Preface xi
Abbreviations xiii

Part I Basic concepts 1

- 1 What is managerial economics? 3**
 - 1.1 Outline of the book 11
- 2 Introduction to maximisation and optimisation 14**
 - 2.1 The meaning of profit 14
 - 2.2 Maximising the value of the firm 17
 - 2.3 Two rules of marginal equivalency 19
 - 2.4 Mathematical methods 21
- 3 Decision analysis under risk and uncertainty 32**
 - 3.1 A framework for decision making 32
 - 3.2 The nature of certainty, risk and uncertainty 32
 - 3.3 Measurement of risk 33
 - 3.4 Decision criteria under certainty 37
 - 3.5 Decision criteria under risk 37
 - 3.6 Decision criteria under uncertainty 43
 - 3.7 Sequential decisions: decision trees 47
 - 3.8 Adjusting the present value formula for risk 49
- 4 Strategic decision taking and transactions costs 57**
 - 4.1 The Coase Theorem and value maximisation 57
 - 4.2 Transaction costs 59
 - 4.3 Transaction dimensions 60
 - 4.4 Bounded rationality and strategic behaviour 61
 - 4.5 Pre-contractual opportunism and adverse selection 63
 - 4.6 Post-contractual opportunism and moral hazard 68
 - 4.7 The theory of principal and agent 70

5 Business objectives	75
5.1 The single-period profit-maximising model	76
5.2 Single-period managerial models	79
5.3 Satisficing and the organisational coalition	87
5.4 The multi-period profit-maximising model	91
5.5 Marris's multi-period managerial model	93
5.6 The positive theory of agency	97
5.7 Managerial discipline	101
Part II Knowing the market	109
6 Forecasting	111
6.1 Surveys	111
6.2 Experiments	115
6.3 Time series analysis	117
6.4 Barometric techniques	126
6.5 Econometric models	129
6.6 Input-output (IO) analysis	132
6.7 Markov chains	136
6.8 Usage	142
6.9 Managerial revisions of forecasts	145
6.10 Summary	145
<i>Appendix 6</i> New product forecasts	145
7 Demand theory	152
7.1 Traditional consumer theory	152
7.2 Becker's development of demand theory	165
7.3 Lancaster's characteristics approach	167
7.4 The demand function	173
7.5 Conclusions	186
8 Techniques for demand estimation	188
8.1 Survey and experimental methods	188
8.2 Regression techniques	189
Part III Short-/medium-term decisions	215
9 Cost theory and measurement	217
9.1 Production theory	217
9.2 Cost curves	226
9.3 Measurement of cost curves	246
<i>Appendix 9</i> Mathematical derivation of cost minimising combination of inputs	256
10 Linear programming	261
10.1 Least-cost input combinations	261
10.2 Optimising the output mix	264
10.3 The dual	280

- 11 Price policy 284**
- 11.1 Market structure and price behaviour 284
 - 11.2 Discriminatory pricing 288
 - 11.3 Oligopolistic interdependence 294
 - 11.4 Barriers to entry 313
 - 11.5 Entry and strategic behaviour 318
 - Appendix 11 The Cournot framework of pricing analysis 323*
- 12 Pricing in regulated industries 330**
- 12.1 Marginal cost pricing 331
 - 12.2 Controlling return on capital 337
 - 12.3 Privatisation, regulation and RPI-X 339
- 13 Advertising decisions 344**
- 13.1 Budget setting: the theory 344
 - 13.2 Budget setting: the practice 348
 - 13.3 The theory and practice of the optimum promotional mix 351
 - 13.4 Advertising and price 366
 - 13.5 Advertising and strategy 370

Part IV Medium-/long-term decisions 375

- 14 Capital budgeting 377**
- 14.1 Traditional methods of investment appraisal 377
 - 14.2 Discounted cash-flow methods of investment appraisal 379
 - 14.3 Conflict between the DCF techniques 385
 - 14.4 Capital structure 389
 - 14.5 The cost of equity and portfolio theory 398
 - 14.6 The capital asset pricing model 413
 - 14.7 Dividend distribution 417
 - Appendix 14 Table of discount factors 419*
- 15 Product, market and corporate strategies 422**
- 15.1 The decision to integrate vertically 423
 - 15.2 Managerial implications of vertical integration 429
 - 15.3 The decision to diversify 440
 - 15.4 Managerial implications of diversification 448
 - 15.5 The product portfolio 458
 - 15.6 The decision to invest abroad 461
- 16 Location decisions 472**
- 16.1 Factors influencing location 472
 - 16.2 Theories of location 474

Part V Public policy and regulation of business 491

- 17 Competition policy legislation 493**
- 17.1 Rationale 493

17.2 UK competition policy	495
17.3 European Union competition policy	501
17.4 Evaluation of UK policy	502
17.5 Evaluation of EU policy	518
18 Pollution and the environment: what managers should know	527
18.1 Public goods and externalities	527
18.2 Environmental pollution	532
Part VI Decision evaluation and control	539
19 Profits and control	541
19.1 Economic interpretation of accounts	541
19.2 Accounting for inflation	543
19.3 Profit planning and control	546
<i>Study questions</i>	554
<i>Index</i>	577
