Introduction	
<i>Thomas Kieselbach</i>	13
Executive Summary	17
Comparative Report	
Empirical analysis of the risk of social exclusion of long-term unemployed young people in six countries of the EU	
<i>Thomas Kieselbach, Gert Beelmann, Andrea Stitzel & Ute Traiser</i>	27
1 Introduction	29
1.1 Youth unemployment and social exclusion	29
1.2 Youth unemployment and health	32
2 Qualitative method	33
2.1 Methodological background	33
2.2 Description of the sample	34
2.3 Data collection	37
2.4 Data analysis	39
2.4.1 The process of generating a typology	42
3 Comparison of results	43
3.1 Social exclusion	43
3.1.1 Labour market exclusion	44
3.1.1.1 Submerged economy	45
3.1.2 Economic exclusion	47
3.1.3 Institutional exclusion	48
3.1.4 Exclusion through social isolation	49
3.1.5 Cultural exclusion	50
3.1.6 Spatial exclusion	51
3.1.7 Summary	52

3.2	Comparison of typology	53
3.2.1	Persons at high risk of social exclusion	54
3.2.2	Persons at increased risk of social exclusion	58
3.2.3	Persons at low risk of social exclusion	61
3.2.4	Concluding remarks	63
3.3	Victimisation	65
3.3.1	Primary victimisation	66
3.3.2	Secondary victimisation	66
3.3.3	Tertiary victimisation	67
3.4	Health effects/situation among the three risk groups	68
3.4.1	Persons at high risk of social exclusion	68
3.4.2	Persons at increased risk of social exclusion	70
3.4.3	Persons at low risk of social exclusion	71
4	Conclusions	73
National Reports		
Empirical analysis of the risk of social exclusion of long-term unemployed young people in Sweden <i>Ulla Rantakeisu, Erik Forsberg, Marina Kalander-Blomqvist, Ulla-Britta Löfgren, Marianne Johansson & Bengt Starrin</i>		
		77
Empirical analysis of the risk of social exclusion of long-term unemployed young people in Belgium <i>Tine Willems, Wouter Vanderplasschen & Kees van Heeringen</i>		
		139
Empirical analysis of the risk of social exclusion of long-term unemployed young people in Germany <i>Thomas Kieselbach, Gert Beelmann, Ute Traiser & Ronald Meyer</i>		
		183
Empirical analysis of the risk of social exclusion of long-term unemployed young people in Greece <i>Katerina Sokou, Demetra Bayetakou & Valentine Papantoniou</i>		
		243
Empirical analysis of the risk of social exclusion of long-term unemployed young people in Italy <i>Vando Borghi, Federico Chicchi & Michele La Rosa</i>		
		319
Empirical analysis of the risk of social exclusion of long-term unemployed young people in Spain <i>Josep Espluga, Josep Baltiérrez & Louis Lemkow</i>

The National Reports are – with slight differences – structured as follows:

1 Introduction

- 1.1 Current socio-political context regarding youth unemployment
- 1.2 Specific regional situation for young unemployed people

2 Sample

- 2.1 Access to the sample
- 2.2 Sample description

3 Description of results

- 3.1 Social exclusion
 - 3.1.1 Labour market exclusion
 - 3.1.1.1 Submerged economy
 - 3.1.2 Economic exclusion
 - 3.1.3 Institutional exclusion
 - 3.1.4 Exclusion through social isolation
 - 3.1.5 Cultural exclusion
 - 3.1.5.1 Deviant behaviour
 - 3.1.6 Spatial exclusion
- 3.2 Description of typology
 - 3.2.1 Persons at high risk of social exclusion
 - 3.2.2 Persons at increased risk of social exclusion
 - 3.2.3 Persons at low risk of social exclusion
 - 3.2.4 Concluding remarks
- 3.3 Victimization
 - 3.3.1 Primary victimisation
 - 3.3.2 Secondary victimisation
 - 3.3.3 Tertiary victimisation
- 3.4 Health effects/situation among the three risk groups
 - 3.4.1 Persons at high risk of social exclusion
 - 3.4.1.1 Psychosocial strain
 - 3.4.1.2 Health behaviour
 - 3.4.1.3 Self-esteem
 - 3.4.1.4 Work orientation
 - 3.4.1.5 Suicidal ideation/behaviour
 - 3.4.2 Persons at increased risk of social exclusion
 - 3.4.2.1 Description of health situation
 - 3.4.2.2 Protective factors
 - 3.4.3 Persons at low risk of social exclusion
 - 3.4.3.1 Description of health situation
 - 3.4.3.2 Protective factors
 - 3.4.3.3 Activating resources
 - 3.4.4 Summary

