# Contents

<i>List of figures</i>	<i>page</i> xv
<i>Preface</i>	xvii
<b>1 Asset markets and asset prices</b>	1
1.1 Capital markets	2
1.2 Asset price determination: an introduction	5
1.3 The role of expectations	9
1.4 Performance risk, margins and short-selling	11
1.5 Arbitrage	15
1.6 The role of time	20
1.7 Asset market efficiency	22
1.8 Summary	23
Appendix 1.1: Averages and indexes of stock prices	24
Appendix 1.2: Real rates of return	28
Appendix 1.3: Continuous compounding and the force of interest	29
<i>References</i>	32
<b>2 Asset market microstructure</b>	33
2.1 Financial markets: functions and participants	34
2.2 Trading mechanisms	36
2.3 Industrial organization of financial markets	41
2.4 Trading and asset prices in a call market	45
2.5 Bid–ask spreads: inventory-based models	48
2.6 Bid–ask spreads: information-based models	49
2.7 Summary	52
<i>References</i>	54

<b>3</b>	<b>Predictability of prices and market efficiency</b>	56
	3.1 Using the past to predict the future	57
	3.2 Informational efficiency	64
	3.3 Patterns of information	70
	3.4 Asset market anomalies	72
	3.5 Event studies	75
	3.6 Summary	77
	Appendix 3.1: The law of iterated expectations and martingales	79
	<i>References</i>	81
<b>4</b>	<b>Decision making under uncertainty</b>	83
	4.1 The state-preference approach	85
	4.2 The expected utility hypothesis	90
	4.3 Behavioural alternatives to the EUH	98
	4.4 The mean-variance model	101
	4.5 Summary	105
	Appendix 4.1: Useful notation	107
	Appendix 4.2: Derivation of the FVR	108
	Appendix 4.3: Implications of complete asset markets	109
	Appendix 4.4: Quadratic von Neumann–Morgenstern utility	110
	Appendix 4.5: The FVR in the mean-variance model	111
	<i>References</i>	112
<b>5</b>	<b>Portfolio selection: the mean-variance model</b>	114
	5.1 Mean-variance analysis: concepts and notation	115
	5.2 Portfolio frontier: two risky assets	118
	5.3 Portfolio frontier: many risky assets and no risk-free asset	121
	5.4 Portfolio frontier: many risky assets with a risk-free asset	125
	5.5 Optimal portfolio selection in the mean-variance model	131
	5.6 Summary	133
	Appendix 5.1: Numerical example: two risky assets	134
	Appendix 5.2: Variance minimization: risky assets only	135
	Appendix 5.3: Variance minimization with a risk-free asset	139
	Appendix 5.4: Derivation of $\Delta\sigma_P = \beta_{jP}\sigma_P\Delta a_j$	140
	Appendix 5.5: The optimal portfolio with a single risky asset	141
	<i>References</i>	142

<b>6</b>	<b>The capital asset pricing model</b>	143
	6.1 Assumptions of the CAPM	144
	6.2 Asset market equilibrium	145
	6.3 The characteristic line and the market model	149
	6.4 The security market line	151
	6.5 Risk premia and diversification	154
	6.6 Extensions	157
	6.7 Summary	159
	Appendix 6.1: The CAPM in terms of asset prices	160
	Appendix 6.2: Linear dependence of $\varepsilon_j$ in the CAPM	162
	Appendix 6.3: The CAPM when all assets are risky	162
	<i>References</i>	165
<b>7</b>	<b>Arbitrage</b>	166
	7.1 Arbitrage in theory and practice	166
	7.2 Arbitrage in an uncertain world	168
	7.3 State prices and the risk-neutral valuation relationship	173
	7.4 Summary	176
	Appendix 7.1: Implications of the arbitrage principle	177
	<i>References</i>	182
<b>8</b>	<b>Factor models and the arbitrage pricing theory</b>	183
	8.1 Factor models	184
	8.2 APT	187
	8.3 Predictions of the APT	190
	8.4 Summary	194
	Appendix 8.1: The APT in a multifactor model	195
	Appendix 8.2: The APT in an exact single-factor model	197
	<i>References</i>	199
<b>9</b>	<b>Empirical appraisal of the CAPM and APT</b>	200
	9.1 The CAPM	201
	9.2 Tests of the CAPM: time series	202
	9.3 Tests of the CAPM: cross-sections	206
	9.4 Sharpe ratios and Roll's criticism	214
	9.5 Multiple-factor models and the APT	215
	9.6 Summary	219
	Appendix 9.1: The Black CAPM in terms of excess returns	220
	<i>References</i>	221
<b>10</b>	<b>Present value relationships and price variability</b>	222
	10.1 Net present value	223
	10.2 Asset price volatility	228

