CHAPTER 1

Explanations

| | |
|---|----|
| 1.1 Sallies | 3 |
| 1.2 Scope and limits of the book | 3 |
| 1.2.1 <i>An outline history</i> | 3 |
| 1.2.2 <i>Mathematical aspects</i> | 4 |
| 1.2.3 <i>Historical presentation</i> | 6 |
| 1.2.4 <i>Other logics, mathematics and philosophies</i> | 7 |
| 1.3 Citations, terminology and notations | 9 |
| 1.3.1 <i>References and the bibliography</i> | 9 |
| 1.3.2 <i>Translations, quotations and notations</i> | 10 |
| 1.4 Permissions and acknowledgements | 11 |

CHAPTER 2

Preludes: Algebraic Logic and Mathematical Analysis up to 1870

| | |
|---|----|
| 2.1 Plan of the chapter | 14 |
| 2.2 'Logique' and algebras in French mathematics | 14 |
| 2.2.1 <i>The 'logique' and clarity of 'idéologie'</i> | 14 |
| 2.2.2 <i>Lagrange's algebraic philosophy</i> | 15 |
| 2.2.3 <i>The many senses of 'analysis'</i> | 17 |
| 2.2.4 <i>Two Lagrangian algebras: functional equations and differential operators</i> | 17 |
| 2.2.5 <i>Autonomy for the new algebras</i> | 19 |
| 2.3 Some English algebraists and logicians | 20 |
| 2.3.1 <i>A Cambridge revival: the 'Analytical Society', Lacroix, and the professing of algebras</i> | 20 |
| 2.3.2 <i>The advocacy of algebras by Babbage, Herschel and Peacock</i> | 20 |
| 2.3.3 <i>An Oxford movement: Whately and the professing of logic</i> | 22 |
| 2.4 A London pioneer: De Morgan on algebras and logic | 25 |
| 2.4.1 <i>Summary of his life</i> | 25 |
| 2.4.2 <i>De Morgan's philosophies of algebra</i> | 25 |
| 2.4.3 <i>De Morgan's logical career</i> | 26 |
| 2.4.4 <i>De Morgan's contributions to the foundations of logic</i> | 27 |
| 2.4.5 <i>Beyond the syllogism</i> | 29 |
| 2.4.6 <i>Contretemps over 'the quantification of the predicate'</i> | 30 |
| 2.4.7 <i>The logic of two-place relations, 1860</i> | 32 |
| 2.4.8 <i>Analogies between logic and mathematics</i> | 35 |
| 2.4.9 <i>De Morgan's theory of collections</i> | 36 |
| 2.5 A Lincoln outsider: Boole on logic as applied mathematics | 37 |
| 2.5.1 <i>Summary of his career</i> | 37 |
| 2.5.2 <i>Boole's 'general method in analysis', 1844</i> | 39 |
| 2.5.3 <i>The mathematical analysis of logic, 1847: 'elective symbols' and laws</i> | 40 |
| 2.5.4 <i>'Nothing' and the 'Universe'</i> | 42 |
| 2.5.5 <i>Propositions, expansion theorems, and solutions</i> | 43 |

| | | |
|-------|---|----|
| 2.5.6 | The laws of thought, 1854: modified principles and extended methods | 46 |
| 2.5.7 | Boole's new theory of propositions | 49 |
| 2.5.8 | The character of Boole's system | 50 |
| 2.5.9 | Boole's search for mathematical roots | 53 |
| 2.6 | The semi-followers of Boole | 54 |
| 2.6.1 | Some initial reactions to Boole's theory | 54 |
| 2.6.2 | The reformulation by Jevons | 56 |
| 2.6.3 | Jevons versus Boole | 59 |
| 2.6.4 | Followers of Boole and /or Jevons | 60 |
| 2.7 | Cauchy, Weierstrass and the rise of mathematical analysis | 63 |
| 2.7.1 | Different traditions in the calculus | 63 |
| 2.7.2 | Cauchy and the Ecole Polytechnique | 64 |
| 2.7.3 | The gradual adoption and adaptation of Cauchy's new tradition | 67 |
| 2.7.4 | The refinements of Weierstrass and his followers | 68 |
| 2.8 | Judgement and supplement | 70 |
| 2.8.1 | Mathematical analysis versus algebraic logic | 70 |
| 2.8.2 | The places of Kant and Bolzano | 71 |

