I  Introduction  1

PART I  THE SOMATOFORM DISSOCIATION QUESTIONNAIRE  9

II  Somatoform Dissociative Phenomena: A Janetian Perspective  11
   Introduction  11
   Mental Stigmata and Mental Accidents  13
   Mental Stigmata: Negative Dissociative Symptoms  14
      Anesthesia  15
      Amnesia  16
      Motor Disturbances  16
   Suggestibility  17
   Mental Accidents: Positive Dissociative Symptoms  17
      Subconscious Fixed Ideas and Hysterical Accidents  17
      Hysterical Attacks: Reexperiences of Traumatic Events  19
      Somnambulisms: Complex Dissociative (Identity) States  19
      Deliriums: Dissociative Psychotic Episodes  20
   Case Example  20
   Lisa's Mental Stigmata: Negative Dissociative Symptoms  21
      Anesthesia  21
      Amnesia  22
      Motor Disturbances  22
   Lisa's Mental Accidents: Positive, or Intrusion Symptoms  22
      Subconscious Fixed Ideas  22
      Hysterical Attacks  22
      Somnambulisms: Complex Dissociative (Identity) States  23
   Conclusion  23
   References  23

III  The Development and Psychometric Characteristics of the
    Somatoform Dissociation Questionnaire (SDQ-20)  26
   Introduction  26
   Methods  28
TABLE OF CONTENTS

VII Dissociative Disorders and Somatoform Dissociation: Effects of Indoctrination? A Correspondence in the British Journal of Psychiatry 82
   I. Dissociative Pathology Discriminates Between Bipolar Mood Disorder and dissociative Disorder 82
   References 83
   II. Merskey’s Response 83
   References 84
   III. Somatoform Dissociation is Unlikely to be a Result of Indoctrination by Therapists 84
   References 85

PART II TRAUMA, SOMATOFORM DISSOCIATION, AND DEFENSE 87

VIII Degree of Somatoform and Psychological Dissociation in Dissociative Disorder is Correlated with Reported Trauma 89
   Introduction 89
   Methods 91
      Subjects 91
      Instruments 92
      Scoring and Data Analysis 93
   Results 94
      Prevalence of Specific Traumatic Experiences 94
      Trauma Composite Scores 94
      Relationship of Trauma Composite Scores to Somatoform and Psychological Dissociation 96
      Age at Onset of Trauma, its Duration, Perpetrators, and Posttraumatic Support 98
      Repeated Analyses with Women Only 99
      Comparisons Between Dissociative Disorder Patients with and Without Reported Corroborative Evidence of Traumatic Memories 99
      Repeated Analyses Deleting Subjective Estimation of Impact from the Composite Scores 99
   Discussion 99
   References 103

IX Animal Defensive Reactions as a Model for Trauma-induced Dissociative Reactions 108
   Introduction 108
   Animal Defensive States 109
      Pre-encounter Defense 110
      Post-encounter Defensive Behavior: Flight, Freeze, and Fight 110
      Circa-strike Defense: Analgesia, Emotional Numbing, and the Startle Response 111
Post-strike Behavior: Pain and Recuperation 111
Inescapable Shock 112
Defense in Social Conflict Situations, and Pain 113
Early Availability and Rapid Maturation of Defensive Responses in Animals 113
Symptoms of Traumatized Individuals and Those with Dissociative Disorders as Related to Animal Defensive and Recuperative Response-sets 114
Freezing 115
Analgesia, Anesthesia, and Emotional Numbing 116
Pain 116
Early Availability and Maturation of Human Defense 116
Summary and Discussion 118
References 119

X Somatoform Dissociative Symptoms as Related to Animal Defensive Reactions to Predatory Imminence and Injury 125
Introduction 125
Methods 129
Participants and Procedure 129
Instruments 130
Data Analysis 131
Results 131
Discussion 137
References 141

XI Evidence for Associations Among Somatoform Dissociation, Psychological Dissociation, and Reported Trauma in Chronic Pelvic Pain Patients 146
Introduction 146
Methods 149
Subjects 149
Measurements 149
Procedure 151
Data Analysis 151
Results 152
Discussion 156
References 158

XII Peritraumatic Somatoform and Psychological Dissociation in Relation to Recall of Childhood Sexual Abuse 161
Introduction 161
Current and Peritraumatic Psychological Dissociation and Trauma 162
Current and Peritraumatic Somatoform Dissociation and Threat to Bodily Integrity 163
Peritraumatic Dissociation and Recall of Trauma 164
Methods 165
   Participants 165
   Instruments 165
   Procedure 167
   Data Analysis 167
Results 168
   The SDQ-P 168
   Prevalence of Types of CSA Recall and the Relationship of Recall
   with Peritraumatic Dissociation 168
   Prevalence of Trauma, Composite Trauma Scores, and Types
   of Recall 169
   Composite Trauma Scores and Peritraumatic Dissociation 169
   Peritraumatic Dissociation and Reported Severity of Childhood
   Sexual Abuse: Interview Data 171
   Peritraumatic Somatoform Dissociation, Reported CSA, and
   Reported Physical Abuse 171
   Corroboration of Reported Childhood Sexual Abuse 171
Discussion 172
References 174

XIII The Psychometric Characteristics of the Traumatic Experiences
Checklist (TEC): First Findings Among Psychiatric
Outpatients 179
Introduction 179
Methods 182
   Demographics 182
   Instruments 182
   Procedure 185
   Data Analysis 185
Results 185
   TEC Reliability 185
   Reported Trauma Among Men and Women 186
   TEC Concurrent Validity 187
   TEC Criterion-Related Validity 188
   TEC Trauma Area Presence Scores 188
   Trauma Area Severity Scores 189
Discussion 189
References 191

XIV Summary, Discussion, and Future Directions 195
Part I 195
   The Somatoform Dissociation Questionnaire 195
   Somatoform Dissociation in Various Diagnostic Categories and
   Among Various Cultures 198
   The SDQ-20 as a Therapy Evaluation Instrument 201
   Somatoform Dissociation and Iatrogenesis 201
Part II  201
  Somatoform Dissociation and Trauma  201
  Somatoform Dissociation and Defense  202
  Chronic Pelvic Pain, Somatoform Dissociation, and Reported Trauma  205
  Dissociation: A Dimensional or Typological Phenomenon?  207
  Are Dissociative Symptoms State-Dependent?  210
Conclusion  211
References  212

Appendices
  1. Somatoform Dissociation Questionnaire (SDQ-20)  216
  2. Somatoform Dissociation Questionnaire (SDQ-5)  220
  3. Traumatic Experiences Checklist (TEC)  223