10.3	Behavioural finance, noise trading and models of dividend growth	235
10.4	Extreme asset price fluctuations	237
10.5	Summary	243
	Appendix 10.1: Present values in continuous time	245
	Appendix 10.2: Infinitely lived assets: constant growth	246
	Appendix 10.3: The RNVR with multiple time periods	246
	<i>References</i>	248
<b>11</b>	<b>Intertemporal choice and the equity premium puzzle</b>	<b>250</b>
11.1	Consumption and investment in a two-period world with certainty	251
11.2	Uncertainty, multiple assets and long time horizons	254
11.3	Lifetime portfolio selection	258
11.4	The equity premium puzzle and the risk-free rate puzzle	262
11.5	Intertemporal capital asset pricing models	269
11.6	Summary	273
	Appendix 11.1: Intertemporal consumption and portfolio selection	274
	Appendix 11.2: Simplifying the FVR	276
	Appendix 11.3: The consumption CAPM	278
	<i>References</i>	280
<b>12</b>	<b>Bond markets and fixed-interest securities</b>	<b>281</b>
12.1	What defines a bond?	282
12.2	Zero-coupon bonds	286
12.3	Coupon-paying bonds	291
12.4	Bond valuation	295
12.5	Risks in bond portfolios	297
12.6	Immunization of bond portfolios	298
12.7	Summary	300
	Appendix 12.1: Some algebra of bond yields	302
	<i>References</i>	305
<b>13</b>	<b>Term structure of interest rates</b>	<b>306</b>
13.1	Yield curves	307
13.2	Index-linked bonds	310
13.3	Implicit forward rates	313
13.4	The expectations hypothesis of the term structure	317
13.5	Allowing for risk preferences in the term structure	322
13.6	Arbitrage and the term structure	326
13.7	Summary	328

Appendix 13.1: The expectations hypothesis with explicit uncertainty	329
Appendix 13.2: Risk aversion and bond portfolios	331
<i>References</i>	334
<b>14 Futures markets I: fundamentals</b>	336
14.1 Forward contracts and futures contracts	337
14.2 The operation of futures markets	342
14.3 Arbitrage between spot and forward prices	349
14.4 Arbitrage in foreign exchange markets	354
14.5 Repo markets	355
14.6 Summary and conclusion	357
Appendix 14.1: Forward and futures prices	359
Appendix 14.2: Revaluation of a forward contract	360
<i>References</i>	362
<b>15 Futures markets II: speculation and hedging</b>	363
15.1 Speculation	363
15.2 Hedging strategies	365
15.3 Optimal hedging	374
15.4 Theories of futures prices	378
15.5 Manipulation of futures markets	383
15.6 Summary	386
Appendix 15.1: Futures investment as portfolio selection	387
Appendix 15.2: Derivation of $\tilde{h}$	390
<i>References</i>	392
<b>16 Futures markets III: applications</b>	393
16.1 Weather futures	393
16.2 Financial futures contracts	397
16.3 Short-term interest rate futures	400
16.4 Long-term interest rate, or bond, futures	404
16.5 Stock index futures	406
16.6 The fall of Barings Bank	412
16.7 Summary	414
<i>References</i>	416
<b>17 Swap contracts and swap markets</b>	417
17.1 Swap agreements: the fundamentals	417
17.2 Why do swaps occur?	423
17.3 Risks associated with swaps	429
17.4 Valuation of swaps	429