CHAPTER 3

Cantor: Mathematics as *Mengenlehre*

| | | |
|-------|--|-----|
| 3.1 | Prefaces | 75 |
| 3.1.1 | Plan of the chapter | 75 |
| 3.1.2 | Cantor's career | 75 |
| 3.2 | The launching of the <i>Mengenlehre</i> , 1870–1883 | 79 |
| 3.2.1 | Riemann's thesis: the realm of discontinuous functions | 79 |
| 3.2.2 | Heine on trigonometric series and the real line, 1870–1872 | 81 |
| 3.2.3 | Cantor's extension of Heine's findings, 1870–1872 | 83 |
| 3.2.4 | Dedekind on irrational numbers, 1872 | 85 |
| 3.2.5 | Cantor on line and plane, 1874–1877 | 88 |
| 3.2.6 | Infinite numbers and the topology of linear sets, 1878–1883 | 89 |
| 3.2.7 | The <i>Grundlagen</i> , 1883: the construction of number-classes | 92 |
| 3.2.8 | The <i>Grundlagen</i> : the definition of continuity | 95 |
| 3.2.9 | The successor to the <i>Grundlagen</i> , 1884 | 96 |
| 3.3 | Cantor's <i>Acta mathematica</i> phase, 1883–1885 | 97 |
| 3.3.1 | Mittag-Leffler and the French translations, 1883 | 97 |
| 3.3.2 | Unpublished and published 'communications', 1884–1885 | 98 |
| 3.3.3 | Order-types and partial derivatives in the 'communications' | 100 |
| 3.3.4 | Commentators on Cantor, 1883–1885 | 102 |
| 3.4 | The extension of the <i>Mengenlehre</i> , 1886–1897 | 103 |
| 3.4.1 | Dedekind's developing set theory, 1888 | 103 |
| 3.4.2 | Dedekind's chains of integers | 105 |
| 3.4.3 | Dedekind's philosophy of arithmetic | 107 |
| 3.4.4 | Cantor's philosophy of the infinite, 1886–1888 | 109 |
| 3.4.5 | Cantor's new definitions of numbers | 110 |
| 3.4.6 | Cardinal exponentiation: Cantor's diagonal argument, 1891 | 110 |
| 3.4.7 | Transfinite cardinal arithmetic and simply ordered sets, 1895 | 112 |
| 3.4.8 | Transfinite ordinal arithmetic and well-ordered sets, 1897 | 114 |
| 3.5 | Open and hidden questions in Cantor's <i>Mengenlehre</i> | 114 |
| 3.5.1 | Well-ordering and the axioms of choice | 114 |

| | |
|---|-----|
| 3.5.2 <i>What was Cantor's 'Cantor's continuum problem'?</i> | 116 |
| 3.5.3 <i>"Paradoxes" and the absolute infinite</i> | 117 |
| 3.6 Cantor's philosophy of mathematics | 119 |
| 3.6.1 <i>A mixed position</i> | 119 |
| 3.6.2 <i>(No) logic and metamathematics</i> | 120 |
| 3.6.3 <i>The supposed impossibility of infinitesimals</i> | 121 |
| 3.6.4 <i>A contrast with Kronecker</i> | 122 |
| 3.7 Concluding comments: the character of Cantor's achievements | 124 |

