CONTENTS

Part I: Conceptual Issues of Regional I-O-Analysis

Input-Output Analysis: A user's guide and call for standardization
Wilhelm Pfähler
University of Hamburg

A step by step procedure to regionalized Input-Output-Analysis
Rainer Stäglin
German Institute for Economic Research, DIW, Berlin

Derivation and application of regionalized Input-Output tables: A case study
Walter Oberhofer and Harry Haupt
University of Regensburg

Constructing regionalized Input-Output tables: A new simple-to-use method
Christian Gabriel
University of Hamburg

Political consultation with the help of Input-Output Analysis – the example of
Baden-Württemberg
Werner Münzenmaier
Ministry of Finance, Stuttgart

Part II: Airport Case Studies of Regional Impact Analysis

Frankfurt Airport's impact on regional and national employment and income
Reinhard Hujer and Stefan Kokot
University of Frankfurt am Main

Hamburg Airport – promoter of economic growth and employment for the
metropolitan region
Jürgen Aring
empirica GmbH, Bonn

Regional impact of open sky policies on Hamburg Airport
David Gillen and Holger Hinsic
University of Berkeley and SAIC Wahington, DC.

On the use and abuse of impact analysis for airports: A critical view from the
perspective of regional policy
Hans-Martin Niemeier
Ministry of Economics, Hamburg