17.5	Metallgesellschaft: a case study	431
17.6	Summary	435
	<i>References</i>	437
<b>18</b>	<b>Options markets I: fundamentals</b>	438
18.1	Call options and put options	439
18.2	Varieties of options	446
18.3	Option-like assets	448
18.4	Upper and lower bounds for option prices	449
18.5	Put-call parity for European options	454
18.6	The Modigliani–Miller theorem	457
18.7	Summary	459
	Appendix 18.1: Lower bound for a European call option premium	460
	Appendix 18.2: Lower bound for a European put option premium	461
	Appendix 18.3: Put-call parity for European options	462
	Appendix 18.4: The Modigliani–Miller theorem: a proof	463
	<i>References</i>	466
<b>19</b>	<b>Options markets II: price determination</b>	467
19.1	The fundamentals of option price models	468
19.2	A two-state option-pricing model	471
19.3	The Black–Scholes model	480
19.4	Contingent claims analysis	486
19.5	Summary	490
	<i>References</i>	492
<b>20</b>	<b>Options markets III: applications</b>	494
20.1	Stock index options	495
20.2	Options on futures contracts	496
20.3	Interest rate options	500
20.4	Options and portfolio risks	504
20.5	Portfolio insurance	507
20.6	Combinations and spreads	512
20.7	Summary	514
	Appendix 20.1: Put-call parity for European options on futures	515
	<i>References</i>	518
	<i>Subject index</i>	519
	<i>Author index</i>	526

# Figures

1.1	Market equilibrium for a single asset	6
2.1	Flow demand and supply for a single asset	37
3.1	A method for appraising asset market efficiency	67
4.1	States in a two-period world	87
4.2	The value function, $z(W)$ , in prospect theory	100
4.3	Indifference curves in $\mu_p, \sigma_p$ space	104
5.1	The efficiency frontier with two assets	119
5.2	The efficiency frontier with two assets and $\rho_{12} = \pm 1$	119
5.3	The efficiency frontier allowing for short-sales	120
5.4	The efficiency frontier with three assets	122
5.5	Efficient portfolios with a risk-free asset	126
5.6	Efficient portfolios with different lending and borrowing rates	128
5.7	The Sharpe ratio and risk-adjusted performance	131
5.8	Optimal portfolio selection	132
5.9	The portfolio frontier with risky assets	137
6.1	The capital market line	147
6.2	The characteristic line for asset $j$	150
6.3	The security market line	152
6.4	Disequilibrium in the CAPM	153
6.5	Zero-beta portfolios	158
8.1	A single-factor model	185
8.2	The APT in a single-factor model	191
9.1	A test of the CAPM	208
10.1	Observed US stock prices, $\tilde{p}_t$ , and <i>ex post</i> rational prices, $\tilde{p}_t^*$	232
11.1	Two-period consumption plans	253
12.1	A zero-coupon bond's price, $p$ , as a function of its yield, $y$	289
13.1	Yield curves	308
13.2	Estimated yield curves	309

13.3	Estimated real yield curves	312
14.1	Pay-offs from long and short futures positions	345
15.1	The slope of the fitted line is an estimate of the pure hedge ratio, $h^*$	376
18.1	Pay-offs at exercise for call and put options: long positions	443
18.2	Pay-offs at exercise for call and put options: short positions	444
18.3	Absence of arbitrage opportunities (AoAO) regions for European options	452
18.4	Bounds for American and European put option prices	456
19.1	Call and put option prices as a function of the asset price, $S$	470
19.2	The pattern of underlying asset prices: the two-period case	477
19.3	Sample paths for asset prices in continuous time	479
20.1	Interest rate caps and floors	501
20.2	Portfolio insurance with a put option	509
20.3	A long straddle	514
