Preface	xi
Foreword	xiii
Acknowledgements	xvii
✕ Introduction	xix
1 — THE NEW ECONOMICS OF VALUE-CREATING SYSTEMS	1
1.1 A SCHEMA FOR INTERPRETING CURRENT CHANGES	2
1.2 DEVELOPMENTS AT THE LEVEL OF COMPETITIVE SYSTEMS	6
1.2.1 <i>From realization to support activities</i>	7
Changes in cost structures	14
Overcoming the trade-off between costs and differentiation	18
Changes in the role of consumers	20
1.2.2 <i>Connectivity and unbundling</i>	22
The many faces of connectivity	23
The new economics of information arising from universal connectivity	26
The relationships between connectivity and business cost structure	31
Unbundling and rebundling	32
1.2.3 <i>Systemic products and the spread of industry standards</i>	37
Finished products	38
Users	38
Components	38
1.3 EVOLUTION AT COMPANY LEVEL: FROM ENTERPRISES TO VALUE-CREATING SYSTEMS	41
1.3.1 <i>Focus on core competences</i>	43
1.3.2 <i>Participation in more than one value-creating system</i>	44

1.3.3	<i>The interconnected company</i>	45
1.3.4	<i>Integrated and lean companies</i>	47
1.3.5	<i>Internal and external flexibility</i>	48
1.4	ENVIRONMENTAL DEVELOPMENTS AND THE EVOLUTION OF MANAGERIAL DISCIPLINES	49
1.4.1	<i>The evolution of economic studies</i>	49
1.4.2	<i>Strategic analysis models for the new economic paradigm</i>	54
2	— THE VALUE NET	59
2.1	VALUE-CREATING SYSTEMS	59
2.1.1	<i>A definition of value-creating systems</i>	61
2.1.2	<i>Subjectiveness of the boundaries of value-creating systems</i>	66
2.2	THE VALUE NET: A TOOL FOR THE ANALYSIS OF VALUE-CREATING SYSTEMS	68
2.2.1	<i>The broad perspective of the value net</i>	69
	Porter's perspective in value system analysis	69
	The value net perspective in VCS analysis	71
2.2.2	<i>Unbundling strategic thinking: activities as key elements of strategic analysis</i>	77
2.3	THE ELEMENTS OF THE VALUE NET MODEL	80
2.3.1	<i>Value net nodes</i>	81
2.3.2	<i>The arcs in the value net</i>	82
2.4	THE CLASSIFICATION OF ACTIVITIES	87
2.4.1	<i>Realization activities</i>	90
	The nature of realization activities	90
	Flows connecting realization activities	91
	The costs arising from realization activities	91
2.4.2	<i>Support activities</i>	91
	The nature of support activities	92
	Flows connecting support activities	95
	A classification of support activities	96
	The costs arising from support activities	99
2.4.3	<i>External transaction management activities</i>	99
	The nature of transaction management activities	100
	The costs arising from transaction management activities	104
2.4.4	<i>Consumption activities</i>	104
2.4.5	<i>Representing the activities</i>	105
3	— THE MEANINGS OF VALUE	107
3.1	THE MEANING OF 'VALUE' IN VALUE NET METHODOLOGY	107
3.1.1	<i>The meaning of value in microeconomics</i>	110

3.1.2	<i>The meaning of value in the value net approach</i>	111
3.1.3	<i>The meaning of value in strategic management studies</i>	112
3.2	POSSIBLE MEANINGS OF NET VALUE FOR CUSTOMERS	115
3.3	ABSOLUTE NET VALUE RECEIVED BY CUSTOMERS	117
3.3.1	<i>The elements of absolute net value: classification by nature</i>	119
	Tangible elements	119
	Intangible elements	120
	Services	121
	Economic elements	123
3.3.2	<i>The elements of absolute net value: other classifications</i>	124
	Increased performance or reduced costs	125
	Hygienic and motivating elements	129
	Control of the element on the part of an economic player	131
	When costs are sustained	131
3.4	DIFFERENTIAL NET VALUE RECEIVED BY CUSTOMERS	132
3.4.1	<i>The evaluation of differential net value: a simplified approach</i>	135
3.4.2	<i>The evaluation of differential net value: a complex approach</i>	137
	The market-perceived quality profile	138
	The market-perceived price profile	140
	The customer value map	144
3.5	VALUE PROVIDED AND MARKET-PERCEIVED VALUE	147
	Improving the offer system	149
	Modifying the offer system	149
	Using the signals of value	149
4	— USING THE VALUE NET	151
4.1	INDUSTRY ANALYSIS: OVERCOMING THE LIMITATIONS OF TRADITIONAL MODELS	151
4.1.1	<i>The traditional analysis of industry attractiveness</i>	151
4.1.2	<i>The traditional techniques for defining and segmenting industries</i>	155
	The map of strategic groups	155
	Industry segmentation	155
4.1.3	<i>The basic limitations of traditional industry analysis</i>	157
	The product-based definition of the competitive system	158
	The hypothesis of substantial homogeneity in the configuration of competitors	159
	The hypothesis that the boundaries of a competitive system can be defined	160
4.2	STRUCTURAL ANALYSIS OF THE NODES IN A VALUE-CREATING SYSTEM	168
4.2.1	<i>Recovering structural analysis at node level</i>	169

4.2.2	<i>New determinants of structural attractiveness</i>	171
	The critical nature of the node	172
	Visibility of the node	173
	Learning potential of the node	174
	Extendibility of the node and/or its related know-how and resources	175
	Node routing function	179
4.3	THE FUNDAMENTAL STEPS IN VALUE NET ANALYSIS	180
4.3.1	<i>Preliminary identification of consumption activities</i>	181
4.3.2	<i>Description of traditional VCSs</i>	185
	Definition of production and support activities, their aggregation in nodes and the identification of significant flows	186
	Identification of the boundaries of the economic players	188
	Structural analysis of the nodes	192
4.3.3	<i>Market segmentation on the basis of ideal VCS configurations</i>	194
4.3.4	<i>Analysis and comparison of alternative value-creating systems</i>	200
4.3.5	<i>Identification of opportunities for innovation</i>	213
	Comparing the analysed system with emerging alternatives	214
	Borrowing strategies and solutions from similar VCSs	215
	Identifying system bottlenecks	215
	Identifying inefficient nodes	216
	Identifying new ways of involving final customers	217
	Identifying compromises in VCS configuration and opportunities in process streamlining	218
	Identifying the consequences of technological trends	219
	Redefining the boundaries of system players	221
	Controlling support activities	221
	Exploiting the possibilities of extension	222
