Contents

Preface ix

Chapter 1 The Minimax Theorem (Game Theory) 1

Deadly Games ▪ Games of Strategy ▪ Two-Person, Zero-Sum Games ▪ The Concord Arsenal Game ▪ Keep 'Em Guessing ▪ The Minimax Theorem ▪ Fighters and Bombers ▪ Computing Optimal Mixed Strategies ▪ Game Theory—A Taxonomy ▪ Chicken ▪ The Cuban Missile Crisis ▪ Mixed-Motive Games ▪ Leader ▪ Battle of the Sexes ▪ The Prisoner's Dilemma ▪ The Emergence of Cooperation ▪ Real Worlds, Artificial Games

Chapter 2 The Brouwer Fixed-Point Theorem (Topology) 43

Needles and Haystacks ▪ The Shape of Space ▪ Topology ▪ Topological Equivalence ▪ The Fixed-Point Game ▪ Solving Equations ▪ Dollars and Sense ▪ Guns and Butter ▪ Disks, Squares, and Fixed Points ▪ Compactness and Convexity ▪ Porcupines and Cyclones ▪ Determination of Fixed Points ▪ The Fixed-Point Property ▪ Reaching for the Moon ▪ Occupational Mobility ▪ Top Dog

Chapter 3 Morse's Theorem (Singularity Theory) 85

That's the Way the Paper Crumples ▪ A Taylor's Tale ▪ Tugging on Taylor's "Tayl" ▪ Look-Alikes ▪ Morse's Theorem ▪ The Thom Classification Theorem ▪ Bridges and Beams ▪ Bifurcations, Catastrophes, and Equilibria ▪ How Local is Local? ▪ The Shape of Things ▪ Laughs and Cries

Chapter 4 The Halting Theorem (Theory of Computation) 135

Calculation versus Computation ▪ Turing's Miraculous Machine ▪ The Uncomputable ▪ Ad Infinitum? ▪ Form and Content ▪ The Undecidable ▪ Manufactured Minds ▪ Omega Is the End ▪ Tough Times ▪ Models of Computation

Chapter 5 The Simplex Method (Optimization Theory) 181

The Math of a Traveler ▪ Thinking Linearly ▪ The Simplex Method ▪ Duals and Diets ▪ Integer Programming ▪ Graphs and Bridges ▪ And So It Flows ▪ The Welfare of the Masses ▪ Hill Climbing ▪ Routing in Networks ▪ Getting the Most for Your Money