4 Prototypical cases of young unemployed persons

5 Conclusions

Tables

Table ES-1:	Key factors of social exclusion in six European countries	22
Table CR-1:	Regional sample selection within the countries participating in the project	35
Table CR-2.1:	Gender in respective national study population distributed by region.....	36
Table CR-2.2:	Qualification level in respective national study population distributed by region	36
Table CR-3:	Distribution of study population by type of social exclusion.....	53
Table CR-4:	Socio-demographic data for the group "high risk of social exclusion"	55
Table CR-5:	Exclusion dimensions for the group "high risk of social exclusion"	56
Table CR-6:	Socio-demographic data for the group "increased risk of social exclusion"	58
Table CR-7:	Exclusion dimensions for the group "increased risk of social exclusion"	59
Table CR-8:	Socio-demographic data for the group "low risk of social exclusion"	61
Table CR-9:	Exclusion dimensions for the group "low risk of social exclusion"	62
Table S-1:	Study group and unemployed young people in Sweden arranged by gender and educational level	84
Table S-2:	Sample distribution according to types of social exclusion	94
Table S-3:	Breakdown of the number in each risk group reporting complaints of ill-health	123
Table B-1:	Average unemployment rate of total population in Flanders according to age for the period 1994-1998	141
Table B-2:	Average unemployment rate of total population (1998) according to age, region, and gender	142
Table B-3:	Average unemployment rate of total population (1998) according to province, city, and gender	145
Table B-4:	Distribution of qualification level in general population, by study region (Gent/Kortrijk – Roeselare between 20-25 years, more than one year unemployed)	146
Table B-5:	Distribution of qualification level among participating subjects	147
Table B-6:	Distribution of qualification levels in general population and in study sample (Kortrijk/Roeselare region), by gender	147
Table B-7:	Distribution of qualification levels in general population and in study sample (Gent region), by gender	147
Table B-8:	Sample distribution according to types of social exclusion	154
Table B-9:	Social exclusion across dimensions in the high risk group, by gender	154
Table B-10:	Social exclusion across dimensions in the increased risk group, by gender	158

Table B-11:	Proportions of unemployed young people suffering from primary victimisation, by gender and level of education (overall sample)	163
Table B-12:	Proportion of unemployed young people suffering from secondary victimisation, by gender and level of education (overall sample)	163
Table B-13:	Proportion of unemployed young people suffering from tertiary victimisation, by gender and level of education (overall sample)	164
Table B-14:	Health situation of young people at increased risk of social exclusion (overall sample)	169
Table GER-1:	Sample description	190
Table GER-2:	Comparison between sample and total population regarding gender and qualification in western and eastern Germany	190
Table GER-3:	Sample distribution according to types of social exclusion	199
Table GER-4:	Frequency of dimensions in the high risk group of social exclusion	200
Table GER-5:	Frequency of dimensions in the increased risk group of social exclusion	204
Table GER-6:	Frequency of dimensions in the low risk group of social exclusion	207
Table GER-7:	Frequency of dimensions of social exclusion for the different risk groups	211
Table GER-8:	Vulnerability factors for the different risk groups	211
Table GER-9:	Protective factors for the different risk groups	212
Table GER-10:	Key mechanisms of social exclusion/inclusion	212
Table GR-1:	Youth unemployment rate by age and sex, 1997	247
Table GR-2:	Unemployment rate by gender in Greece, and in the peripheries of Attiki, Eastern Sterea Ellada, and Eastern Macedonia and Thrace, 1990-1997	252
Table GR-3:	Unemployment rate by educational level in Greece, and in the peripheries of Attiki, Eastern Sterea Ellada, Eastern Macedonia and Thrace, 1997	252
Table GR-4:	Greek sample group distribution according to place of residence	253
Table GR-5:	Greek sample group: gender and qualification level compared to the national qualification level of young unemployed in 1994	254
Table GR-6:	Greek sample group: distribution by gender and length of unemployment	255
Table GR-7:	Greek sample group distribution by place of residence and type of previous work experience	263
Table GR-8:	Major urban sample: type of work experience by gender in the Greater Athens Area	263
Table GR-9:	Provincial urban, semi-urban and rural sample: type of work experience by gender in Thiva and Drama	263
Table GR-10:	Greek sample group: gender distribution by high, increased and low risk of social exclusion	278
Table GR-11:	Greek major urban sample: gender distribution by high, increased and low risk of social exclusion	278

