

Contents

1 • Basic Definitions and Overview

1

- Nonindependence / 4
- Basic Definitions / 6
 - Distinguishability*¹ / 6
 - Between-Dyads, Within-Dyads, and Mixed Variables* / 7
 - Level of Measurement* / 9
 - Idiographic and Nomothetic Analyses* / 10
 - Dyadic Designs* / 11
- Data Organization / 14
 - Standard Design* / 14
 - Other Designs* / 19
- A Database of Dyadic Studies / 20
- Overview of the Book / 21
- Summary and Conclusions / 23

2 • The Measurement of Nonindependence

25

- Interval Level of Measurement / 27
 - Distinguishable Members* / 27
 - Indistinguishable Members* / 32
- Categorical Measures / 40
 - Distinguishable Members* / 40
 - Indistinguishable Members* / 42
- Consequences of Ignoring Nonindependence / 43
- What Not to Do / 46
- Power Considerations / 48
 - Power of the Test of r* / 48
 - Power of Kappa* / 50
- Summary and Conclusions / 51

3 • Analyzing Between- and Within-Dyads Independent Variables 53

Interval Outcome Measures and Categorical Independent Variables / 54

One Between-Dyads Independent Variable / 54

Multiple Between-Dyads Independent Variables / 60

One Within-Dyads Independent Variable / 61

Multiple Within-Dyads Variables / 65

One Between-Dyads and One Within-Dyads Variable / 67

General Case / 69

Interval Outcome Measures and Interval Independent Variables / 70

Between-Dyads Independent Variable / 70

Within-Dyads Independent Variable / 72

General Case / 74

Categorical Outcome Variables / 74

Within-Dyads Independent Variable / 74

Between-Dyads Independent Variable / 75

Summary and Conclusions / 75

4 • Using Multilevel Modeling to Study Dyads 78

Mixed-Model ANOVA / 79

Multilevel-Model Equations / 82

Multilevel Modeling with Maximum Likelihood / 85

Adaptation of Multilevel Models to Dyadic Data / 87

*Computing the Intraclass Correlation and Variance Explained
with Multilevel Models / 93*

Random Effects with Dyads / 95

Distinguishable Dyads / 95

Summary and Conclusions / 98

5 • Using Structural Equation Modeling to Study Dyads 100

Steps in SEM / 101

Specification / 101

Identification / 102

Estimation / 103

Testing / 104

Confirmatory Factor Analysis / 106

Path Analyses with Dyadic Data / 108

SEM for Dyads with Indistinguishable Members / 111	
<i>Model Fit and Model Comparisons</i> / 113	
<i>Example</i> / 114	
<i>Double-Entry Method</i> / 116	
Summary and Conclusions / 116	

6 • Tests of Correlational Structure and Differential Variance

119

Distinguishable Dyads / 121	
<i>Equality of Variances</i> / 121	
<i>Equality of Correlations</i> / 122	
<i>Latent-Variable Correlations</i> / 127	
<i>Omnibus Test of Distinguishability</i> / 129	
<i>Categorical Variables</i> / 131	
Indistinguishable Dyads / 135	
<i>Correlations</i> / 136	
<i>Latent Variable Correlations</i> / 139	
<i>Comparing Intraclass Correlations</i> / 140	
<i>Variances</i> / 141	
Summary and Conclusions / 141	

7 • Analyzing Mixed Independent Variables: The Actor-Partner Interdependence Model

144

The Model / 145	
Conceptual Interpretation of Actor and Partner Effects / 147	
<i>The Relative Size of Actor and Partner Effects</i> / 147	
<i>Partner-Oriented Interaction Effects</i> / 149	
<i>Actor-Partner Interactions</i> / 150	
Estimation of the APIM: Indistinguishable Dyad Members / 152	
<i>Pooled-Regression Method</i> / 152	
<i>Estimating the APIM with Multilevel Analysis</i> / 158	
<i>Estimating the APIM with SEM</i> / 168	
Estimation of the APIM: Distinguishable Dyads / 170	
<i>Pooled-Regression Method</i> / 170	
<i>Multilevel Modeling</i> / 173	
<i>Structural Equation Modeling</i> / 178	
Power and Effect Size Computation / 179	
Specification Error in the APIM / 181	
Summary and Conclusions / 182	

8 • Social Relations Designs with Indistinguishable Members

- The Basic Data Structures / 188
 - Round-Robin Design* / 188
 - Block Design* / 189
 - Block–Round-Robin Designs* / 190
 - Other Designs* / 190
- Model / 191
 - The SRM Components* / 191
 - Estimation of SRM Effects* / 194
 - The SRM Variances* / 198
 - The SRM Reciprocity Correlations* / 204
 - Self–Actor and Self–Partner Correlations* / 208
 - Actor and Partner Correlations*
 - with Individual-Difference Variables* / 209
 - Dyadic Analysis of Relationship Effects* / 210
 - Multivariate Correlations* / 210
- Details of an SRM Analysis / 211
 - Software* / 211
 - Statistical Issues* / 212
 - Significance Testing* / 213
 - Power* / 214
- Model Assumptions / 215
- Social Relations Analyses: An Example / 218
- Summary and Conclusions / 221

