PART I INTRODUCTION

1	A PERSPECTIVE OF INDUSTRIAL ECONOMICS	3
1.1	Introduction	3
1.2	The early theory of the firm	3
1.3	Monopolistic competition	7
1.4	Developments after Chamberlin	12
1.5	A framework of industrial economics	18
1.6	Passive and active behaviour of firms	21
1.7	Outline of the book	22

PART II THE ANALYSIS OF MARKETS

2	COSTS AND SUPPLY CONDITIONS	27
2.1	Production costs, and economies of scale at plant level	27
2.2	Economies of scale and the firm	38
2.3	Empirical cost curves	47
2.4	The survivor technique	54
2.5	Conclusions	56
3	STRATEGY AND PRICING IN OLIGOPOLISTIC MARKETS	58
3.1	Introduction	58
3.2	Classical oligopoly theory and the one-period model	59
3.3	Extensions of the basic model	62
3.4	Oligopolistic competition in multi-period models	67
3.5	Collusion and cartels	75
3.6	Strategic responses to potential competition	85
3.7	Conclusions	100

4	PRODUCT DIFFERENTIATION	102
4.1	Introduction	102
4.2	Monopolistic competition revived	103
4.3	Product differentiation: alternative frameworks	106
4.4	Pricing and equilibrium in differentiated product markets	115
4.5	Strategic responses to potential competition in differentiated markets	122
4.6	Evidence	124
4.7	Conclusions	126
5	ADVERTISING	128
5.1	A model of advertising expenditures	128
5.2	Advertising and consumer behaviour	131
5.3	Advertising and market structure	139
5.4	Advertising and barriers to entry	142
5.5	Other aspects of advertising	148
5.6	Conclusions	150
6	VERTICAL MARKET RELATIONSHIPS AND PRICE DISCRIMINATION	152
6.1	Vertical relationships in markets	152
6.2	Price discrimination	161
6.3	Conclusions	168
7	PRICING IN PRACTICE	170
7.1	Introduction	170
7.2	Predictions of price theory	172
7.3	Pricing under uncertainty	175
7.4	Empirical evidence on pricing: case studies	180
7.5	Inventories and order books	185
7.6	Empirical evidence on pricing: econometric analysis	189
7.7	Price behaviour and market structure	195
7.8	Conclusions	200
	Appendix	201

8	MARKET STRUCTURE AND PROFITABILITY	204
8.1	Introduction	204
8.2	Industrial structure and profitability: a summary of theory	204
8.3	Measurement of concentration	207
8.4	Measurement of profitability	216
8.5	Concentration and industry profitability: early studies	223
8.6	Entry and profitability	224
8.7	Other influences on profitability	232
8.8	Simultaneous studies of the structure- performance relation	239
8.9	Discontinuities in the concentration- profitability relation	245
8.10	Further specification and measurement problems	246
8.11	Interpretation of structure-profitability relationships	254
8.12	Conclusions	259
	Appendix	261
 PART III THE BEHAVIOUR OF FIRMS		
9	THE FIRM: OBJECTIVES, ORGANISATION & CONTROL	271
9.1	Introduction	271
9.2	Characteristics of industrial companies	273
9.3	Ownership and control of firms	276
9.4	Firms as resource-allocating organizations	281
9.5	The profit maximization assumption	292
9.6	Non-profit-maximizing objectives	296
9.7	Constraints on non-profit-maximizing behaviour	305
9.8	Non-profit-maximizing models of the firm	317
9.9	Conclusions	324
10	THE GROWTH OF FIRMS	327
10.1	Introduction	327
10.2	The Marris growth model	328
10.3	The demand constraint	335
10.4	Growth through vertical integration	340
10.5	The managerial constraint	347
10.6	The finance constraint	351
10.7	Empirical evidence on managerial objectives	356

10.8	Growth and profitability	360
10.9	Steady-state methodology	362
10.10	The size and growth of firms	365
10.11	Problems in the theory of the growth of firms	367
10.12	Implications and conclusions	372
11	COMPANY FINANCE	375
11.1	The analysis of financial decisions	375
11.2	The flow of funds	378
11.3	The cost of funds	379
11.4	Gearing	384
11.5	The retention ratio	404
11.6	Financial intermediaries	419
11.7	Conclusions	422
	Appendices	423
12	INVESTMENT EXPENDITURE	433
12.1	Investment decisions	433
12.2	A framework for analysing investment behaviour	435
12.3	The theory of investment	438
12.4	Empirical studies of investment	446
12.5	Government policy impact	456
12.6	The investment decision process	459
12.7	Conclusions	465
13	RESEARCH AND DEVELOPMENT, AND INNOVATION	466
13.1	Definitions	466
13.2	R and D expenditure as an investment decision	467
13.3	Markets and the returns to R and D	473
13.4	Diffusion of new techniques	490
14	TAKEOVERS, MERGERS, AND THE STOCK MARKET	496
14.1	Introduction	496
14.2	The stock market valuation of firms	499
14.3	The pure theory of mergers	510
14.4	Allocational takeovers	512
14.5	Managerial takeovers	516
14.6	Acquisitional takeovers	521
14.7	Conglomerate mergers	522

14.8 Empirical evidence on takeovers	524
14.9 Conclusions	531

15 THE DEVELOPMENT OF FIRMS, AND MARKET AND INDUSTRIAL STRUCTURE 532

15.1 Models of market structure	533
15.2 Stochastic models of concentration	537
15.3 Inter-industry differences in growth rate variance	541
15.4 Scale economies, growth, and concentration	543
15.5 Technical change, product change, and changes in concentration	547
15.6 New entry and the development of market structure	550
15.7 Mergers and market concentration	553
15.8 Diversification	556
15.9 Industrial concentration	558

PART IV ISSUES FOR PUBLIC POLICY

16 PUBLIC POLICY TOWARDS MARKET STRUCTURE, CONDUCT, AND PERFORMANCE: I	565
16.1 The static Pareto framework	566
16.2 The supposed optimality of perfect competition	568
16.3 A piecemeal approach	570
16.4 The costs of monopoly: theoretical issues	573
16.5 The social costs of monopoly: measuring welfare losses	581

16.6	Concentration measurements and welfare losses	587
17	PUBLIC POLICY TOWARDS MARKET STRUCTURE, CONDUCT, AND PERFORMANCE: II	590
17.1	Product differentiation	590
17.2	Advertising and information	593
17.3	Policy aspects of vertical relations in markets, and of vertical integration	597
17.4	Price discrimination	600
17.5	The framework for policy	604
17.6	Competition policy in the UK, the EEC, and the USA	612
17.7	Regulation	622
18	PUBLIC POLICY AND THE DEVELOPMENT OF FIRMS	638
18.1	The dynamic Pareto conditions	638
18.2	Environmental uncertainty	639
18.3	Time and environmental uncertainty in the context of a price system	640
18.4	A constrained Pareto optimum	644
18.5	Imperfections of the capital market	646
18.6	Investment	647
18.7	Growth by merger	650
18.8	Research and development	652
18.9	Conclusions	660
	Appendix: A Formal Analysis of Pareto Optimality	661
	<i>Index</i>	665
