| PREFACE | xiii |
| ACKNOWLEDGEMENTS | xix |
| NOTATION AND SYMBOLS | xxi |
| Part I TERMINOLOGY AND THEORY | |
| 1. INTRODUCTION | 3 |
| 2. CONCEPTS | 5 |
| 2.1. Problem Setting and General Notation | 5 |
| 2.1.1. Multiobjective Optimization Problem | 5 |
| 2.1.2. Background Concepts | 6 |
| 2.2. Pareto Optimality | 10 |
| 2.3. Decision Maker | 14 |
| 2.4. Ranges of the Pareto Optimal Set | 15 |
| 2.4.1. Ideal Objective Vector | 15 |
| 2.4.2. Nadir Objective Vector | 16 |
| 2.4.3. Related Topics | 18 |
| 2.5. Weak Pareto Optimality | 19 |
| 2.6. Value Function | 21 |
| 2.7. Efficiency | 23 |
| 2.8. From One Solution to Another | 25 |
| 2.8.1. Trade-Offs | 26 |
| 2.8.2. Marginal Rate of Substitution | 27 |
| 2.9. Proper Pareto Optimality | 29 |
| 2.10. Pareto Optimality Tests with Existence Results | 33 |

| | |
|--|-----------|
| 3. THEORETICAL BACKGROUND | 37 |
| 3.1. Differentiable Optimality Conditions | 37 |
| 3.1.1. First-Order Conditions | 37 |
| 3.1.2. Second-Order Conditions | 42 |
| 3.1.3. Conditions for Proper Pareto Optimality | 43 |
| 3.2. Nondifferentiable Optimality Conditions | 45 |
| 3.2.1. First-Order Conditions | 47 |
| 3.2.2. Second-Order Conditions | 52 |
| 3.3. More Optimality Conditions | 54 |
| 3.4. Sensitivity Analysis and Duality | 56 |
| | |
| Part II METHODS | |
| | |
| 1. INTRODUCTION | 61 |
| 2. NO-PREFERENCE METHODS | 67 |
| 2.1. Method of the Global Criterion | 67 |
| 2.1.1. Different Metrics | 67 |
| 2.1.2. Theoretical Results | 69 |
| 2.1.3. Concluding Remarks | 71 |
| 2.2. Multiobjective Proximal Bundle Method | 71 |
| 2.2.1. Introduction | 71 |
| 2.2.2. MPB Algorithm | 73 |
| 2.2.3. Theoretical Results | 75 |
| 2.2.4. Concluding Remarks | 75 |
| 3. A POSTERIORI METHODS | 77 |
| 3.1. Weighting Method | 78 |
| 3.1.1. Theoretical Results | 78 |
| 3.1.2. Applications and Extensions | 82 |
| 3.1.3. Weighting Method as an A Priori Method | 83 |
| 3.1.4. Concluding Remarks | 84 |
| 3.2. ϵ -Constraint Method | 85 |
| 3.2.1. Theoretical Results on Weak and Pareto Optimality | 85 |
| 3.2.2. Connections with the Weighting Method | 88 |
| 3.2.3. Theoretical Results on Proper Pareto Optimality | 89 |
| 3.2.4. Connections with Trade-Off Rates | 92 |
| 3.2.5. Applications and Extensions | 94 |
| 3.2.6. Concluding Remarks | 95 |
| 3.3. Hybrid Method | 96 |

| | | |
|-----------|--|-----|
| 3.4. | Method of Weighted Metrics | 97 |
| 3.4.1. | Introduction | 97 |
| 3.4.2. | Theoretical Results | 98 |
| 3.4.3. | Comments | 99 |
| 3.4.4. | Connections with Trade-Off Rates | 100 |
| 3.4.5. | Variants of the Weighted Tchebycheff Problem | 100 |
| 3.4.6. | Connections with Global Trade-Offs | 103 |
| 3.4.7. | Applications and Extensions | 106 |
| 3.4.8. | Concluding Remarks | 106 |
| 3.5. | Achievement Scalarizing Function Approach | 107 |
| 3.5.1. | Introduction | 107 |
| 3.5.2. | Theoretical Results | 108 |
| 3.5.3. | Comments | 110 |
| 3.5.4. | Concluding Remarks | 112 |
| 3.6. | Other A Posteriori Methods | 112 |
| 4. | A PRIORI METHODS | 115 |
| 4.1. | Value Function Method | 115 |
| 4.1.1. | Introduction | 115 |
| 4.1.2. | Comments | 116 |
| 4.1.3. | Concluding Remarks | 117 |
| 4.2. | Lexicographic Ordering | 118 |
| 4.2.1. | Introduction | 118 |
| 4.2.2. | Comments | 120 |
| 4.2.3. | Concluding Remarks | 120 |
| 4.3. | Goal Programming | 121 |
| 4.3.1. | Introduction | 121 |
| 4.3.2. | Different Approaches | 122 |
| 4.3.3. | Comments | 126 |
| 4.3.4. | Applications and Extensions | 127 |
| 4.3.5. | Concluding Remarks | 129 |
| 5. | INTERACTIVE METHODS | 131 |
| 5.1. | Interactive Surrogate Worth Trade-Off Method | 136 |
| 5.1.1. | Introduction | 136 |
| 5.1.2. | ISWT Algorithm | 137 |
| 5.1.3. | Comments | 140 |
| 5.1.4. | Concluding Remarks | 141 |
| 5.2. | Geoffrion-Dyer-Feinberg Method | 141 |
| 5.2.1. | Introduction | 141 |
| 5.2.2. | GDF Algorithm | 143 |
| 5.2.3. | Comments | 146 |
| 5.2.4. | Applications and Extensions | 146 |
| 5.2.5. | Concluding Remarks | 148 |

