## TABLE OF CONTENTS

1 Introductions: themes, and the meanings of words	4
1.1 Setting the scene	4
1.2 The absence of writings on the history of statistics education	4
1.3 Three themes	5
1.3.1 The institutional development of numeracy	5
1.3.2 The faltering search for an academic identity	7
1.3.3 The agonising emergence of a hesitant professionalism	7
1.4 Changing meanings of words	7
1.4.1 Meanings of "education"	7
1.4.2 Meanings of "statistics"	8
2 Early educational developments	10
2.1 Loss of ascendancy by Oxbridge	10
2.2 Mechanics' Institutes	11
2.2.1 Developments in Lancashire and Yorkshire	12
2.2.2 Involvement of statisticians	12
2.2.3 The Reverend Benjamin Godwin	13
2.2.4 William Newmarch	14
3 Professionalization in the Institute of Actuaries	15
3.1 Education and professionalization in the Institute	15
3.1.1 An early episode concerning professionalisation	16
3.2 The position of teaching in the Institute	17
3.2.1 The constitution of the Institute	17
3.3 Educational work of the Institute	18
3.3.1 1849: Appointment of Examiners	18
3.3.2 1850: First examinations (June)	18
3.3.3 1851: Examination Solutions published in <i>Journal</i>	18
3.3.4 1857: teaching classes start	18
3.3.5 1868: Examiners meet with candidates for post-mortem	
discussion of paper	19
3.3.6 1871: Class started for Second Year students	19
3.3.7 1872/1876: Authors appointed to prepare text books	19
3.3.8 1884: Royal Charter granted	19
3.3.9 1887: King eventually publishes Sutton's book	20
3.3.10 1896: Correspondence course suggested, and eventually	(1937)
established	20
3.3.11 1937: Actuarial Tuition Service established	20
	20
3.3.12 Some problems, and a new textbook	21
3.4 The Scottish Dimension 3.5 Individual versus institutional affiliation	23
4 Early attitudes in the statistical societies	24
4.1 Aristocratic tendencies in the LSS	24
4.2 The British Association and the founding of the LSS	26
4.3 Attitudes to education as social control	26
4.4 Early references to the diffusion of statistical knowledge	28
4.5 Statistical training and the census	29

8.1 The need for statistics in modern economics 8.2 Marshall's friendship with Jowett 8.3 Marshall, Jowett, and the dangers of formalism 8.3.1 The importance of 'instinct' 62 8.4 Marshall's impact on teaching at Cambridge 63 8.5 Marshall, the BEA, and the RSS 64 9 Early textbooks 65 9.1 Continental texts 9.2 The proposal that Edgeworth write a textbook 9.3 Mulhall's Dictionary 65	5 Statistics at Oxford	30
5.2.1 Florence Nightingale 5.2.2 Benjamin Jowett 5.3.7 Glorence Nightingale, cookery, sexist historiography, and some amazing similarities. 5.4 Jowett's relationship with Nightingale. 5.5.5 First moves towards a chair at Oxford (1872-) 5.5.1 The contributions of Quetelet and Farr 5.5.2 Correspondence with Quetelet 5.5.3 Education as a "memorial to Quetelet" 5.5.3 Education as a "memorial to Quetelet" 5.6.3 Education as a "memorial to Quetelet" 5.6.3 Education as a "memorial to Quetelet" 5.6.3 Begging for funds 43 6 London 6.1 King's College 6.1.1 'Jet' Rogers 6.1.2 The Reverend Richard Jones 6.2 William Farr and London University examinations 6.3 Karl Pearson and Gresham College 6.3.1 Geometry and statistics: Pearson's application to Gresham 6.3 Karl Pearson and Gresham College 6.4.1 Raphael Weldon, and the two sides of lecture work 6.4.2 Yule, and EDA-type techniques 6.4.3 Pearson and professionalization 6.5 Arthur Bowley (1869-1957) and the London School of Economics 6.5.1 The LSE and St. John's, Leatherhead 6.5.2 Bowley's survey of statistics teaching 6.5.3 Bowley's survey of statistics teaching 6.5.4 Bowley's teaching 6.6 Other developments at LSE 7 The technical colleges  8 Alfred Marshall and the teaching of statistics  8.1 The need for statistics in modern economics 8.2 Marshall, Jowett, and the dangers of formalism 8.3 The importance of 'instinct' 8.4 Marshall's impact on teaching at Cambridge 8.5 Marshall, the BEA, and the RSS  9 Early textbooks  9.1 Continental texts 9.2 The proposal that Edgeworth write a textbook 9.3 Mulhall's Dictionary 653	5.1 Oxford as 'stony ground' for statistics	30
