

CONTENTS

Series Editor's Introduction	v
Acknowledgments	vii
1. Introduction	1
2. A Formal Presentation of the Regression Assumptions	3
The Regression Surface	3
The Role of the Error Term	6
Other Regression Assumptions	11
3. A "Weighty" Illustration	13
4. The Consequences of the Regression Assumptions Being Satisfied	18
5. The Substantive Meaning of Regression Assumptions	22
Drawing Dynamic Inferences From Cross-Sectional Regressions	22
The Assumption of the Absence of Perfect Multicollinearity	24
The Assumption That the Error Term Is Uncorrelated With Each of the Independent Variables	27
Specification Error: Using the Wrong Independent Variables	30
The Assumption That the Mean of the Error Term Is Zero	41
Assumptions About Level of Measurement	45
The Assumption of Measurement Without Error	49
Random Measurement Error	51
Nonrandom Measurement Error	51
Proxy Variables	57
The Assumptions of Linearity and Additivity	60

The Assumptions of Homoscedasticity and Lack of Autocorrelation	67
The Substantive Meaning of Autocorrelation	67
The Substantive Meaning of Homoscedasticity	72
The Consequences of Heteroscedasticity and Autocorrelation	78
The Assumption That the Error Term Is Normally Distributed	81
6. Conclusion	82
Notes	83
