<i>List of Figures</i>	vii
<i>Preface to the Second Edition</i>	ix
1 Networks and Relations	1
Relations and Attributes	2
An Overview	5
2 The Development of Social Network Analysis	7
Sociometric Analysis and Graph Theory	8
Interpersonal Configurations and Cliques	16
Networks: Total and Partial	26
The Harvard Breakthrough	33
3 Handling Relational Data	38
The Organization of Relational Data	38
The Storage of Relational Data	49
The Selection of Relational Data	53
4 Points, Lines and Density	63
Sociograms and Graph Theory	64
Density: Ego-centric and Socio-centric	69
Community Structure and Density	76
5 Centrality and Centralization	82
Centrality: Local and Global	83
Centralization and Graph Centres	89
A Digression on Absolute Density	94
Bank Centrality in Corporate Networks	96
6 Components, Cores and Cliques	100
Components, Cycles and Knots	101
The Contours of Components	108
Cliques and their Intersections	114
Components and Citation Circles	121

7	Positions, Roles and Clusters	123
	The Structural Equivalence of Points	124
	Clusters: Agglomerative and Divisive	126
	Block Models: CONCOR and BURT	131
	Towards Regular Structural Equivalence	139
	Interlocks and Participations	142
8	Dimensions and Displays	146
	Distance, Space and Metrics	148
	Principal Components and Factors	153
	Non-metric Methods	157
	Advances in Network Visualization	164
	Elites, Communities and Influence	165
	Appendix Social Network Packages	175
	Notes	181
	Bibliography	193
	Index	205

List of Figures

Figure 1.1	Types of data and analysis	3
Figure 2.1	The lineage of social network analysis	8
Figure 2.2	A sociogram: the sociometric star	10
Figure 2.3	Balanced and unbalanced structures	14
Figure 2.4	A Hawthorne sociogram	18
Figure 2.5	A matrix of cliques	21
Figure 2.6	Matrix re-arrangement	24
Figure 3.1	A data matrix for variable analysis	39
Figure 3.2	A simple matrix and sociogram	39
Figure 3.3	Matrices for social networks	41
Figure 3.4	Matrix conventions: best practice	44
Figure 3.5	Matrices for interlocking directorships	45
Figure 3.6	Levels of measurement in relational data	47
Figure 3.7	A GRADAP line file	52
Figure 3.8	Networks and sampling: the ideal	58
Figure 4.1	Alternative drawings of a graph	66
Figure 4.2	A directed graph and its matrix	67
Figure 4.3	Lines and paths	68
Figure 4.4	Density comparisons	71
Figure 4.5	Ego-centric measures of density	72
Figure 4.6	Density of personal networks	78
Figure 5.1	Local and global centrality	84
Figure 5.2	A highly centralized graph	89
Figure 5.3	The structural centre of a graph	91
Figure 5.4	The absolute centre of a graph	93
Figure 5.5	Peaks and bridges	98
Figure 6.1	Components in a network	103
Figure 6.2	Cyclic components	105
Figure 6.3	Cycles and semi-cycles	107
Figure 6.4	Knots and cut-points	108
Figure 6.5	Nested components	109
Figure 6.6	A $3k$ -core	111
Figure 6.7	Collapse of a k -core	112
Figure 6.8	A $3m$ -core	113
Figure 6.9	Collapse of an m -core	114
Figure 6.10	Cliques of varying sizes	115
Figure 6.11	n -cliques of size 4	116

Figure 6.12	Sub-graphs and 2-cliques	117
Figure 6.13	A 3-clique and a 3-plex	118
Figure 6.14	Intersecting social circles	120
Figure 7.1	A network and its block model	125
Figure 7.2	Clusters	128
Figure 7.3	A dendrogram	129
Figure 7.4	A simple block model	134
Figure 7.5	Hierarchical block models	136
Figure 7.6	Structural equivalence and social circles	137
Figure 7.7	The structure of financial hegemony in Britain (1976)	144
Figure 8.1	Scottish companies: a circle diagram	147
Figure 8.2	Euclidean distance	149
Figure 8.3	Constructing a metric model	151
Figure 8.4	Rotation	155
Figure 8.5	Data for non-metric multidimensional scaling	158
Figure 8.6	Goodness of fit in non-metric multidimensional scaling	160
Figure 8.7	A multidimensional scaling configuration	163
Figure 8.8	Community elite structure	170
Figure 8.9	Multidimensional scaling and bank interlocks	171
Figure 8.10	Alternative projections	173
