List of Figures	x
Preface to Second Edition	xii
From the Preface to the First Edition	xiv
Note	xvi
Abbreviations	xvii
1 Introduction	1
1.1 Analysing and Modelling Time Series	1
1.2 Outline of the Book	7
2 Stationary Stochastic Processes and their Properties in the Time Domain	9
2.1 Basic Concepts	9
2.2 Autoregressive Processes	16
2.3 Moving Average Processes	23
2.4 Mixed Processes	25
2.5 Unobserved Components	30
2.6 Prediction and Signal Extraction	32
2.7 Properties of the Correlogram and Other Sample Statistics	39
2.8 Tests for Randomness and Normality	43
3 Estimation and Testing of Autoregressive-Moving Average Models	48
3.1 Introduction	48
3.2 Autoregressive Models	55
3.3 Moving Average and Mixed Processes	60
3.4 Hypothesis Tests and Confidence Intervals	64
3.5 Small Sample Properties	68
3.6 Model Selection	73
	vii

4	State Space Models and the Kalman Filter	82
4.1	State Space Form	82
4.2	Filtering, Smoothing and Prediction	85
4.3	Gaussian Models and the Likelihood Function	89
4.4	Autoregressive-Moving Average Models	95
4.5	Regression and Time-Varying Parameters	98
Appendix A	Properties of the Multivariate Normal Distribution	103
Appendix B	Matrix Inversion Lemma	104
5	Time Series Models	106
5.1	Introduction	106
5.2	Autoregressive-Integrated-Moving Average Models	114
5.3	Structural Time Series Models	120
5.4	Autoregressive Models	129
5.5	Seasonality	134
5.6	Seasonal ARIMA and Structural Models	139
5.7	Long Memory and Growth Curves	147
5.8	Explanatory Variables	152
5.9	Intervention Analysis	160
6	The Frequency Domain	166
6.1	Introduction	166
6.2	Fixed Cycles	169
6.3	Spectral Representation of a Stochastic Process	175
6.4	Properties of Autoregressive-Moving Average Processes	179
6.5	Stochastic Cycles	182
6.6	Linear Filters	189
6.7	Estimation of the Spectrum	198
6.8	Maximum Likelihood Estimation of Time Series Models	205
6.9	Testing	214
6.10	Regression in the Frequency Domain	218
Appendix A	Trigonometric Identities	227
Appendix B	Orthogonality Relationships	228
Appendix C	Fourier Transforms	229
7	Multivariate Time Series	233
7.1	Stationary Series and their Properties in the Time Domain	233
7.2	Cross-Spectral Analysis	235
7.3	Vector Autoregressive-Moving Average Processes	240
7.4	Estimation	245
7.5	Multivariate ARIMA Modelling	249
7.6	Structural Time Series Models	253
7.7	Co-integration	257
8	Non-Linear Models	265
8.1	Introduction	265
8.2	Conditionally Gaussian Models	272
8.3	Autoregressive Conditional Heteroscedasticity	275

8.4 Stochastic Variance Models	281
8.5 Qualitative Observations and Markov Chains	285
8.6 Switching Regimes	288
Appendix Law of Iterated Expectations	291
Answers to Selected Exercises	293
References	295
Subject Index	303
Author Index	307
