FIGURES AND TABLES

FIGURES

0-1. Overview: The processes of change examined in this book	6
1-1. Cultural differences are relatively enduring, but not immutable	26
1-2. Mean life satisfaction by level of economic development	32
1-3. Interpersonal trust among European publics, 1976–1986	35
1-4. Economic development and interpersonal trust	37
1-5. Mean life satisfaction and stable democracy	42
1-6. Economic and cultural prerequisites of stable democracy	43
1-7. Political integration of women at elite level by historically dominant religious tradition	52
1-8. Long-term economic consequences of rise of Protestant Ethic	54
1-9. Economic development and the decline of Materialist values	58
1-10. Materialist values and economic growth, 1965–1984	59
2-1. Value type by age group, among the combined publics of Britain, France, West Germany, Italy, Belgium, and the Netherlands in 1970	76
2-2. Cohort effects only	80
2-3. Cohort effects plus period effects	81
2-4. Life cycle effects only	81
2-5. Value priorities of eight age cohorts across six West European publics, 1970–1988	85
2-6. Value priorities of seven age cohorts and mean inflation rates across six West European countries, 1970–1987	94
2-7. Percentage of Postmaterialists minus percentage of Materialists in combined sample of six West European publics, 1970–1971 through 1984	100
2-8. Projected percentage of Postmaterialists minus percentage of Materialists for six West European publics in 1990, 1995, and 2000	102
3-1. Three models of continuity and change in mass attitudes	109
3-2. Value stability in three-nation sample	121
3-3. Value stability in the United States	122
3-4. Value stability in the Netherlands	123
3-5. Value stability in West Germany	124
3-6. Latent attitudes model's expected stability of Materialist/Postmaterialist values over various time intervals and observed stability over the same intervals	125
4-1. Items used in the twelve-item battery and needs they were intended to tap	134
4-2. The Materialist/Postmaterialist values dimension in 1973 and 1978	140
4-3. Structure of value priorities of nine Western publics, 1973	143
5-1. Job goals by value type	170

5-2. Value-based differences in respondents' education, occupational prestige, and income	171
5-3. Economic achievement by value priorities and education among those born since 1945	172
5-4. Economic achievement by value priorities and respondent's father's educational level	174
6-1. Attitudes toward homosexuality by value priorities of given publics	207
6-2. Divorce rates by value priorities of given publics	208
6-3. Fertility rates by value priorities of given publics	209
6-4. Illegitimacy rates by value priorities of given publics	210
7-1. The distribution of overall life satisfaction and happiness among West European publics, 1973-1983	219
8-1. The diminishing marginal utility of economic determinism	249
8-2. Economic development and income equality	251
8-3. Support for the classic economic policies of the Left by level of economic development, 1979-1983	256
8-4. The trend in social class-based voting in five Western democracies, 1947-1987	260
8-5. Percentage voting for political parties of the Right or Center by value type among combined publics of Britain, France, Italy, West Germany, and the Netherlands, 1970-1985	262
8-6. Ideological location of the potential electorates for major political parties	276
8-7. Percentage planning to vote for Communist party by age cohort, 1973-1987	282
9-1. Correlates of issue positions taken by candidates of sixty-six parties from nine West European countries	301
9-2. The impact of religion, social class, and values on three types of political polarization	309
9-3. Impact of formative security and values in 1974 on protest potential in 1980	317
9-4. Balance between Materialist and Postmaterialist value priorities among West German elites and West German public	324
9-5. Balance between Materialist and Postmaterialist value priorities among elites and public in the United States, 1987	327
10-1. Political discussion rates by level of economic development	343
10-2. Percentage who "frequently" or "occasionally" discuss politics by birth cohort, 1973-1987	347
10-3. The shrinking gender gap: political discussion rates among men and women born in the years indicated	350
10-4. Percentage who discuss politics in eight nations, 1973-1987	354
10-5. Strength of partisan loyalties by age cohort, 1976-1987	356
10-6. Percentage "high" on cognitive mobilization by age cohort, 1973-1987	360

