List of Tables	xi
List of Figures	xv
List of Abbreviations	xvii
Acknowledgment	xix
1 .....	1
INTRODUCTION	1
1. EAST-WEST DIFFERENCE	1
2. MAIN INTEREST AND HYPOTHESES	3
3. STUDY DESIGN AND DATA	4
4. CONTRIBUTORS TO THE PROJECT	5
5. STRUCTURE	6
2 .....	7
BACKGROUND	7
1. HEALTH STATUS IN COUNTRIES OF CENTRAL AND EASTERN EUROPE	7
2. SELF-RATED HEALTH	8
2.1 Self-rated health as a predictor of mortality	8
2.2 Self-rated health in Central and Eastern Europe	12
3. SOCIOECONOMIC FACTORS	14
3.1 Socioeconomic factors at individual level	14
3.2 Socioeconomic factors in Central and Eastern Europe	16
3.3 Socioeconomic factors at aggregated level	17
4. PSYCHOSOCIAL FACTORS	18
4.1 Work related factors	19
4.2 Perceived control over own life and health	28
4.3 Social support and social networks	31

3 .....	35
POPULATIONS AND METHODS	35
1. POPULATIONS	35
1.1 National samples	37
1.2 Community samples	38
2. DESCRIPTION OF THE DATA	44
2.1 Socioeconomic status	45
2.2 Psychosocial factors not related to work	46
2.3 Work-related psychosocial factors	48
2.4 Life-style risk factors	49
3. STATISTICAL POWER OF THE STUDY	50
4. STATISTICAL ANALYSIS	52
4.1 Strategy of analysis	52
4.2 Restrictions of analysis	53
4.3 Missing values	54
4.4 Software	54
4 .....	55
RESULTS	55
1. DESCRIPTIVE CHARACTERISTICS OF STUDY SUBJECTS AND POPULATIONS	56
1.1 Countries	56
1.2 Study subjects	57
1.3 National samples	58
1.4 Community samples	61
2. SOCIOECONOMIC CHARACTERISTICS AND MARITAL STATUS	64
2.1 The role of socioeconomic variables in national samples	64
2.2 The role of socioeconomic variables in five community samples	80
3. PERCEIVED CONTROL AND OTHER PSYCHO-SOCIAL FACTORS NOT RELATED TO WORK	90
3.1 The role of perceived control and other psychosocial factors not related to work in seven national samples	90
3.2 The role of perceived control in five community samples	103
4. MEASURES OF SOCIOECONOMIC INEQUALITY AT THE POPULATION LEVEL	110
5. WORK RELATED PSYCHOSOCIAL FACTORS	117
5.1 Work-related psychosocial factors in national samples	118
5.2 Work-related psychosocial factors in community samples	120
6. ANALYSES USING OTHER ENDPOINTS	139
6.1 Physical functioning	139

6.2 Other definition of self-rated health	141
6.3 Self-reported history of cardiovascular disease	143
5 .....	147
DISCUSSION	147
1. METHODOLOGICAL ISSUES	148
1.1 Representativeness of the sample	148
1.2 Limitations of the cross-sectional character of the study	150
1.3 Random error	151
1.4 Misclassification	151
1.5 Confounding	153
1.6 Relevance of statistical techniques used in the analysis	153
2. CONSISTENCY OF THE RESULTS WITH OTHER STUDIES	157
2.1 Prevalence of self-rated health	157
2.2 Life-style risk factors	157
2.3 Socioeconomic factors on individual level	159
2.4 Psychosocial factors not related to work	165
2.5 Inequalities measured at the aggregated level	167
2.6 Psychosocial factors related to work	171
3. DOES THIS RESEARCH HELP TO UNDERSTAND THE HEALTH CRISIS IN CCEE?	173
6 .....	177
CONCLUSIONS	177
References .....	179
Appendix 1 .....	191
CHEWE QUESTIONNAIRE	191
Appendix 2 .....	201
PHYSICAL FUNCTIONING	201
Appendix 3 .....	203
CODING OF WORK CHARACTERISTICS	203
