Pattern for US Dollar/Deutsche Mark	158
Analysis of the Smile Pattern for US Interest Rates	160
The Construction of the Volatility Matrix for BTP Options	162
Implications for the Existence of Smiles	170
The Term Structure of Volatility	172
Non Stationarity in the Price Series	174
Non Uniformity of Volatility	175
Mean Reversion of Volatility Back to some Average	177
Corrections for the Smile and Term Structure of Volatility	178
The Volatility Cone	179
The Super Model for the Pricing of Options	186
Estimation of Forward Volatilities	190
6: Directional Trading Strategies	195
Possible Viewpoints for the Underlying and Volatility	196
Three Ways to Benefit from an Increase in the Underlying Market	197
Buying a Crude Oil Futures Contract	198
Buying a Call Option on Crude Oil Futures	199
Buying Calls versus a Stop Loss Strategy with Long Futures	201
Selling a Put Option on Crude Oil Futures	203
Comparison of the Bullish Strategies	206
Three Ways to Benefit from a Decrease in the Underlying Market	207
Selling a Crude Oil Futures Contract	208
Buying a Put Option on Crude Oil Futures	209

Selling a Call Option on Crude Oil Futures	211
Comparison of the Bearish Strategies	214
Vertical Spreads	215
The Bull Vertical Spread	215
Time Decay and Volatility Sensitivities of a Bull Spread	219
The Bear Vertical Spread	221
Directional Trading Strategies Placement in the Strategy Matrix	224
7: Volatility Trading Strategies	227
How to Make Money from a Change in Volatility	228
The "Pure" Buying Volatility Strategies	232
Buying a Straddle	232
Buying a Strangle	236
Where Long Straddle and Strangles Fit in the Strategy Matrix	240
Leaning Volatility Buying Strategies: Ratio Back Spreads	241
Call Ratio Back Spreads: the Call-Back	241
The Put Ratio Back Spread: The Put-back	245
Where Back Spreads Fit in the Strategy Matrix	248
The "Pure" Selling Volatility Strategies	249
Selling the Straddle	250
Selling the Strangle	254
Buying a Butterfly Spread	258
Buying a Condor Spread	262
Comparison of the Pure Volatility Selling Strategies	266
Where Pure Volatility Selling Strategies Fit into the Strategy Matrix	267
Leaning Volatility Selling Strategies: The Ratio Spreads	267
The Put Ratio Spread	267
The Call Ratio Spread	271
Where Ratio Spreads Fit into the Strategy Matrix	274
The Difference Between Trading Futures and Options	275
8: Option Arbitrage	277
The Types of Arbitrage Strategies	278
Calendar Spreads	278
Long Calendar Spreads	279
Short Calendar Spreads	286
Comparison of all the Volatility Sensitive Strategies	289
Delta Neutral Trading	291
Pure Arbitrage Strategies	298
Practical Applications of Synthetic Transactions	300
The Conversion Arbitrage Strategy	302
The Reversal Arbitrage Strategy	305
The Box Arbitrage Strategy	306