10-7. Unconventional political participation by cognitive mobilization and value type	362
10-8. Political mobilization typology	363
11-1. Percentage voting for parties of the Right and Center (Christian Democrats, Conservatives, Liberals, etc.) by value type and level of cognitive mobilization	375
11-2. Percentage voting for traditional Left parties (Communists, Socialists, and Social Democrats) by value type and level of cognitive mobilization	376
11-3. Percentage voting for New Politics parties (New Left, ecologist, and ethnic parties) by value type and level of cognitive mobilization	377
11-4. Linkage of attitudes and behavior toward new social movements with cognitive mobilization, Left-Right ideological self-placement, and Materialist/Postmaterialist values	386
12-1. Trust ratings of thirteen nationalities by the publics of nine European Community nations, 1976	400
12-2. Trust ratings of thirteen nationalities by the publics of nine European Community nations, 1986	401
12-3. Trust in various nationalities by value type	403
12-4. The four superpowers: relative size of economic base and population of United States, European Community, Soviet Union, and Japan in 1986	416
12-5. Percentage "for" efforts to unify Western Europe, 1952-1987	418
A-1. Satisfaction with the way democracy is working in one's own nation in six nations, 1973-1986	435
A-2. Materialist/Postmaterialist values from 1970 to 1986 among the combined publics of six West European nations: birth cohort analysis	436
A-3. Materialist/Postmaterialist values from 1970 to 1986 among the combined publics of six West European publics: life stage analysis	436
A-4. Impact of formative security and values in 1974 on protest potential in 1981: United States panel	437
A-5. Impact of formative security and values in 1974 on protest potential in 1980: Netherlands panel	437
A-6. Impact of formative security and values in 1974 on protest potential in 1980: West German panel	438

TABLES

1-1. Support for Radical Change, Gradual Reform, or Defense of Present Society in Twenty-two Societies, 1981-1982	39
1-2. Politicization of Women in Twenty-one Societies by Predominant Religion	51
1-3. Economic Growth Rates in Protestant Countries, as Compared with Catholic Countries and Japan, 1870-1984	60
2-1. Cohort Analysis: Annual Percentages of Japanese Cohorts Agreeing that Financial Security is Most Important	73

2-2. Impact of Life Cycle Effects and Cohort Effects on Values: Multiple Classification Analysis	89
2-3. Distribution of Materialist and Postmaterialist Value Types by Age Cohort in Twelve Nations, 1970–1986	91
2-4. Distribution of Materialist and Postmaterialist Value Types by Age Cohort in Twelve Western Nations, 1986–1987	93
2-5. Value Priorities and Inflation Rates among Six Western Publics, 1970–1987	95
2-6. Priorities of Western Publics: 1973 Versus 1988	98
3-1. Stability of Values from 1974 to 1981 among American Public	118
3-2. Ranking of Personal Values among American Public, 1968–1981	119
4-1. The Materialist/Postmaterialist Factor in Ten Countries, 1973	136
4-2. The Materialist/Postmaterialist Factor in the United States, 1974	138
4-3. The Materialist/Postmaterialist Factor in Nine Nations, 1978	139
4-4. The Value Priorities of Candidates to the European Parliament: The “Materialist/Postmaterialist” and “Cities and Crime” Dimensions	141
4-5. Emphasis on Money as “Most Important Thing to Teach a Child” among Japanese and American Publics	147
4-6. Societal Priorities among Western Publics and Japanese Public	149
4-7. Job Values in Japan, the United States, and Western Europe	151
4-8. Two Dimensions of Values in Hong Kong, 1984	154
4-9. Two Dimensions of Values in People’s Republic of China, 1984	155
4-10. The Materialist/Postmaterialist Dimension in Poland, 1980	158
5-1. Occupational Prestige Level by Value Type	163
5-2. Respondent’s Occupation by Value Type in Fifteen Nations	164
5-3. Educational Level by Value Type	165
5-4. Value Type by Socioeconomic Status of Respondent and Respondent’s Father	166
5-5. Postmaterialists as Economic Underachievers: High Incomes among Those Born since 1945 and Whose Education Continued Past Age 20	173
6-1. Acceptance/Rejection of Traditional Judaeo-Christian Values	183
6-2. Perceived Importance of God by Value Type and Country	186
6-3. Perceived Importance of God by Age Group	188
6-4. Belief in God by Age Group and Country	190
6-5. Religiosity by Age Group and Country	191
6-6. Religious Attitudes by Value Type	192
6-7. Frequency of Thinking about the Meaning of Life by Value Type and Country	193
6-8. Rejection of Homosexuality by Age Group	194
6-9. Rejection of Homosexuality by Value Type	196
6-10. Moral and Social Attitudes by Value Type	196
6-11. Percentage Saying “Divorce Can <i>Never</i> Be Justified” by Age Group and Country	197
6-12. Percentage Saying “A Woman Needs Children in Order to Be Fulfilled” by Age Group and Country	198

