<i>Preface</i>	vii
<i>In Memoriam: Anthony Dipple (1940–1999)</i>	xi
<i>List of Contributors</i>	xv
1 Polycyclic Aromatic Hydrocarbon-Induced Carcinogenesis — An Introduction	1
<i>Andreas Luch</i>	
2 Metabolic Activation and Detoxification of Polycyclic Aromatic Hydrocarbons	19
<i>Andreas Luch and William M. Baird</i>	
2.1 Introduction	19
2.2 Structure-Activity Relationships	21
2.3 Enzymatic Activation	22
2.3.1 Monooxygenation and Dihydrodiol Epoxide Pathway	22
2.3.2 Stereochemistry of Activation	33
2.3.3 One-Electron Oxidation	39
2.3.4 Formation of Quinones	42
2.3.5 ‘Bioalkylation’ and Benzylic Ester Pathway	49

2.4	Detoxification	53
2.5	Summary and Perspectives	57
3	Biomonitoring of Polycyclic Aromatic Hydrocarbons — Human Exposure	97
	<i>Albrecht Seidel</i>	
3.1	Introduction	97
3.2	Studies at Work Places/Occupational Exposure to PAHs	99
3.3	Non-Occupational Exposure to PAHs	102
3.4	Metabolism and Excretion of PAHs	103
3.5	Biomonitoring of PAHs and Their Metabolites	105
3.5.1	Principal Considerations	105
3.5.2	1-Hydroxypyrene and Its Glucuronide	105
3.5.3	Enzyme Polymorphisms and Excretion Levels of 1-Hydroxypyrene	109
3.5.4	Phenanthrene Metabolites	112
3.5.5	Benzo[<i>a</i>]pyrene Metabolites	114
3.6	Summary	118
3.7	Conclusions	119
4	Macromolecular Adducts as Biomarkers of Human Exposure to Polycyclic Aromatic Hydrocarbons	137
	<i>David H. Phillips</i>	
4.1	Introduction	137
4.2	Methods of Detection	138
4.3	Occupational Exposure to PAHs	140
4.3.1	Iron and Steel Production	140
4.3.2	Aluminum Production	141

4.3.3	Coke Ovens and Graphite Electrode Manufacture	142
4.3.4	Other Occupational Exposures	150
4.4	Environmental Exposure to PAHs	152
4.5	Coal Tar Therapy	154
4.6	Diet	155
4.7	Discussion and Summary	157
5	DNA Damage and Mutagenesis Induced by Polycyclic Aromatic Hydrocarbons	171
	<i>Ahmad Besaratinia and Gerd P. Pfeifer</i>	
5.1	Introduction	171
5.2	Evolution of Research on PAHs	172
5.3	Chemistry and Biological Effects	173
5.4	Significance of Stable <i>versus</i> Unstable PAH-DNA Adducts	178
5.5	Mutagenicity of PAH-DNA Adducts	179
5.5.1	Site-Specific Mutagenicity of PAH-DNA Adducts	180
5.5.2	Translesional Synthesis	184
5.6	Cancer Epidemiology and PAH-DNA Adducts	187
5.6.1	Mapping of PAH-DNA Adducts	188
5.6.2	Additional Evidence for the Etiological Relevance of PAHs in Human Carcinogenesis: The Exemplary Case of <i>p53</i> Mutations in Lung Cancer	191
5.7	Concluding Remarks	193
6	Mechanisms of Repair of Polycyclic Aromatic Hydrocarbon-Induced DNA Damage	211
	<i>Hanspeter Naegeli and Nicholas E. Geacintov</i>	
6.1	Introduction	211