Jelly Roll Arbitrage Strategies	309
Where the Arbitrage Strategies Fit in the Strategy Matrix	316
9: Trading Options Between Markets	319
Inter-Market Trading Strategies in Futures Markets	319
Measuring the Relationship Between Markets - The Correlation Coefficient	320
Inter-market Directional Strategies Using Options	325
The Inter-market Volatility Relationship	329
A Pricing Model for Assessing Intermarket Options Relationships	333
The Concept of the Implied Correlation	337
Application of the Correlation Coefficient in Pricing Cross Currency Options	338
Trading the Volatilities of Stock Options and Stock Index Options	339
The R squared Method for Comparing Stock and Stock Index Volatilities	340
Options on the Spreads Between Markets	347
10: Option Hedging Strategies	355
The Basic Considerations in Designing a Hedging Strategy	356
Market Conditions: 11 July 1994	357
The Relationship Between US. Treasury Bonds and T-Bond Futures	358
Hedging Example 1: Buying T-Bond Futures	
versus Buying Call Options to Hedge a US. Treasury Bond Purchase	361
Hedge Ratio Determination	362
T-Bond Futures Hedge Result	363
T-Bond Call Options Hedge Result	365
Comparison of T-Bond Futures and Call Options Hedges	
if the Cash Market Exposure does not Materialise	368
The Impact of the Open T-Bond Futures Contracts	368
The Impact of the Open Call Option Positions	369
Comparison of T-Bond Futures and T-Bond Options Impacts	370
Hedging Example 2: Buying a Put Option on T-Bond Futures	
to Protect the Value of a US. Treasury Bond	371
Complications of Using Options on T-Bond Futures	
to Hedge a US. Treasury Bond	372
Choosing At-the-Money or Out-of-the-Money Puts	373
Hedge Ratio Determination	373
Conversion of the Option on T-Bond Futures	
to an Option on the US. Treasury Bond	374
Hedge Results of the Put Purchase	374
Hedging Example 3: Selling Call Options on T-Bond Futures	
Against a US. Treasury Bond to Reduce Risk and Enhance Returns	375
The Choice of the Call Option Strike Price to Sell	376
Hedge Ratio Determination	377
Result of the Covered Call Hedging Strategy	377

The Risks of the Covered Call Hedging Strategy	379
Performance of the Covered Call Hedging Strategy	379
Hedging Example 4: Selling Put Options in Anticipation of the Purchase of a US. Treasury Bonds	383
Results of the Cash Secured Put Writing Hedging Strategy	383
Summary	385
11: Option Portfolio Application	387
Basics of Stock Indices	388
Stock Index Futures Contracts	389
Options on Stock Index Futures Contracts	390
Options on Stock Indices	390
The 90/10 Money Market Strategy	391
The 90/10 Plus Strategy for Option with Futures Style Margining	393
Result of the 90/10 Call Option Buying Strategy	394
The Zero Cost Options Hedging Strategy	398
Zero Cost Option Hedging Strategy with Options on the S&P 100	400
Comparison of the Zero Cost Options Hedge with a Futures Hedge	401
Portfolio Insurance	403
Basic Concepts in Portfolio Theory	403
The Foundations of Portfolio Insurance	404
The Relationship between Portfolio Insurance and Options	408
Reasons for the Use of Portfolio Insurance	408
Portfolio Insurance with Stock Index Futures	409
Portfolio Insurance with Put Options on S&P 500 Futures	410
Cost Comparisons of Various Portfolio Insurance Techniques	411
The Fallacy of Delta Hedging a Stock Portfolio	411
How Options Impact the Beta of a Portfolio	413
Comparison of Alternative Hedging Strategies for Holder of Stock Portfolio	418
12: OTC Interest Rate Options	423
OTC Options on Bonds	424
Examples of Applications for OTC Bond Options	425
Pricing of OTC Bond Options	426
Estimation of the Volatility Input for Options on Bonds	431
Issues in the Pricing of OTC Options on Bonds	432
Steps Involved in Pricing an OTC Option on Bonds	432
Why Actual OTC Option Prices Differ from Theoretical Values	435
Credit Risk Implications of OTC Options	437
Impacts of OTC Bond Options on Bond Duration & Convexity	438
Interest Rate Guarantee Agreements	440
Interest Rate Ceiling, Floor and Collar Agreements	442
Pricing of the Ceiling Rate Agreement	445