6-13. Attitudes Toward Childbearing by Value Type	199
6-14. Church Attendance in Sixteen Societies by Age Group	200
6-15. External Symptoms of Cultural Change: Birth Rates, Illegitimate Birth Rates, and Divorce Rates, 1960-1985	202
7-1. Life Satisfaction by Gender in Sixteen Advanced Industrial Societies, 1980-1986	221
7-2. Happiness by Gender in Advanced Industrial Societies, 1980-1986	222
7-3. Life Satisfaction by Age Group in Advanced Industrial Societies, 1980-1986	224
7-4. Happiness by Age Group	225
7-5. Overall Life Satisfaction and Happiness by Age Group, Adjusted for Differences in Income, Occupation, Education, Marital Status, and Nationality	226
7-6. Life Satisfaction by Perceived Size of Community in Advanced Industrial Societies, 1980-1986	228
7-7. Life Satisfaction by Frequency of Church Attendance in Advanced Industrial Societies, 1980-1986	229
7-8. Life Satisfaction by Educational Level in Advanced Industrial Societies, 1980-1986	230
7-9. Life Satisfaction by Occupation in Advanced Industrial Societies, 1980-1986	231
7-10. Life Satisfaction by Family Income in Advanced Industrial Societies, 1980-1986	233
7-11. Life Satisfaction by Marital Status in Advanced Industrial Societies, 1980-1986	234
7-12. Overall Life Satisfaction and Happiness by Marital Status and Sex	236
7-13. Overall Life Satisfaction and Happiness by Recent Changes in Respondent's Financial Situation	237
7-14. Life Satisfaction by Value Type in Advanced Industrial Societies, 1980-1986	238
7-15. The Meaning of Happiness, to Different Value Types	239
7-16. Multiple Classification Analysis: Predictors of Overall Life Satisfaction	241
7-17. Multiple Classification Analysis: Predictors of Happiness	242
7-18. Suicide Rates in Western Nations, 1976-1978	244
8-1. Support for the Classic Economic Policies of the Left by Level of Economic Development, 1979-1983	255
8-2. Potential Electorates for Various Types of Parties in Ten European Community Countries, 1984	266
8-3. Support for Development of Nuclear Power among Nine West European Publics by Value Type, 1979	269
8-4. Support for Developing Nuclear Power among Candidates to European Parliament by Value Type, 1979	270
8-5. Partisanship, Issues, and Ideology: Left-Right Self-Placement as the First Factor in a Principal Components Analysis	274

8-6. Potential Electorates for Ten Types of Parties by Social Class, 1984	279
8-7. Potential Electorates for Ten Types of Parties by Value Type, 1984	280
8-8. Support for Traditional Left and New Politics Parties by Value Type across Britain, France, Italy, West Germany, Belgium, and the Netherlands, 1970–1987	281
8-9. Support for Traditional Left and New Politics Parties by Age Cohort across Britain, France, West Germany, Italy, Ireland, and Benelux during 1984–1986	283
8-10. Support for Revolutionary Social Change by Value Type across Nine Nations, 1976–1987	285
9-1. Issue Positions of Candidates to European Parliament: Factor Analysis with Varimax Rotation	291
9-2. Correlation Between Left-Right Self-Placement and Position on Specific Issues among Western Elites and Publics, 1979	295
9-3. Issue Preferences and Left-Right Self-Placement of Western Publics: Factor Analysis with Varimax Rotation	297
9-4. Correlations between Issue Positions of Candidates of Given Party and Position Taken by Electorate of That Party	299
9-5. Attitudes toward Ownership and Management of Business and Industry by Value Type	303
9-6. Attitudes toward Ownership and Management of Business and Industry by Age Group	304
9-7. Electoral Cleavages Based on Social Class, Religion, and Personal Values in Western Europe	307
9-8. Unconventional Political Behavior Reported in 1980–1981 by Value Type in 1974	313
9-9. Unconventional Political Behavior Reported in 1980–1981 by Value Type in 1974, Controlling for Protest Behavior Reported in 1974	314
9-10. Value Type by Occupation and Age Group, 1980–1986	319
9-11. Value Type by Age Group among Candidates for European Parliament, 1979	322
10-1. Political Involvement by Educational Level in Ten Western Societies, 1973–1984	345
10-2. Political Involvement by Birth Cohort in Ten Western Societies, 1973–1984	346
10-3. Political Involvement: The Gender Gap in Nineteen Societies	348
10-4. Political Involvement by Educational Level and Gender in Ten Western Nations, 1973–1974	349
10-5. Politicization of Western Publics by Education, Sex, Values, Birth Cohort, and Occupation	351
10-6. Multiple Classification Analysis: Predictors of Political Discussion Rates in Twelve Nations	353
10-7. Political Discussion Rates over Time, 1973–1987	355
10-8. Political Party Loyalty Rates, 1976–1987	358