6.2	Nucleotide Excision Repair	213
6.2.1	Mammalian DNA Nucleotide Excision Repair ...	213
6.2.2	Subunits of the Human NER Machinery	215
6.2.3	Transcription-Coupled DNA Repair	217
6.2.4	Global NER Deficiency and Cancer	219
6.3	Repair of PAH-DNA Adducts	221
6.3.1	The <i>In Vitro</i> Oligonucleotide Excision Reaction ..	221
6.3.2	Base Pair Conformation-Dependent Excision of B[a]PDE-dG Adducts	224
6.3.3	Unrepaired Fjord-Region PAH-DNA Adducts in <i>Ras</i> Codon 61 Mutational Hotspots	228
6.3.4	Bipartite Recognition of PAH-DNA Adducts	235
6.3.5	Modulation of Human NER Activity by 5-Methylcytosines	237
6.3.6	Antagonistic Interaction of NER Factors between Substrate and Decoy DNA Adducts	238
6.3.7	Mechanism of PAH Adduct Recognition by the Human NER Machinery	243
6.4	Conclusion	246
7	Aberrant Gene Expression and Cell Signalling/Epigenetic Effects Induced by Polycyclic Aromatic Hydrocarbons	259
	<i>Pablo Steinberg</i>	
7.1	Introduction	259
7.2	Cancer-Related Genetic and Epigenetic Alterations Induced by PAHs	260
7.2.1	<i>Ras</i> Activation	260
7.2.2	Effects on <i>p53</i>	263
7.2.3	Effects on Mitogen-Activated Protein Kinases ...	265
7.2.4	Disruption of BRCA1 Expression	265
7.2.5	Inhibition of Intercellular Communication	266

7.3	Atherosclerosis-Related Alterations Induced by PAHs ...	268
7.4	Apoptosis-Related Alterations Induced by PAHs	270
7.5	Summary	271
8	Indicator Assays for Polycyclic Aromatic Hydrocarbon-Induced Genotoxicity	283
	<i>Hansruedi Glatt</i>	
8.1	Introduction	283
8.2	Bacterial Systems	284
8.2.1	<i>In Vitro</i> Mutagenicity Tests Using Bacterial Target Cells	284
8.2.2	Other Endpoints of Genotoxicity in Bacterial Target Cells	289
8.2.3	Host-Mediated Assays Using Microbial Target Cells	290
8.3	Mammalian Systems	291
8.3.1	Mutations in Mammalian Cells in Culture	291
8.3.2	Other Endpoints of Genotoxicity Using Mammalian Cells in Culture	294
8.3.3	Genotoxicity in Mammalian Cells <i>In Vivo</i>	295
8.4	Characterization of DNA Sequence Changes Induced by PAHs	298
8.5	Summary	299
9	Tumorigenicity of Polycyclic Aromatic Hydrocarbons	315
	<i>Shantu Amin and Karam El-Bayoumy</i>	
9.1	Introduction	315
9.2	Environmental Genotoxic Agents	316

9.3	PAHs as Representative Examples of Environmental Mammary Carcinogens	319
9.3.1	Levels and Carcinogenic Potency of PAHs	319
9.3.2	Metabolic Activation of PAHs and Potential Biomarkers	328
9.4	NO ₂ -PAHs as Representative Examples of Environmental Mammary Carcinogens	330
9.4.1	Levels and Carcinogenic Potency of NO ₂ -PAHs .	330
9.4.2	Metabolic Activation of NO ₂ -PAHs and Potential Biomarkers	334
9.5	Summary and Future Recommendations	338
10	Genetic Susceptibility to Polycyclic Aromatic Hydrocarbon-Induced Carcinogenesis	353
	<i>Ari Hirvonen</i>	
10.1	Introduction	353
10.2	Cytochrome P450-Dependent Monooxygenases	355
10.2.1	CYP1A1	355
10.2.2	CYP1B1	357
10.2.3	CYP2C9	357
10.3	Epoxide Hydrolase	358
10.4	Glutathione S-Transferases	359
10.5	NAD(P)H:Quinone Oxidoreductase	361
10.6	Myeloperoxidase	362
10.7	Combined Genotype Effects	362
10.8	Concluding Remarks	363

11 Polycyclic Aromatic Hydrocarbon-Induced Carcinogenesis — An Integrated View	379
<i>Andreas Luch</i>	
11.1 Exposure and Risk	380
11.2 Incorporation and Biotransformation	383
11.3 Monitoring Human Exposure	386
11.4 Molecular Epidemiology: Individual's Susceptibility? ..	388
11.5 Molecular Mechanisms of DNA Damage	397
11.6 Reprise	414
List of Abbreviations	453
Index	457
