## **PART I EXERCISE PHYSIOLOGY OF THE HEALTHY CHILD**

<b>Chapter 1</b>	<b>Physiologic and Perceptual Responses to Exercise in the Healthy Child</b>	<b>3</b>
	Size-Dependent and Size-Independent Differences . . . . .	4
	Metabolic Responses to Exercise in Children . . . . .	4
	Maximal Aerobic Power . . . . .	5
	Mechanical Efficiency and Economy of Movement . . . . .	7
	Anaerobic Exercise . . . . .	12
	O <sub>2</sub> Uptake On-Transients . . . . .	18
	Recovery Following Exercise . . . . .	19
	Morphologic and Functional "Specialization". . . . .	22
	Cardiovascular Response to Exercise. . . . .	23
	Pulmonary Response to Exercise . . . . .	31
	Effects of Growth and Maturation on Muscle Strength . . . . .	35
	Effects of Growth and Maturation on Bone . . . . .	37
	Prolonged Exercise . . . . .	38
	Warm-Up Effect . . . . .	39
	Perception of Exercise Intensity . . . . .	40
	Immune Response to Exercise . . . . .	44
	Training . . . . .	46
	Window of Opportunity for Trainability. . . . .	50
	Training and the Bone . . . . .	58
	Physiologic Effect of Detraining . . . . .	58
<b>Chapter 2</b>	<b>Habitual Activity and Energy Expenditure in the Healthy Child</b>	<b>61</b>
	Definitions . . . . .	61
	Physical Activity and Physical Fitness . . . . .	62
	Age and Maturation Changes in Physical Activity and Energy Expenditure . . . . .	62
	Gender Differences in Physical Activity and Energy Expenditure . . . . .	64

	Tracking of Habitual Physical Activity . . . . .	65
	Factors That Affect Physical Activity in Children and Adolescents . . . . .	66
<b>Chapter 3</b>	<b>Climate, Body Fluids, and the Exercising Child</b>	<b>69</b>
	Heat Stress and Heat Strain . . . . .	69
	Heat Production and Heat Exchange . . . . .	70
	Physiologic and Behavioral Means of Thermoregulation . . . . .	71
	Geometric and Physiologic Characteristics of Children Relevant to Thermoregulation . . . . .	71
	Sweating Pattern . . . . .	73
	Effectiveness of Thermoregulation and Heat Tolerance During Exercise . . . . .	77
	Physical and Physiologic Responses to Cold Climate . . . . .	79
	Implications of Cold Climate for Health . . . . .	82
	Acclimatization and Acclimation to Exercise in the Heat . . . . .	82
	Effect of Training on Thermoregulation . . . . .	84
	Fluid and Electrolyte Balance . . . . .	84
	Health Hazards in Hot Climates . . . . .	91
	Guidelines for the Conduct of Athletic Events in the Heat . . . . .	99
	Guidelines for the Conduct of Athletic Events in the Cold . . . . .	101
<b>PART II</b>	<b>CLINICAL PERSPECTIVES OF CHILDREN AND EXERCISE</b>	
<b>Chapter 4</b>	<b>Children and Exercise in a Clinical Context—an Overview</b>	<b>105</b>
	Habitual Activity and Disease . . . . .	105
	Disease As a Direct and Indirect Cause of Hypoactivity . . . . .	106
	“Non-Disease” As a Cause of Hypoactivity . . . . .	107
	Effects of Disease on Physical Fitness . . . . .	107
	Exercise As a Diagnostic Tool in Pediatrics . . . . .	110
	Beneficial Effects of Physical Activity for the Child With a Chronic Disease . . . . .	111
	The Exercise Prescription . . . . .	112
	The Need for Motivation . . . . .	114
	Deleterious Effects of Exercise . . . . .	114
<b>Chapter 5</b>	<b>Physical Activity and Preventive Health Care in Children and Adolescents</b>	<b>117</b>
	The Exercise-Health Link in Adults . . . . .	118
	The Pediatric Rationale . . . . .	121

Exercise in Children and Risk Factors for Adult Chronic Disease. . . . .	122
Risk Factors and Exercise in Youth: Weighing the Evidence . . . . .	129
Tracking of Physical Activity . . . . .	131
Defining Exercise Promotion Strategies . . . . .	132

## **PART III EXERCISE AND PEDIATRIC DISEASES**

<b>Chapter 6 Pulmonary Diseases</b>	<b>139</b>
Asthma . . . . .	139
Bronchopulmonary Dysplasia . . . . .	161
Cystic Fibrosis . . . . .	162
<b>Chapter 7 Cardiovascular Diseases</b>	<b>177</b>
Congenital Heart Disease . . . . .	177
Noncongenital Heart Disease. . . . .	193
Cardiac Exercise Rehabilitation Programs . . . . .	198
Risks of Exercise . . . . .	199
Cardiac Non-Disease in Children. . . . .	206
Complete Heart Block and Pacemakers . . . . .	210
Systemic Hypertension . . . . .	213
<b>Chapter 8 Endocrine Diseases</b>	<b>219</b>
Type 1 Diabetes Mellitus . . . . .	219
Type 2 Diabetes Mellitus . . . . .	232
Growth Hormone Deficiency . . . . .	233
<b>Chapter 9 Nutritional Diseases</b>	<b>237</b>
Anorexia Nervosa . . . . .	237
Obesity . . . . .	240
Undernutrition. . . . .	263
<b>Chapter 10 Neuromuscular and Musculoskeletal Diseases</b>	<b>269</b>
Cerebral Palsy . . . . .	269
Chronic Fatigue Syndrome . . . . .	282
Epilepsy . . . . .	282
Extremely Low Birth Weight . . . . .	286
Juvenile Idiopathic Arthritis . . . . .	288
McArdle's Disease. . . . .	291

Myelomeningocele. . . . .	292
Muscular Dystrophy. . . . .	294
Scoliosis . . . . .	301

## **Chapter 11 Hematologic, Oncologic, and Renal Diseases 305**

Anemia . . . . .	305
Hemophilia. . . . .	313
Bone Marrow Transplantation . . . . .	314
Exercise and Cancer . . . . .	315
Chronic Renal Disease. . . . .	317

## **Chapter 12 Emotional and Mental Disorders 323**

Scope of the Problem . . . . .	324
An Overview of Exercise and Mental Health in Adults. . . . .	325
Studies in Children and Adolescents. . . . .	328
Summary. . . . .	336

Appendix I Norms	337
Appendix II Procedures for Exercise Testing in Children	343
Appendix III Methods of Determining Physical Activity and Energy Expenditure	367
Appendix IV Energy Expenditure During Various Activities and Sports When Performed by Children and Adolescents	381
Appendix V Scaling for Size Differences	383
Appendix VI Glossary of Terms	387