CHAPTER 4

Parallel Processes in Set Theory, Logics and Axiomatics, 1870s–1900s

| | |
|--|-----|
| 4.1 Plans for the chapter | 126 |
| 4.2 The splitting and selling of Cantor's <i>Mengenlehre</i> | 126 |
| 4.2.1 <i>National and international support</i> | 126 |
| 4.2.2 <i>French initiatives, especially from Borel</i> | 127 |
| 4.2.3 <i>Couturat outlining the infinite, 1896</i> | 129 |
| 4.2.4 <i>German initiatives from Klein</i> | 130 |
| 4.2.5 <i>German proofs of the Schröder-Bernstein theorem</i> | 132 |
| 4.2.6 <i>Publicity from Hilbert, 1900</i> | 134 |
| 4.2.7 <i>Integral equations and functional analysis</i> | 135 |
| 4.2.8 <i>Kempe on 'mathematical form'</i> | 137 |
| 4.2.9 <i>Kempe—who?</i> | 139 |
| 4.3 American algebraic logic: Peirce and his followers | 140 |
| 4.3.1 <i>Peirce, published and unpublished</i> | 141 |
| 4.3.2 <i>Influences on Peirce's logic: father's algebras</i> | 142 |
| 4.3.3 <i>Peirce's first phase: Boolean logic and the categories, 1867–1868</i> | 144 |
| 4.3.4 <i>Peirce's virtuoso theory of relatives, 1870</i> | 145 |
| 4.3.5 <i>Peirce's second phase, 1880: the propositional calculus</i> | 147 |
| 4.3.6 <i>Peirce's second phase, 1881: finite and infinite</i> | 149 |
| 4.3.7 <i>Peirce's students, 1883: duality, and 'Quantifying' a proposition</i> | 150 |
| 4.3.8 <i>Peirce on 'icons' and the order of 'quantifiers', 1885</i> | 153 |
| 4.3.9 <i>The Peirceans in the 1890s</i> | 154 |
| 4.4 German algebraic logic: from the Grassmanns to Schröder | 156 |
| 4.4.1 <i>The Grassmanns on duality</i> | 156 |
| 4.4.2 <i>Schröder's Grassmannian phase</i> | 159 |
| 4.4.3 <i>Schröder's Peircean 'lectures' on logic</i> | 161 |
| 4.4.4 <i>Schröder's first volume, 1890</i> | 161 |
| 4.4.5 <i>Part of the second volume, 1891</i> | 167 |
| 4.4.6 <i>Schröder's third volume, 1895: the 'logic of relatives'</i> | 170 |
| 4.4.7 <i>Peirce on and against Schröder in The monist, 1896–1897</i> | 172 |
| 4.4.8 <i>Schröder on Cantorian themes, 1898</i> | 174 |
| 4.4.9 <i>The reception and publication of Schröder in the 1900s</i> | 175 |
| 4.5 Frege: arithmetic as logic | 177 |
| 4.5.1 <i>Frege and Frege'</i> | 177 |
| 4.5.2 <i>The 'concept-script' calculus of Frege's 'pure thought', 1879</i> | 179 |
| 4.5.3 <i>Frege's arguments for logicising arithmetic, 1884</i> | 183 |
| 4.5.4 <i>Kerry's conception of Fregean concepts in the mid 1880s</i> | 187 |
| 4.5.5 <i>Important new distinctions in the early 1890s</i> | 187 |
| 4.5.6 <i>The 'fundamental laws' of logicised arithmetic, 1893</i> | 191 |

| | | |
|-------|---|-----|
| 6.6.3 | <i>Other paradoxes: three too large numbers</i> | 312 |
| 6.6.4 | <i>Three passions and three calamities, 1901–1902</i> | 314 |
| 6.7 | Refining logicism, 1901–1902 | 315 |
| 6.7.1 | <i>Attempting Part 1 of The principles, May 1901</i> | 315 |
| 6.7.2 | <i>Part 2, June 1901: cardinals and classes</i> | 316 |
| 6.7.3 | <i>Part 1 again, April–May 1902: the implicational logicism</i> | 316 |
| 6.7.4 | <i>Part 1: discussing the indefinables</i> | 318 |
| 6.7.5 | <i>Part 7, June 1902: dynamics without statics; and within logic?</i> | 322 |
| 6.7.6 | <i>Sort-of finishing the book</i> | 323 |
| 6.7.7 | <i>The first impact of Frege, 1902</i> | 323 |
| 6.7.8 | <i>Appendix A on Frege</i> | 326 |
| 6.7.9 | <i>Appendix B: Russell's first attempt to solve the paradoxes</i> | 327 |
| 6.8 | The roots of pure mathematics? Publishing <i>The principles</i> at last, 1903 | 328 |
| 6.8.1 | <i>Appearance and appraisal</i> | 328 |
| 6.8.2 | <i>A gradual collaboration with Whitehead</i> | 331 |