Hedging a Ceiling Rate Agreement with Eurodollar Futures & Options	447
Risks of the Hedged Positions	448
Options on Interest Rate Swaps	451
The Structure of Swaption Agreements	451
Swaptions vs. Interest Rate Cap Agreements	453
The Logic Underlying Swaption Pricing	453
Present Market Conventions for Swaption Pricing	456
Conclusion for OTC Options on Interest Rates	458
13: Exotic Options	461
General Approaches to Pricing Exotic Options	463
The Analytic Models	463
The Numerical Models	463
Monte Carlo Simulation Models	464
Options Which Allow the Holder to Buy or Sell Another Option	464
Compound Options on Cap Rate Agreements: Captions And Floptions	467
Options Which Vary the Standard Terms of Normal Options	470
Bermudan Option	470
Applications of the Bermudan Option	470
Pricing of the Bermudan Option	471
Digital/Binary Options	471
Applications of the Digital Option	472
Pricing of the Digital Option	473
Pay Later Options	474
Applications of the Pay Later Option	475
Pricing of the Pay Later Option	475
Delayed Options	475
Applications of the Delayed Option	475
Pricing of the Delayed Option	476
Chooser Option	477
Applications of the Chooser Option	477
Pricing of the Chooser Option	478
Power Option	479
Applications of the Power Option	481
Pricing of the Power Option	481
Path-Dependent Options	481
Average Rate Options - The "Asian" Style Option	482
Applications of the Average Rate Option	482
Pricing of the Average Rate Option	482
Average Strike Option	484
Applications of the Average Strike Option	485
Comparison of Average Rate and Average Strike Price Options	485
Maximum/Minimum Options - The "Look Back" Option	486

Potential Uses for "Look Back" Options	487
Pricing of "Look Back" Options	487
Pricing the "Strike-Bonus" Option	488
Cliquet or Ratchet Option	489
Applications of the Ratchet Option	490
Pricing of the Ratchet Option	490
Ladder Option	490
Applications of the Ladder Option	491
Pricing of the Ladder Option	491
Shout Option	492
Applications of the Shout Option	492
Pricing of the Shout Option	493
Barrier/Knock Out Option	493
Applications of the Knockout Option	494
Pricing of the Knockout Option	495
Multi-Factor Options	496
Rainbow Option	496
Applications of the Rainbow Option	496
Pricing of the Rainbow Option	497
Basket Option	497
Applications of the Basket Option	497
Pricing of the Basket Option	497
Spread Option	498
Quanto	498
Applications of the Quanto Option	498
Pricing of the Quanto Option	499
Conclusion	501
14: Risk Management of Options	503
A Brief History of Option Markets	503
Why Options Markets Have Grown Exponentially Since the 1970s	503
An Option Risk Analysis Computer Programme	504
Contract Definitions in the Program	505
Adding Expiration Dates and Strike Prices into the Program	508
A Live Cattle Option Sample Trade Entry Spreadsheet	508
Entry of a Sample Portfolio of Live Cattle Options into the Spreadsheet	510
Comparison of Market Prices with Theoretical Prices	511
Comparison of Gamma Values Across Strike Prices and Maturities	512
Determination of the Implied Volatility	513
Evaluating the Risks of the Option Portfolio	515
Graphing the Risks of the Option Portfolio	517
Applications of Computer Risk Analysis Programs to the Management of Options Portfolios by Market Makers	522

Daily Risk Management Issues	522
Risk Control of Option Books	523
Using Computer Risk Analysis Programs to Choose the Best Strategy	524
15: Structure of Exchange Traded Options Markets	533
The Clearing House and Its Role	533
The Mechanisms of Margining	534
The Margining of Options at a Typical Options Market	537
Structure of Different Option Markets World-Wide	537
The Philadelphia Stock Exchange	538
Background	538
Membership	538
Clearing	539
Margin Requirements	540
Summary	540
The European Options Exchange	540
Background	540
Membership	540
Clearing	541
Margin Requirements	542
Exercise Procedure	542
Delivery of and Payment for Underlying Value	543
Clearing Fund	543
Summary	543
The Stockholm Options Market (OM)	543
Background	543
Ownership	544
Organisation of Trading	544
The Electronic Market System	544
The Broker Function	545
Clearing	545
Margin Requirements	545
Delivery Capacity	546
Reporting of Deals Closed	546
Summary	546
The Chicago Mercantile Exchange	546
Background	546
Function of the Exchange	547
Organisation of Trading	547
Clearing	548
Performance Bond (Margin)	548
Daily Settlement	548
Summary	549

The Span System Explained	549
How the Risk Arrays are Constructed	551
Examples of Span Initial Margin Calculations	551
The Variation Margin	553
16: Accounting, Regulation and Taxation Issues for Options	555
Regulations: A Global Survey	555
Australia	555