10-9. Unconventional Political Participation by Cognitive Mobilization in Eight Nations	361
10-10. Intergenerational Contrasts in Types of Political Mobilization	364
10-11. Distribution of Political Mobilization Types, 1976-1987	366
10-12. Voting Intention by Political Mobilization Type, 1976-1984	367
11-1. Membership or Potential Membership in New Social Movements by Materialist/Postmaterialist Values in Twelve Nations, 1986	379
11-2. Support for Peace Movements by Value Type	381
11-3. Membership in Peace Movement by Value Type	382
11-4. Attitudes and Behavior toward Ecology Movement by Left-Right Ideology, Cognitive Mobilization, and Materialist/Postmaterialist Values	383
11-5. Attitudes and Behavior toward Three New Social Movements by Values, Cognitive Mobilization, and Left-Right Ideology	385
11-6. Membership and Potential Membership in New Social Movements by Voting Intention across Ten Western Nations	387
11-7. Predictors of Membership/Potential Membership in Ecology Movement across Twelve West European Nations	389
11-8. Membership and Potential Membership in Ecology Movements: Multiple Classification Analysis	390
11-9. Predictors of Membership/Potential Membership in Antiwar Movement across Twelve West European Nations	391
11-10. Membership or Potential Membership in Antiwar Movement: Multiple Classification Analysis	392
12-1. West European Opinions of the United States, 1954-1987	394
12-2. Trust in Other Nationalities among Nine West European Publics, in 1976 and 1986	399
12-3. Anti-Americanism by Value Type among Five Western Publics in 1982 and 1984	404
12-4. Attitudes toward Atlantic Alliance by Value Type	405
12-5. West European Evaluations of Whether U.S. Policies and Actions during 1984 Have Promoted Peace	407
12-6. Evaluations of Whether U.S. Policies during 1984 Have Promoted Peace by Value Type and Age Group	407
12-7. West European Evaluations of Whether U.S. Policies Helped or Harmed Their Nation's Economy, in 1984 and 1985	409
12-8. Evaluations of Whether U.S. Policies Helped or Harmed One's Nation's Economy by Value Type and Age Group, in 1984 and 1985	410
12-9. Feeling of National Pride in Twenty-two Nations, 1970-1985	411
12-10. National Pride among West European Publics by Value Type and Age Group, 1983	412
12-11. Willingness to Fight for One's Country in Twenty-two Societies	413
12-12. Willingness to Fight for One's Country by Value Type and Age Group, in 1981 and 1985	414

12-13. Support for European Unification in Twelve European Community Nations, 1987	420
12-14. Support for Formation of a European Government, 1987	421
A-1. Interpersonal Trust in the Late 1950s and the 1980s in Five Nations	438
A-2. Value Priorities of American and Hungarian Publics: Stable Cross-Cultural Differences	439
A-3. Mean Economic Growth 1965–1984 by Cultural Tradition	440
A-4. Rise in Consumer Price Index over Previous Year in Six Western Nations, 1970 to 1986	441
A-5. Value Priorities by Age Group in Poland and Hungary	442
A-6. What People Look for in a Job by Value Type and Nationality	442
A-7. Respondent's Income Level by Value Type	443
A-8. Values and Economic Achievement by Education among the Prewar Cohorts and the Postwar Generation	443
A-9. Respondent's Income by Value Type, Controlling for Father's Education	443
A-10. Percentage Saying "Married Men/Women Having an Affair Can Never Be Justified" by Age and Country	444
A-11. Percentage Approving of a Single Woman Having a Child by Age Group and Country	445
A-12. Happiness by Perceived Size of Community	446
A-13. Life Satisfaction and Happiness by Religious Orientation, 1982	447
A-14. Happiness by Educational Level	448
A-15. Happiness by Respondent's Occupation	449
A-16. Happiness by Family Income	450
A-17. Happiness by Marital Status	451
A-18. Happiness by Value Type	452
A-19. Correlation between Policies Supported by Candidates of a Given Party and Characteristics of That Party's Electorate	453
A-20. Attitudes toward Ownership and Management of Business and Industry by Age Group and Country	454
A-21. Left-Right Self-Placement by Social Class, Religious Practice, and Personal Values, 1980–1986	455
A-22. Support for Social Change by Social Class, Religious Practice, and Personal Values, 1980–1986	456
A-23. Political Cleavages by Social Class, Religion, and Personal Values: Multiple Classification Analyses	457
A-24. Electoral Cleavages in Twelve Nations, 1980–1987	458