CHAPTER 7

Russell and Whitehead Seek the *Principia Mathematica*, 1903–1913

| | | |
|-------|---|-----|
| 7.1 | Plan of the chapter | 333 |
| 7.2 | Paradoxes and axioms in set theory, 1903–1906 | 333 |
| 7.2.1 | <i>Uniting the paradoxes of sets and numbers</i> | 333 |
| 7.2.2 | <i>New paradoxes, mostly of naming</i> | 334 |
| 7.2.3 | <i>The paradox that got away: heterology</i> | 336 |
| 7.2.4 | <i>Russell as cataloguer of the paradoxes</i> | 337 |
| 7.2.5 | <i>Controversies over axioms of choice, 1904</i> | 339 |
| 7.2.6 | <i>Uncovering Russell's 'multiplicative axiom', 1904</i> | 340 |
| 7.2.7 | <i>Keyser versus Russell over infinite classes, 1903–1905</i> | 342 |
| 7.3 | The perplexities of denoting, 1903–1906 | 342 |
| 7.3.1 | <i>First attempts at a general system, 1903–1905</i> | 342 |
| 7.3.2 | <i>Propositional functions, reducible and identical</i> | 344 |
| 7.3.3 | <i>The mathematical importance of definite denoting functions</i> | 346 |
| 7.3.4 | <i>'On denoting' and the complex, 1905</i> | 348 |
| 7.3.5 | <i>Denoting, quantification and the mysteries of existence</i> | 350 |
| 7.3.6 | <i>Russell versus MacColl on the possible, 1904–1908</i> | 351 |
| 7.4 | From mathematical induction to logical substitution, 1905–1907 | 354 |
| 7.4.1 | <i>Couturat's Russellian principles</i> | 354 |
| 7.4.2 | <i>A second pas de deux with Paris: Boutroux and Poincaré on logicism</i> | 355 |
| 7.4.3 | <i>Poincaré on the status of mathematical induction</i> | 356 |
| 7.4.4 | <i>Russell's position paper, 1905</i> | 357 |
| 7.4.5 | <i>Poincaré and Russell on the vicious circle principle, 1906</i> | 358 |
| 7.4.6 | <i>The rise of the substitutional theory, 1905–1906</i> | 360 |
| 7.4.7 | <i>The fall of the substitutional theory, 1906–1907</i> | 362 |
| 7.4.8 | <i>Russell's substitutional propositional calculus</i> | 364 |
| 7.5 | Reactions to mathematical logic and logicism, 1904–1907 | 366 |
| 7.5.1 | <i>The International Congress of Philosophy, 1904</i> | 366 |
| 7.5.2 | <i>German philosophers and mathematicians, especially Schönflies</i> | 368 |
| 7.5.3 | <i>Activities among the Peanists</i> | 370 |
| 7.5.4 | <i>American philosophers: Royce and Dewey</i> | 371 |
| 7.5.5 | <i>American mathematicians on classes</i> | 373 |

