

Contents

Preface	xi
----------------	-----------

Part I. Introduction

1 A New View of Investment	3
1 The Orthodox Theory	4
2 The Option Approach	6
3 Irreversibility and the Ability to Wait	8
4 An Overview of the Book	10
5 Noneconomic Applications	23
2 Developing the Concepts Through Simple Examples	26
1 Price Uncertainty Lasting Two Periods	27
2 Extending the Example to Three Periods	41
3 Uncertainty over Cost	46
4 Uncertainty over Interest Rates	48
5 Scale versus Flexibility	51
6 Guide to the Literature	54

Part II. Mathematical Background

3 Stochastic Processes and Ito's Lemma	59
1 Stochastic Processes	60
2 The Wiener Process	63
3 Generalized Brownian Motion—Ito Processes	70
4 Ito's Lemma	79

5	Barriers and Long-Run Distribution	83
6	Jump Processes	85
7	Guide to the Literature	87
	Appendix—The Kolmogorov Equations	88
4	Dynamic Optimization under Uncertainty	93
1	Dynamic Programming	95
2	Contingent Claims Analysis	114
3	Relationship between the Two Approaches	120
4	Guide to the Literature	125
	Appendix A—Recursive Dynamic Programming	126
	Appendix B—Optimal Stopping Regions	128
	Appendix C—Smooth Pasting	130
Part III. A Firm's Decisions		
5	Investment Opportunities and Investment Timing	135
1	The Basic Model	136
2	Solution by Dynamic Programming	140
3	Solution by Contingent Claims Analysis	147
4	Characteristics of the Optimal Investment Rule	152
5	Alternative Stochastic Processes	161
6	Guide to the Literature	173
6	The Value of a Project and the Decision to Invest	175
1	The Simplest Case: No Operating Costs	177
2	Operating Costs and Temporary Suspension	186
3	A Project with Variable Output	195
4	Depreciation	199
5	Price and Cost Uncertainty	207
6	Guide to the Literature	211
7	Entry, Exit, Lay-Up, and Scrapping	213
1	Combined Entry and Exit Strategies	215
2	Lay-Up, Reactivation, and Scrapping	229
3	Guide to the Literature	242

Part IV. Industry Equilibrium

8	Dynamic Equilibrium in a Competitive Industry	247
1	The Basic Intuition	249
2	Aggregate Uncertainty	252
3	Industry Equilibrium with Exit	261
4	Firm-Specific Uncertainty	267
5	A General Model	277
6	Guide to the Literature	280
 9	 Policy Intervention and Imperfect Competition	 282
1	Social Optimality	283
2	Analyses of Some Commonly Used Policies	296
3	Example of an Oligopolistic Industry	309
4	Guide to the Literature	314
	Appendix—Some Expected Present Values	315

Part V. Extensions and Applications

10	Sequential Investment	319
1	Decisions to Start and Complete a Multistage Project	321
2	Continuous Investment and Time to Build	328
3	The Learning Curve and Optimal Production Decisions	339
4	Cost Uncertainty and Learning	345
5	Guide to the Literature	351
	Appendix—Numerical Solution of Partial Differential Equation	353
 11	 Incremental Investment and Capacity Choice	 357
1	Gradual Capacity Expansion with Diminishing Returns	359
2	Increasing Returns and Lumpy Additions to Capacity	377
3	Adjustment Costs	381
4	Guide to the Literature	391
 12	 Applications and Empirical Research	 394
1	Investments in Offshore Oil Reserves	396
2	Electric Utilities' Compliance with the Clean Air Act	405
3	The Timing of Environmental Policy	412

4	Explaining Aggregate Investment Behavior	419
5	Guide to the Literature	425
	References	429
	Symbol Glossary	445
	Author Index	449
	Subject Index	455