Table GR-12:	Greek provincial urban, semi-urban and rural sample: gender distribution by high, increased and low risk of social exclusion	278
Table GR-13:	Persons at high risk of social exclusion by gender, qualification level, place of residence, length of unemployment and type of previous work experience	279
Table GR-14:	Persons at increased risk of social exclusion by gender, qualification level, place of residence, length of unemployment and type of previous work experience	284
Table GR-15:	Persons at low risk of social exclusion by gender, qualification level, place of residence, length of unemployment and type of previous work experience	286
Table GR-16:	Greek sample group: typology of the three types at risk of social exclusion and their characteristic dimensions	291
Table GR-17:	Greek sample group: key mechanisms of young unemployed persons facing high, increased and low risk of social exclusion	292
Table GR-18:	Greek sample: personality characteristics and state of mental/physical health in young unemployed persons facing high, increased and low risk of social exclusion	307
Table I-1:	Youth unemployment figures in Italy	321
Table I-2:	Youth unemployment rates (15-24 years) from 1994 to 1999	322
Table I-3:	Rates of youth unemployment (15-24 years) for men and for women in different macro-regions in 1998	322
Table I-4:	Young people (15-24 years) looking for work, according to gender, educational qualifications, and geographical area – averages for 1997 (in thousands)	323
Table I-4a:	Average no. of months young people (15-24 years) spent looking for a job, according to educational qualifications, gender, and geographical area – averages for 1997	323
Table I-5:	Young people in the 15-24 age group in search of their first job, classified by gender, region, and employment status – averages for 1998 (in thousands)	324
Table I-6:	Young people (15-29 years) looking for work in Emilia-Romagna in 1998, according to their educational qualifications	325
Table I-7:	Young people (15-29 years) looking for work in Campania in 1998, according to their educational qualifications	325
Table I-8:	Youth employment and unemployment rates (15-24 years) subdivided in terms of gender, region and province – averages for 1998	326
Table I-9:	Long-term unemployed (15-24 years) as a percentage of total unemployed (15-24 years) according to geographical area	327
Table I-10:	Educational qualification of the research sample	328
Table I-11:	Regular and irregular positions of employment 1996	341
Table I-12:	Irregular employment by categories	343
Table I-13:	Forms of irregular employment	343
Table I-14:	Percentage of irregular employed workers per sector and geographical area in 1994	344

Table I-15:	Irregular labour units as a percentage of the total, per region and per productive sector in 1991	344
Table I-16:	Basic categories of irregular employment	347
Table I-17:	Sample distribution according to types of social exclusion	370
Table I-18:	Young unemployed at high risk of social exclusion	371
Table I-19:	Young unemployed at increased risk of social exclusion	374
Table I-20:	Young unemployed at low risk of social exclusion	376
Table SP-1:	Youth unemployment rates by age (1970-1998)	396
Table SP-2:	Sample description	400
Table SP-3:	Unemployed 20-24 years of age, more than one year unemployed, by sex, level of qualifications and geographical area	400
Table SP-4:	Unemployed 20-24 years of age, more than one year unemployed, by sex, level of qualifications and geographical area	401
Table SP-5:	Ideal composition of the sample, according to distribution by sex, level of qualifications and geographical area	401
Table SP-6:	Composition of the real sample	401
Table SP-7:	Index of irregularity (submerged economy) by sector of activity	405
Table SP-8:	Sample distribution according to types of social exclusion	416
Table SP-9:	Frequency of dimensions in the high risk group of social exclusion	416
Table SP-10:	Frequency of dimensions in the increased risk group of social exclusion	420
Table SP-11:	Frequency of dimensions in the low risk group of social exclusion	424
Table SP-12:	Dimensions of social exclusion for the different risk groups	430
Table SP-13:	Vulnerability factors for the different risk groups	431
Table SP-14:	Protective factors for the different risk groups	431

Figures

Figure CR-1:	The exclusion-inclusion paradigm	30
Figure CR-2:	Example of a case chart of German interviewee at high risk of social exclusion	41
Figure CR-3:	Comparison of types of social exclusion	54
Figure S-1:	Empirical level (typology) and conceptual level of social inclusion and exclusion	93