| | | |
|-------|--|-----|
| 7.5.6 | <i>Huntington on logic and orders</i> | 375 |
| 7.5.7 | <i>Judgements from Shearman</i> | 376 |
| 7.6 | Whitehead's role and activities, 1905–1907 | 377 |
| 7.6.1 | <i>Whitehead's construal of the 'material world'</i> | 377 |
| 7.6.2 | <i>The axioms of geometries</i> | 379 |
| 7.6.3 | <i>Whitehead's lecture course, 1906–1907</i> | 379 |
| 7.7 | The sad compromise: logic in tiers | 380 |
| 7.7.1 | <i>Rehabilitating propositional functions, 1906–1907</i> | 380 |
| 7.7.2 | <i>Two reflective pieces in 1907</i> | 382 |
| 7.7.3 | <i>Russell's outline of 'mathematical logic', 1908</i> | 383 |
| 7.8 | The forming of <i>Principia mathematica</i> | 384 |
| 7.8.1 | <i>Completing and funding Principia mathematica</i> | 384 |
| 7.8.2 | <i>The organisation of Principia mathematica</i> | 386 |
| 7.8.3 | <i>The propositional calculus, and logicism</i> | 388 |
| 7.8.4 | <i>The predicate calculus, and descriptions</i> | 391 |
| 7.8.5 | <i>Classes and relations, relative to propositional functions</i> | 392 |
| 7.8.6 | <i>The multiplicative axiom: some uses and avoidance</i> | 395 |
| 7.9 | Types and the treatment of mathematics in <i>Principia mathematica</i> | 396 |
| 7.9.1 | <i>Types in orders</i> | 396 |
| 7.9.2 | <i>Reducing the edifice</i> | 397 |
| 7.9.3 | <i>Individuals, their nature and number</i> | 399 |
| 7.9.4 | <i>Cardinals and their finite arithmetic</i> | 401 |
| 7.9.5 | <i>The generalised ordinals</i> | 403 |
| 7.9.6 | <i>The ordinals and the alephs</i> | 404 |
| 7.9.7 | <i>The odd small ordinals</i> | 406 |
| 7.9.8 | <i>Series and continuity</i> | 406 |
| 7.9.9 | <i>Quantity with ratios</i> | 408 |

CHAPTER 8

The Influence and Place of Logicism, 1910–1930

| | | |
|-------|---|-----|
| 8.1 | Plans for two chapters | 411 |
| 8.2 | Whitehead's and Russell's transitions from logic to philosophy, 1910–1916 | 412 |
| 8.2.1 | <i>The educational concerns of Whitehead, 1910–1916</i> | 412 |
| 8.2.2 | <i>Whitehead on the principles of geometry in the 1910s</i> | 413 |
| 8.2.3 | <i>British reviews of Principia mathematica</i> | 415 |
| 8.2.4 | <i>Russell and Peano on logic, 1911–1913</i> | 416 |
| 8.2.5 | <i>Russell's initial problems with epistemology, 1911–1912</i> | 417 |
| 8.2.6 | <i>Russell's first interactions with Wittgenstein, 1911–1913</i> | 418 |
| 8.2.7 | <i>Russell's confrontation with Wiener, 1913</i> | 419 |
| 8.3 | Logicism and epistemology in America and with Russell, 1914–1921 | 421 |
| 8.3.1 | <i>Russell on logic and epistemology at Harvard, 1914</i> | 421 |
| 8.3.2 | <i>Two long American reviews</i> | 424 |
| 8.3.3 | <i>Reactions from Royce students: Sheffer and Lewis</i> | 424 |
| 8.3.4 | <i>Reactions to logicism in New York</i> | 428 |
| 8.3.5 | <i>Other American estimations</i> | 429 |
| 8.3.6 | <i>Russell's 'logical atomism' and psychology, 1917–1921</i> | 430 |
| 8.3.7 | <i>Russell's 'introduction' to logicism, 1918–1919</i> | 432 |