| | | |
|---------|---|-----|
| 5.3. | Sequential Proxy Optimization Technique | 149 |
| 5.3.1. | Introduction | 149 |
| 5.3.2. | SPOT Algorithm | 151 |
| 5.3.3. | Comments | 152 |
| 5.3.4. | Applications and Extensions | 153 |
| 5.3.5. | Concluding Remarks | 153 |
| 5.4. | Tchebycheff Method | 154 |
| 5.4.1. | Introduction | 154 |
| 5.4.2. | Tchebycheff Algorithm | 158 |
| 5.4.3. | Comments | 159 |
| 5.4.4. | Concluding Remarks | 160 |
| 5.5. | Step Method | 161 |
| 5.5.1. | Introduction | 161 |
| 5.5.2. | STEM Algorithm | 162 |
| 5.5.3. | Comments | 163 |
| 5.5.4. | Concluding Remarks | 164 |
| 5.6. | Reference Point Method | 164 |
| 5.6.1. | Introduction | 165 |
| 5.6.2. | Reference Point Algorithm | 165 |
| 5.6.3. | Comments | 167 |
| 5.6.4. | Implementation | 167 |
| 5.6.5. | Applications and Extensions | 169 |
| 5.6.6. | Concluding Remarks | 170 |
| 5.7. | GUESS Method | 170 |
| 5.7.1. | Introduction | 171 |
| 5.7.2. | GUESS Algorithm | 173 |
| 5.7.3. | Comments | 173 |
| 5.7.4. | Concluding Remarks | 174 |
| 5.8. | Satisficing Trade-Off Method | 174 |
| 5.8.1. | Introduction | 174 |
| 5.8.2. | STOM Algorithm | 176 |
| 5.8.3. | Comments | 177 |
| 5.8.4. | Implementation | 178 |
| 5.8.5. | Applications and Extensions | 178 |
| 5.8.6. | Concluding Remarks | 179 |
| 5.9. | Light Beam Search | 179 |
| 5.9.1. | Introduction | 180 |
| 5.9.2. | Light Beam Algorithm | 182 |
| 5.9.3. | Comments | 183 |
| 5.9.4. | Concluding Remarks | 184 |
| 5.10. | Reference Direction Approach | 184 |
| 5.10.1. | Introduction | 184 |
| 5.10.2. | Reference Direction Approach Algorithm | 185 |
| 5.10.3. | Comments | 187 |
| 5.10.4. | Concluding Remarks | 189 |

| | |
|--|-----|
| 5.11. Reference Direction Method | 190 |
| 5.11.1. Introduction | 190 |
| 5.11.2. RD Algorithm | 192 |
| 5.11.3. Comments | 193 |
| 5.11.4. Concluding Remarks | 193 |
| 5.12. NIMBUS Method | 195 |
| 5.12.1. Introduction | 195 |
| 5.12.2. Vector Subproblem | 197 |
| 5.12.3. Scalar Subproblem | 198 |
| 5.12.4. NIMBUS Algorithm | 198 |
| 5.12.5. Optimality Results | 201 |
| 5.12.6. Comparison of the Two Versions | 203 |
| 5.12.7. Comments | 205 |
| 5.12.8. Implementations | 205 |
| 5.12.9. Applications | 206 |
| 5.12.10. Concluding Remarks | 207 |
| 5.13. Other Interactive Methods | 208 |
| 5.13.1. Methods Based on Goal Programming | 208 |
| 5.13.2. Methods Based on Weighted Metrics | 209 |
| 5.13.3. Methods Based on Reference Points | 210 |
| 5.13.4. Methods Based on Miscellaneous Ideas | 211 |

Part III RELATED ISSUES

| | |
|---|-----|
| 1. COMPARING METHODS | 217 |
| 1.1. Comparative Table of Interactive Methods Presented | 218 |
| 1.2. Comparisons Available in the Literature | 219 |
| 1.2.1. Introduction | 220 |
| 1.2.2. Noninteractive Tests | 221 |
| 1.2.3. Interactive Tests with Human Decision Makers | 221 |
| 1.2.4. Interactive Tests with Value Functions | 225 |
| 1.2.5. Comparisons Based on Intuition | 226 |
| 1.3. Selecting a Method | 227 |
| 1.3.1. General Guidelines | 227 |
| 1.3.2. Method Selection Tools | 228 |
| 1.3.3. Decision Tree | 229 |
| 2. SOFTWARE | 233 |
| 2.1. Introduction | 233 |
| 2.2. Review | 235 |
| 3. GRAPHICAL ILLUSTRATION | 239 |
| 3.1. Introduction | 239 |
| 3.2. Illustrating the Pareto Optimal Set | 240 |

| | |
|---|-----|
| 3.3. Illustrating a Set of Alternatives | 240 |
| 3.3.1. Value Path | 240 |
| 3.3.2. Bar Chart | 242 |
| 3.3.3. Star Coordinate System | 243 |
| 3.3.4. Spider-Web Chart | 243 |
| 3.3.5. Petal Diagram | 244 |
| 3.3.6. Scatterplot Matrix | 245 |
| 3.3.7. Other Illustrative Means | 246 |
| 3.3.8. General Remarks | 247 |
| | |
| 4. FUTURE DIRECTIONS | 251 |
| 5. EPILOGUE | 255 |
