

Preface .....	vii
Acknowledgments .....	viii
<b>1 Overview</b> .....	1
I. Synopsis .....	1
II. Concerns in Medicine .....	1
III. Host-Parasite Equilibrium .....	1
IV. Development of the Acquired Immune System .....	2
V. Clonal Selection Theory .....	4
<b>2 Antigens</b> .....	5
I. Definitions .....	5
II. Factors Determining Antigenicity .....	5
III. Examples of Antigens .....	5
<b>3 Innate Immunity</b> .....	7
I. Fundamental Characteristics .....	7
II. Defensive Mechanisms .....	7
III. Acute Phase Response (APR) .....	10
IV. Pathogen Recognition Systems .....	10
<b>4 Antibodies</b> .....	13
I. General Properties .....	13
II. IgG .....	15
III. IgM .....	17
IV. IgA .....	17
V. IgE .....	19
VI. IgD .....	19
<b>5 Immunogenetics</b> .....	20
I. Genetic Control of Immunoglobulin Chain Synthesis .....	20
II. Genetic Control of Human Leukocyte Antigens (HLAs) .....	20
III. Genetic Control of the T-Cell Antigenic Receptor (TCR) .....	24

<b>6</b>	<b>Immunologic Assays</b> .....	26
	I. Overview .....	26
	II. Protection Tests .....	26
	III. Agglutination Tests .....	26
	IV. Precipitation Reactions .....	27
	V. Complement Fixation .....	29
	VI. Fluorescent Antibody .....	31
	VII. Western Blot .....	31
	VIII. Cell Counting and Flow Cytometry .....	31
	IX. Reverse Transcription Polymerase Chain Reaction (RT-PCR) .....	34
	X. DNA Microarrays .....	34
<b>7</b>	<b>The Immune Response</b> .....	35
	I. Humoral Immunity .....	35
	II. Cell-Mediated Immunity (CMI) .....	39
<b>8</b>	<b>Signal Transduction in Immune Cells</b> .....	43
	I. Effective Immune Responses Require Communication Between a Wide Range of Cell Types .....	43
	II. Receptor Architecture and Fundamental Characteristics .....	44
	III. Signaling Molecules .....	48
	IV. Pathways .....	49
<b>9</b>	<b>Inflammation</b> .....	53
	I. Introduction .....	53
	II. Inflammation Process .....	53
	III. Kinetics .....	55
	IV. Mediators of Inflammation .....	55
<b>10</b>	<b>Hypersensitivity Diseases</b> .....	59
	I. Overview .....	59
	II. Anaphylaxis (Type I) Reactions .....	59
	III. Cell Surface Antigen–Antibody (Ag–Ab) Cytotoxicity (Type II) Reactions .....	62
	IV. Antigen–Antibody (Ag–Ab) Complex (Type III) Reactions .....	63
	V. Delayed-Type Hypersensitivity (Type IV) Reactions .....	65
<b>11</b>	<b>Immunodeficiency Diseases</b> .....	66
	I. Overview .....	66
	II. Developmental Immunodeficiency Disorders .....	66
	III. Acquired Immunodeficiency Syndrome (AIDS) .....	68
	IV. Cytokine and Chemokine Deficiencies .....	70
	V. Senescence (Aging) of the Immune Response .....	70

<b>12</b>	<b>Autoimmune Disorders</b> .....	71
	I. Overview .....	71
	II. Immunoregulation Breakdown .....	71
	III. Systemic Autoimmune Disorders .....	72
	IV. Organ-Specific Autoimmune Disorders .....	73
<b>13</b>	<b>Immunologic Aspects of Transplantation</b> .....	76
	I. Histocompatibility .....	76
	II. Complications of Organ Transplantation .....	77
	III. Immunosuppression .....	78
<b>14</b>	<b>Cancer Immunology</b> .....	80
	I. Definition .....	80
	II. Oncogenes .....	80
	III. Cancer and the Immune System .....	80
	IV. Cancer Immunotherapy .....	81
<b>15</b>	<b>Immunization</b> .....	83
	I. Overview .....	83
	II. Specific Vaccines .....	84
	III. Adjuvants .....	88
	<b>Study Questions and Answers</b> .....	89