| | | |
|-------|---|-----|
| 8.4 | Revising logic and logicism at Cambridge, 1917–1925 | 434 |
| 8.4.1 | <i>New Cambridge authors, 1917–1921</i> | 434 |
| 8.4.2 | <i>Wittgenstein's 'Abhandlung' and Tractatus, 1921–1922</i> | 436 |
| 8.4.3 | <i>The limitations of Wittgenstein's logic</i> | 437 |
| 8.4.4 | <i>Towards extensional logicism: Russell's revision of Principia mathematica, 1923–1924</i> | 440 |
| 8.4.5 | <i>Ramsey's entry into logic and philosophy, 1920–1923</i> | 443 |
| 8.4.6 | <i>Ramsey's recasting of the theory of types, 1926</i> | 444 |
| 8.4.7 | <i>Ramsey on identity and comprehensive extensionality</i> | 446 |
| 8.5 | Logicism and epistemology in Britain and America, 1921–1930 | 448 |
| 8.5.1 | <i>Johnson on logic, 1921–1924</i> | 448 |
| 8.5.2 | <i>Other Cambridge authors, 1923–1929</i> | 450 |
| 8.5.3 | <i>American reactions to logicism in mid decade</i> | 452 |
| 8.5.4 | <i>Groping towards metalogic</i> | 454 |
| 8.5.5 | <i>Reactions in and around Columbia</i> | 456 |
| 8.6 | Peripherals: Italy and France | 458 |
| 8.6.1 | <i>The occasional Italian survey</i> | 458 |
| 8.6.2 | <i>New French attitudes in the Revue</i> | 459 |
| 8.6.3 | <i>Commentaries in French, 1918–1930</i> | 461 |
| 8.7 | German-speaking reactions to logicism, 1910–1928 | 463 |
| 8.7.1 | <i>(Neo-)Kantians in the 1910s</i> | 463 |
| 8.7.2 | <i>Phenomenologists in the 1910s</i> | 467 |
| 8.7.3 | <i>Frege's positive and then negative thoughts</i> | 468 |
| 8.7.4 | <i>Hilbert's definitive 'metamathematics', 1917–1930</i> | 470 |
| 8.7.5 | <i>Orders of logic and models of set theory: Löwenheim and Skolem, 1915–1923</i> | 475 |
| 8.7.6 | <i>Set theory and Mengenlehre in various forms</i> | 476 |
| 8.7.7 | <i>Intuitionistic set theory and logic: Brouwer and Weyl, 1910–1928</i> | 480 |
| 8.7.8 | <i>(Neo-)Kantians in the 1920s</i> | 484 |
| 8.7.9 | <i>Phenomenologists in the 1920s</i> | 487 |
| 8.8 | The rise of Poland in the 1920s: the Lvów-Warsaw school | 489 |
| 8.8.1 | <i>From Lvów to Warsaw: students of Twardowski</i> | 489 |
| 8.8.2 | <i>Logics with Łukasiewicz and Tarski</i> | 490 |
| 8.8.3 | <i>Russell's paradox and Leśniewski's three systems</i> | 492 |
| 8.8.4 | <i>Pole apart: Chwistek's 'semantic' logicism at Cracow</i> | 495 |
| 8.9 | The rise of Austria in the 1920s: the Schlick circle | 497 |
| 8.9.1 | <i>Formation and influence</i> | 497 |
| 8.9.2 | <i>The impact of Russell, especially upon Carnap</i> | 499 |
| 8.9.3 | <i>'Logicism' in Carnap's Abriss, 1929</i> | 500 |
| 8.9.4 | <i>Epistemology in Carnap's Aufbau, 1928</i> | 502 |
| 8.9.5 | <i>Intuitionism and proof theory: Brouwer and Gödel, 1928–1930</i> | 504 |

CHAPTER 9

Postludes: Mathematical Logic and Logicism in the 1930s

| | | |
|-------|---|-----|
| 9.1 | Plan of the chapter | 506 |
| 9.2 | Gödel's incompleteness theorem and its immediate reception | 507 |
| 9.2.1 | <i>The consolidation of Schlick's 'Vienna' Circle</i> | 507 |
| 9.2.2 | <i>News from Gödel: the Königsberg lectures, September 1930</i> | 508 |