9 • Social Relations Designs with Roles

- SRM Studies of Family Relationships / 224
- Design and Analysis of Studies / 225
- The Model / 226
 - The Components* / 227
 - Generalized and Dyadic Reciprocity* / 228
 - Estimation of Variance in the SRM with Roles* / 228
 - Family Subsystems* / 229
- Application of the SRM with Roles Using Confirmatory Factor Analysis / 231
- The Four-Person Design / 234
 - The Base Model* / 235
- Illustration of the Four-Person Family Design / 239
 - Model Evaluation* / 240
 - Parameter Estimates* / 240
 - Respecifications of the Base Model* / 243

The Three-Person Design / 245	
Base Model / 245	
Illustration / 248	
Alternative Three-Person Models / 250	
Multiple Perspectives on Family Relationships / 252	
Means and Factor Score Estimation / 253	
Constraints on the SRM Effects / 257	
Estimation of SRM Effects for a Particular Family / 258	
Power and Sample Size / 259	
Summary and Conclusions / 260	

10 • One-with-Many Designs

263

Design Issues / 264	
Measuring Nonindependence / 267	
Indistinguishable Partners / 267	
Distinguishable Partners / 269	
The Meaning of Nonindependence in the One-with-Many Design / 271	
Univariate Analysis with Indistinguishable Partners / 272	
Naive Analysis / 273	
Between-Within Analysis / 275	
Multilevel Analysis / 277	
Univariate Estimation with Distinguishable Partners / 284	
Repeated-Measures Analysis of Variance and MANOVA / 284	
Multilevel Analysis / 285	
Structural Equation Modeling / 287	
The Reciprocal One-with-Many Design / 290	
Indistinguishable Partners / 290	
Distinguishable Partners / 293	
Summary and Conclusions / 294	

11 • Social Network Analysis

296

Definitions / 296	
The Representation of a Network / 298	
Network Measures / 301	
Centrality / 301	
Reciprocity / 304	
Triads / 305	
Subgroups / 306	
Density / 309	

The p_1 Model / 309
The Model / 309
Relation to the SRM / 313
Another Look at the Sampson Data / 314
 Summary and Conclusions / 314

12 • Dyadic Indexes

317

Item Measurement Issues / 319
 Measures of Profile Similarity / 321
 Types / 321
 Which Measure to Use? / 325
 Mean and Variance of the Dyadic Index / 327
 Average Measure / 327
 Tests of Heterogeneity / 328
 Stereotype Accuracy / 330
 Differential Endorsement of the Stereotype / 334
 Pseudo-Couple Analysis / 335
 Idiographic versus Nomothetic Analysis / 337
 Illustration / 338
 Summary and Conclusions / 340

13 • Over-Time Analyses: Interval Outcomes

342

Cross-Lagged Regressions / 344
 Analysis Model / 347
 Computer Programs / 348
 Example / 351
 Over-Time Standard APIM / 356
 Specification of Error Structure / 357
 Measurement of the Causal Variable / 358
 Example / 358
 Growth-Curve Analysis / 359
 Definition of Time Zero / 360
 Functional Form / 360
 Structural Equation Modeling / 363
 Multilevel Modeling / 367
 General Error Models / 368
 Example / 369
 Cross-Spectral Analysis / 370
 Nonlinear Dynamic Modeling / 376
 Summary and Conclusions / 378

14 • Over-Time Analyses: Dichotomous Outcomes 381

- Sequential Analysis / 383
 - The Model* / 384
 - Illustration* / 386
- Statistical Analysis of Sequential Data:
 - Log-Linear Analysis / 388
 - Logit Model* / 389
 - Significance Testing and Aggregation across Dyads* / 392
 - The Assumption of Stationarity in Time-Series Analysis* / 394
 - Beyond the Basic Analysis* / 395
- Statistical Analysis of Sequential Data:
 - Multilevel Modeling / 396
- Event-History Analysis / 399
 - Censored Scores* / 401
 - Individual-Level Events* / 403
 - Discrete Analysis* / 403
- Summary and Conclusions / 404

15 • Concluding Comments 406

- Specialized Dyadic Models / 406
 - Mutual Influence* / 406
 - Common-Fate Models* / 409
- Going Beyond the Dyad / 413
 - Triads* / 413
 - Groups* / 414
 - Network Autocorrelation* / 414
- Conceptual and Practical Issues / 416
 - The Meaning of Nonindependence* / 416
 - Design and Measurement Issues in Dyadic Research* / 420
 - Recruitment and Retention* / 421
- The Seven Deadly Sins of Dyadic Data Analysis / 421
- The Last Word / 424
