PREFACE *xiii*

---

## 1 *Difference Equations* 1

1.1. First-Order Difference Equations 1

1.2.  $p$ th-Order Difference Equations 7

**APPENDIX 1.A. *Proofs of Chapter 1 Propositions* 21**

***References* 24**

---

## 2 *Lag Operators* 25

2.1. Introduction 25

2.2. First-Order Difference Equations 27

2.3. Second-Order Difference Equations 29

2.4.  $p$ th-Order Difference Equations 33

2.5. Initial Conditions and Unbounded Sequences 36

***References* 42**

---

## 3 *Stationary ARMA Processes* 43

3.1. Expectations, Stationarity, and Ergodicity 43

3.2. White Noise 47

3.3. Moving Average Processes 48

3.4. Autoregressive Processes 53

3.5. Mixed Autoregressive Moving Average Processes 59

- 3.6. The Autocovariance-Generating Function 61
- 3.7. Invertibility 64

**APPENDIX 3.A. Convergence Results for Infinite-Order Moving Average Processes 69**

*Exercises 70      References 71*

---

**4      *Forecasting*      72**

- 4.1. Principles of Forecasting 72
- 4.2. Forecasts Based on an Infinite Number of Observations 77
- 4.3. Forecasts Based on a Finite Number of Observations 85
- 4.4. The Triangular Factorization of a Positive Definite Symmetric Matrix 87
- 4.5. Updating a Linear Projection 92
- 4.6. Optimal Forecasts for Gaussian Processes 100
- 4.7. Sums of *ARMA* Processes 102
- 4.8. Wold's Decomposition and the Box-Jenkins Modeling Philosophy 108

**APPENDIX 4.A. Parallel Between OLS Regression and Linear Projection 113**

**APPENDIX 4.B. Triangular Factorization of the Covariance Matrix for an *MA(1)* Process 114**

*Exercises 115      References 116*

---

**5      *Maximum Likelihood Estimation*      117**

- 5.1. Introduction 117
- 5.2. The Likelihood Function for a Gaussian *AR(1)* Process 118
- 5.3. The Likelihood Function for a Gaussian *AR(p)* Process 123
- 5.4. The Likelihood Function for a Gaussian *MA(1)* Process 127
- 5.5. The Likelihood Function for a Gaussian *MA(q)* Process 130
- 5.6. The Likelihood Function for a Gaussian *ARMA(p, q)* Process 132
- 5.7. Numerical Optimization 133

- 5.8. Statistical Inference with Maximum Likelihood Estimation 142
- 5.9. Inequality Constraints 146

**APPENDIX 5.A. Proofs of Chapter 5 Propositions 148**  
*Exercises 150      References 150*

---

**6      *Spectral Analysis*      152**

- 6.1. The Population Spectrum 152
- 6.2. The Sample Periodogram 158
- 6.3. Estimating the Population Spectrum 163
- 6.4. Uses of Spectral Analysis 167

**APPENDIX 6.A. Proofs of Chapter 6 Propositions 172**  
*Exercises 178      References 178*

---

**7      *Asymptotic Distribution Theory*      180**

- 7.1. Review of Asymptotic Distribution Theory 180
- 7.2. Limit Theorems for Serially Dependent Observations 186

**APPENDIX 7.A. Proofs of Chapter 7 Propositions 195**  
*Exercises 198      References 199*

---

**8      *Linear Regression Models*      200**

- 8.1. Review of Ordinary Least Squares with Deterministic Regressors and i.i.d. Gaussian Disturbances 200
- 8.2. Ordinary Least Squares Under More General Conditions 207
- 8.3. Generalized Least Squares 220

**APPENDIX 8.A. Proofs of Chapter 8 Propositions 228**  
*Exercises 230      References 231*

---

**9      *Linear Systems of Simultaneous Equations*      233**

- 9.1. Simultaneous Equations Bias 233
- 9.2. Instrumental Variables and Two-Stage Least Squares 238

- 9.3. Identification 243
- 9.4. Full-Information Maximum Likelihood Estimation 247
- 9.5. Estimation Based on the Reduced Form 250
- 9.6. Overview of Simultaneous Equations Bias 252

**APPENDIX 9.A. Proofs of Chapter 9 Proposition 253**  
*Exercise 255      References 256*

**10    Covariance-Stationary Vector Processes      257**

- 10.1. Introduction to Vector Autoregressions 257
- 10.2. Autocovariances and Convergence Results for Vector Processes 261
- 10.3. The Autocovariance-Generating Function for Vector Processes 266
- 10.4. The Spectrum for Vector Processes 268
- 10.5. The Sample Mean of a Vector Process 279

**APPENDIX 10.A. Proofs of Chapter 10 Propositions 285**  
*Exercises 290      References 290*

**11    Vector Autoregressions      291**

- 11.1. Maximum Likelihood Estimation and Hypothesis Testing for an Unrestricted Vector Autoregression 291
- 11.2. Bivariate Granger Causality Tests 302
- 11.3. Maximum Likelihood Estimation of Restricted Vector Autoregressions 309
- 11.4. The Impulse-Response Function 318
- 11.5. Variance Decomposition 323
- 11.6. Vector Autoregressions and Structural Econometric Models 324
- 11.7. Standard Errors for Impulse-Response Functions 336