| | |
|--|-----|
| 9.2.3 Gödel's incompleteness theorem, 1931 | 509 |
| 9.2.4 Effects and reviews of Gödel's theorem | 511 |
| 9.2.5 Zermelo against Gödel: the Bad Elster lectures, September 1931 | 512 |
| 9.3 Logic(ism) and epistemology in and around Vienna | 513 |
| 9.3.1 Carnap for 'metalogic' and against metaphysics | 513 |
| 9.3.2 Carnap's transformed metalogic: the 'logical syntax of language', 1934 | 515 |
| 9.3.3 Carnap on incompleteness and truth in mathematical theories, 1934–1935 | 517 |
| 9.3.4 Dubislav on definitions and the competing philosophies of mathematics | 519 |
| 9.3.5 Behmann's new diagnosis of the paradoxes | 520 |
| 9.3.6 Kaufmann and Waismann on the philosophy of mathematics | 521 |
| 9.4 Logic(ism) in the U.S.A. | 523 |
| 9.4.1 Mainly Eaton and Lewis | 523 |
| 9.4.2 Mainly Weiss and Langer | 525 |
| 9.4.3 Whitehead's new attempt to ground logicism, 1934 | 527 |
| 9.4.4 The <i>début</i> of Quine | 529 |
| 9.4.5 Two journals and an encyclopaedia, 1934–1938 | 531 |
| 9.4.6 Carnap's acceptance of the autonomy of semantics | 533 |
| 9.5 The battle of Britain | 535 |
| 9.5.1 The campaign of Stebbing for Russell and Carnap | 535 |
| 9.5.2 Commentary from Black and Ayer | 538 |
| 9.5.3 Mathematicians—and biologists | 539 |
| 9.5.4 Retiring into philosophy: Russell's return, 1936–1937 | 542 |
| 9.6 European, mostly northern | 543 |
| 9.6.1 Dingler and Burkamp again | 543 |
| 9.6.2 German proof theory after Gödel | 544 |
| 9.6.3 Scholz's little circle at Münster | 546 |
| 9.6.4 Historical studies, especially by Jørgensen | 547 |
| 9.6.5 History-philosophy, especially Cavailles | 548 |
| 9.6.6 Other Francophone figures, especially Herbrand | 549 |
| 9.6.7 Polish logicians, especially Tarski | 551 |
| 9.6.8 Southern Europe and its former colonies | 553 |

CHAPTER 10

The Fate of the Search

| | |
|---|-----|
| 10.1 Influences on Russell, negative and positive | 556 |
| 10.1.1 Symbolic logics: living together and living apart | 556 |
| 10.1.2 The timing and origins of Russell's logicism | 557 |
| 10.1.3 (Why) was Frege (so) little read in his lifetime? | 558 |
| 10.2 The content and impact of logicism | 559 |
| 10.2.1 Russell's obsession with reductionist logic and epistemology | 560 |
| 10.2.2 The logic and its metalogic | 562 |
| 10.2.3 The fate of logicism | 563 |
| 10.2.4 Educational aspects, especially Piaget | 566 |
| 10.2.5 The role of the U.S.A.: judgements in the Schilpp series | 567 |
| 10.3 The panoply of foundations | 569 |
| 10.4 Sallies | 573 |

CHAPTER 11

Transcription of Manuscripts

| | |
|---|-----|
| 11.1 Couturat to Russell, 18 December 1904 | 574 |
| 11.2 Veblen to Russell, 13 May 1906 | 577 |
| 11.3 Russell to Hawtrey, 22 January 1907 (or 1909?) | 579 |
| 11.4 Jourdain's notes on Wittgenstein's first views on Russell's paradox, April 1909 | 580 |
| 11.5 The application of Whitehead and Russell to the Royal Society, late 1909 | 581 |
| 11.6 Whitehead to Russell, 19 January 1911 | 584 |
| 11.7 Oliver Strachey to Russell, 4 January 1912 | 585 |
| 11.8 Quine and Russell, June–July 1935 | 586 |
| 11.8.1 <i>Russell to Quine, 6 June 1935</i> | 587 |
| 11.8.2 <i>Quine to Russell, 4 July 1935</i> | 588 |
| 11.9 Russell to Henkin, 1 April 1963 | 592 |
