Chapter I

Neuroscience: Past, Present, and Future 3

INTRODUCTION 4

THE ORIGINS OF NEUROSCIENCE 4

VIEWS OF THE BRAIN IN ANCIENT GREECE 5

VIEWS OF THE BRAIN DURING THE ROMAN
EMPIRE 5

VIEWS OF THE BRAIN FROM THE RENAISSANCE TO
THE NINETEENTH CENTURY 6

NINETEENTH-CENTURY VIEWS OF THE BRAIN 8

Nerves As Wires 9

*Localization of Specific Functions to Different Parts of the
Brain* 10

The Evolution of Nervous Systems 11

The Neuron: The Basic Functional Unit of the Brain 12

NEUROSCIENCE TODAY 13

LEVELS OF ANALYSIS 13

Molecular Neuroscience 13

Cellular Neuroscience 13

Systems Neuroscience 13

Behavioral Neuroscience 13

Cognitive Neuroscience 14

NEUROSCIENTISTS 14

THE SCIENTIFIC PROCESS 15

Observation 15

Replication 15

Interpretation 15

Verification 16

Expanded Contents

THE USE OF ANIMALS IN NEUROSCIENCE RESEARCH 16

The Animals 16

Animal Welfare 17

Animal Rights 17

THE COST OF IGNORANCE: NERVOUS SYSTEM DISORDERS 19

CONCLUDING REMARKS 20

Chapter 2

Neurons and Glia 23

INTRODUCTION 24

THE NEURON DOCTRINE 24

THE GOLGI STAIN 26

CAJAL'S CONTRIBUTION 27

- Box 2.1 *Of Special Interest: Advances in Microscopy* 28

THE PROTOTYPICAL NEURON 28

THE SOMA 28

The Nucleus 30

- Box 2.2 *Brain Food: Expressing One's Mind in the Post-Genomic Era* 32

Rough Endoplasmic Reticulum 31

Smooth Endoplasmic Reticulum and the Golgi Apparatus 34

The Mitochondrion 34

THE NEURONAL MEMBRANE 35

THE CYTOSKELETON 35

Microtubules 35

- Box 2.3 *Of Special Interest: Alzheimer's Disease and the Neuronal Cytoskeleton* 36

Microfilaments 38

Neurofilaments 38

THE AXON 38

The Axon Terminal 39

The Synapse 40

Axoplasmic Transport 40

- Box 2.4 *Of Special Interest: Hitching a Ride With Retrograde Transport* 42

DENDRITES 41

- *Box 2.5 Of Special Interest: Mental Retardation and Dendritic Spines* 43
- *Box 2.6 Path of Discovery: Spines and the Structural Basis of Memory, by William Greenough* 44

CLASSIFYING NEURONS 45

CLASSIFICATION BASED ON THE NUMBER OF NEURITES 45

CLASSIFICATION BASED ON DENDRITES 45

CLASSIFICATION BASED ON CONNECTIONS 46

CLASSIFICATION BASED ON AXON LENGTH 46

CLASSIFICATION BASED ON NEUROTRANSMITTER 46

GLIA 46

ASTROCYTES 46

MYELINATING GLIA 47

OTHER NON-NEURONAL CELLS 48

CONCLUDING REMARKS 48

Chapter 3

The Neuronal Membrane at Rest 51

INTRODUCTION 52

THE CAST OF CHEMICALS 53

CYTOSOL AND EXTRACELLULAR FLUID 53

Water 53

Ions 54

THE PHOSPHOLIPID MEMBRANE 54

The Phospholipid Bilayer 55

PROTEIN 55

Protein Structure 56

Channel Proteins 58

Ion Pumps 59

THE MOVEMENT OF IONS 59

DIFFUSION 59

- *Box 3.1 Brain Food: A Review of Moles and Molarity* 60

ELECTRICITY 59

THE IONIC BASIS OF THE RESTING MEMBRANE POTENTIAL 61

EQUILIBRIUM POTENTIALS 62

The Nernst Equation 64

- *Box 3.2 Brain Food: The Nernst Equation* 65

THE DISTRIBUTION OF IONS ACROSS THE MEMBRANE 65

RELATIVE ION PERMEABILITIES OF THE MEMBRANE AT REST 67

- Box 3.3 *Brain Food: The Goldman Equation* 68

The Wide World of Potassium Channels 67

- Box 3.4 *Path of Discovery: The Atomic Structure of a Potassium Channel, by Roderick MacKinnon* 70