**APPENDIX 11.A. Proofs of Chapter 11 Propositions 340**  
**APPENDIX 11.B. Calculation of Analytic Derivatives 344**  
*Exercises 348      References 349*

---

**12**    *Bayesian Analysis*    351

- 12.1. Introduction to Bayesian Analysis 351
- 12.2. Bayesian Analysis of Vector Autoregressions 360
- 12.3. Numerical Bayesian Methods 362

*APPENDIX 12.A. Proofs of Chapter 12 Propositions 366*  
*Exercise 370      References 370*

---

**13**    *The Kalman Filter*    372

- 13.1. The State-Space Representation of a Dynamic System 372
- 13.2. Derivation of the Kalman Filter 377
- 13.3. Forecasts Based on the State-Space Representation 381
- 13.4. Maximum Likelihood Estimation of Parameters 385
- 13.5. The Steady-State Kalman Filter 389
- 13.6. Smoothing 394
- 13.7. Statistical Inference with the Kalman Filter 397
- 13.8. Time-Varying Parameters 399

*APPENDIX 13.A. Proofs of Chapter 13 Propositions 403*  
*Exercises 406      References 407*

---

**14**    *Generalized Method of Moments*    409

- 14.1. Estimation by the Generalized Method of Moments 409
- 14.2. Examples 415
- 14.3. Extensions 424
- 14.4. *GMM* and Maximum Likelihood Estimation 427

*APPENDIX 14.A. Proofs of Chapter 14 Propositions 431*  
*Exercise 432      References 433*

---

**15**    *Models of Nonstationary Time Series*    435

- 15.1. Introduction 435
- 15.2. Why Linear Time Trends and Unit Roots? 438

- 15.3. Comparison of Trend-Stationary and Unit Root Processes 438
- 15.4. The Meaning of Tests for Unit Roots 444
- 15.5. Other Approaches to Trended Time Series 447

*APPENDIX 15.A. Derivation of Selected Equations  
for Chapter 15 451*  
*References 452*

---

**16**    *Processes with Deterministic Time Trends*    454

- 16.1. Asymptotic Distribution of OLS Estimates of the Simple Time Trend Model 454
- 16.2. Hypothesis Testing for the Simple Time Trend Model 461
- 16.3. Asymptotic Inference for an Autoregressive Process Around a Deterministic Time Trend 463

*APPENDIX 16.A. Derivation of Selected Equations  
for Chapter 16 472*  
*Exercises 474      References 474*

---

**17**    *Univariate Processes with Unit Roots*    475

- 17.1. Introduction 475
- 17.2. Brownian Motion 477
- 17.3. The Functional Central Limit Theorem 479
- 17.4. Asymptotic Properties of a First-Order Autoregression when the True Coefficient Is Unity 486
- 17.5. Asymptotic Results for Unit Root Processes with General Serial Correlation 504
- 17.6. Phillips-Perron Tests for Unit Roots 506
- 17.7. Asymptotic Properties of a  $p$ th-Order Autoregression and the Augmented Dickey-Fuller Tests for Unit Roots 516
- 17.8. Other Approaches to Testing for Unit Roots 531
- 17.9. Bayesian Analysis and Unit Roots 532

*APPENDIX 17.A. Proofs of Chapter 17 Propositions 534*  
*Exercises 537      References 541*

---

**18**    *Unit Roots in Multivariate Time Series*    544

- 18.1. Asymptotic Results for Nonstationary Vector Processes 544
- 18.2. Vector Autoregressions Containing Unit Roots 549
- 18.3. Spurious Regressions 557

**APPENDIX 18.A.** *Proofs of Chapter 18 Propositions* 562  
*Exercises* 568      *References* 569

---

**19**    *Cointegration*    571

- 19.1. Introduction 571
- 19.2. Testing the Null Hypothesis of No Cointegration 582
- 19.3. Testing Hypotheses About the Cointegrating Vector 601

**APPENDIX 19.A.** *Proofs of Chapter 19 Propositions* 618  
*Exercises* 625      *References* 627

---

**20**    *Full-Information Maximum Likelihood Analysis of Cointegrated Systems*    630

- 20.1. Canonical Correlation 630
- 20.2. Maximum Likelihood Estimation 635
- 20.3. Hypothesis Testing 645
- 20.4. Overview of Unit Roots—To Difference or Not to Difference? 651

**APPENDIX 20.A.** *Proofs of Chapter 20 Propositions* 653  
*Exercises* 655      *References* 655

---

**21**    *Time Series Models of Heteroskedasticity*    657

- 21.1. Autoregressive Conditional Heteroskedasticity (ARCH) 657
- 21.2. Extensions 665

**APPENDIX 21.A.** *Derivation of Selected Equations for Chapter 21* 673  
*References* 674