The Importance of Regulating the External Potassium Concentration 71

- Box 3.5 *Of Special Interest: Death by Lethal Injection* 72

CONCLUDING REMARKS 71

Chapter 4

The Action Potential 75

INTRODUCTION 76

PROPERTIES OF THE ACTION POTENTIAL 76

THE UPS AND DOWNS OF AN ACTION POTENTIAL 76

- Box 4.1 *Brain Food: Methods of Recording Action Potentials* 78

THE GENERATION OF AN ACTION POTENTIAL 76

THE GENERATION OF MULTIPLE ACTION POTENTIALS 77

THE ACTION POTENTIAL, IN THEORY 80

MEMBRANE CURRENTS AND CONDUCTANCES 80

THE INS AND OUTS OF AN ACTION POTENTIAL 82

THE ACTION POTENTIAL, IN REALITY 82

THE VOLTAGE-GATED SODIUM CHANNEL 84

Sodium Channel Structure 84

Functional Properties of the Sodium Channel 86

- Box 4.2 *Brain Food: The Patch-Clamp Method* 88

The Effects of Toxins on the Sodium Channel 89

- Box 4.3 *Path of Discovery: Tetrodotoxin and the Dawn of Ion Channel Pharmacology, by Toshio Narahashi* 90

VOLTAGE-GATED POTASSIUM CHANNELS 91

PUTTING THE PIECES TOGETHER 91

ACTION POTENTIAL CONDUCTION 93

FACTORS INFLUENCING CONDUCTION VELOCITY 94

- Box 4.4 *Of Special Interest: Local Anesthesia* 95

MYELIN AND SALTATORY CONDUCTION 96

- Box 4.5 *Of Special Interest: Multiple Sclerosis, a Demyelinating Disease* 96

ACTION POTENTIALS, AXONS, AND DENDRITES 97

- *Box 4.6 Of Special Interest: The Eclectic Electric Behavior of Neurons* 99

CONCLUDING REMARKS 98

Chapter 5

Synaptic Transmission 101

INTRODUCTION 102

- *Box 5.1 Of Special Interest: Otto Loewi and Vagusstoff* 103

TYPES OF SYNAPSES 103

ELECTRICAL SYNAPSES 103

- *Box 5.2 Path of Discovery: Electrical Synapses*, by Michael V. L. Bennett 108

CHEMICAL SYNAPSES 105

CNS Synapses 106

The Neuromuscular Junction 109

PRINCIPLES OF CHEMICAL SYNAPTIC TRANSMISSION 111

NEUROTRANSMITTERS 111

NEUROTRANSMITTER SYNTHESIS AND STORAGE 112

NEUROTRANSMITTER RELEASE 113

- *Box 5.3 Brain Food: SNARE a Vesicle, and Release Its Transmitter* 116

NEUROTRANSMITTER RECEPTORS AND EFFECTORS 115

Transmitter-Gated Ion Channels 115

- *Box 5.4 Brain Food: Reversal Potentials* 120

G-Protein-Coupled Receptors 118

Autoreceptors 119

NEUROTRANSMITTER RECOVERY AND DEGRADATION 119

NEUROPHARMACOLOGY 121

- *Box 5.5 Of Special Interest: Bacteria, Spiders, Snakes, and You* 121

PRINCIPLES OF SYNAPTIC INTEGRATION 122

THE INTEGRATION OF EPSPs 122

Quantal Analysis of EPSPs 122

EPSP Summation 123

THE CONTRIBUTION OF DENDRITIC PROPERTIES TO SYNAPTIC INTEGRATION 124

Dendritic Cable Properties 124

Excitable Dendrites 126

INHIBITION 126

- *Box 5.6 Of Special Interest: Startling Mutations and Poisons* 127

IPSPs and Shunting Inhibition 126