5.2.1 Florence Nightingale 5.2.2 Benjamin Jowett 31 5.3 Florence Nightingale, cookery, sexist historiography, and some amazing similarities. 5.4 Jowett's relationship with Nightingale. 5.5 First moves towards a chair at Oxford (1872-) 5.5.1 The contributions of Quetelet and Farr 5.5.2 Correspondence with Quetelet 5.5.3 Education as a "memorial to Quetelet" 38 5.6 Second moves (1880-) 5.6.1 William Farr, and Jowett's initiative 5.6.2 Galton's involvement 5.6.3 Begging for funds 41 6 London 43 6 London 43 6 London 43 6 London 44 6 London 45 6 London 47 6 London 48 6 London 49 6 London 40 6.1 King's College 6.1.1 'Jet' Rogers 6.1.2 The Reverend Richard Jones 6.2 William Farr and London University examinations 6.3 Karl Pearson and Gresham College 6.3.1 Geometry and statistics: Pearson's application to Gresham 6.3 Karl Pearson and Gresham College 6.3.1 Geometry and statistics: Pearson's application to Gresham 6.4 KP and UC 6.4.1 Raphael Weldon, and the two sides of lecture work 6.4.2 Yule, and EDA-type techniques 6.4.3 Pearson and professionalization 6.5 Arthur Bowley (1869-1957) and the London School of Economics 6.5.1 The LSE and St. John's, Leatherhead 6.5.2 Bowley's survey of statistics teaching 6.5.3 Bowley, Edgeworth, and the Webbs 6.5.3 Bowley, Edgeworth, and the Webbs 6.5.3 Bowley, Edgeworth, and the Webbs 6.5.4 Bowley's teaching 6.5 Other developments at LSE 7 The technical colleges 8 Alfred Marshall and the teaching of statistics 8.1 The need for statistics in modern economics 8.2 Marshall, Jowett, and the dangers of formalism 8.3 Marshall, Jowett, and the RSS 9 Early textbooks 9.1 Continental texts 9.2 The proposal that Edgeworth write a textbook 9.3 Mulhall's Dictionary 65	5.2 Four key figures: Farr, Galton, Nightingale, and Jowett	30
5.3 Florence Nightingale, cookery, sexist historiography, and some amazing similarities.  5.4 Jowett's relationship with Nightingale.  5.5 First moves towards a chair at Oxford (1872-)  5.5.1 The contributions of Quetelet and Farr  5.5.2 Correspondence with Quetelet  5.5.3 Education as a "memorial to Quetelet"  38.5.6 Second moves (1890-)  5.6.1 William Farr, and Jowett's initiative  5.6.2 Galton's involvement  5.6.3 Begging for funds  6.1 King's College  6.1.1 'Jet' Rogers  6.1.2 The Reverend Richard Jones  6.2 William Farr and London University examinations  6.3 Kerl Pearson and Gresham College  6.3.1 Geometry and statistics: Pearson's application to Gresham  6.3.2 KP's lectures at Gresham  6.4 KP and UC  6.4.1 Raphael Weldon, and the two sides of lecture work  6.4.2 Yule, and EDA-type techniques  6.4.3 Pearson and professionalization  6.5 Arthur Bowley (1869-1957) and the London School of Economics  6.5.1 The LSE and St. John's, Leatherhead  6.5.2 Bowley's survey of statistics teaching  6.5.3 Bowley's teaching  6.6 Other developments at LSE  7 The technical colleges  8 Alfred Marshall and the teaching of statistics  8.1 The need for statistics in modern economics  8.2 Marshall's friendship with Jowett  8.3 Marshall, Jowett, and the dangers of formalism  8.1. The need for statistics in modern economics  8.2 Marshall's impact on teaching at Cambridge  8.5 Marshall, the BEA, and the RSS  9 Early textbooks  9.1 Continental texts  9.2 The proposal that Edgeworth write a textbook  9.3 Mulhall's Dictionary  6.5  9.3 Mulhall's Dictionary  6.5  6.5  6.5  6.5  6.5  6.5  6.5  6.	5.2.1 Florence Nightingale	30
similarities.  5.4 Jowett's relationship with Nightingale.  5.5 First moves towards a chair at Oxford (1872-)  5.5.1 The contributions of Quetelet and Farr  5.5.2 Correspondence with Quetelet  5.5.3 Education as a "memorial to Quetelet"  5.6.1 William Farr, and Jowett's initiative  5.6.2 Galton's involvement  5.6.3 Begging for funds  6.1 King's College  6.1.1 'Jet' Rogers  6.1.2 The Reverend Richard Jones  6.2 William Farr and London University examinations  6.3 Karl Pearson and Gresham College  6.3.1 Geometry and statistics: Pearson's application to Gresham  6.3.2 KP's lectures at Gresham  6.4 KP and UC  6.4.1 Raphael Weldon, and the two sides of lecture work  6.4.2 Yule, and EDA-type techniques  6.4.3 Pearson and professionalization  6.5 Arthur Bowley (1869-1957) and the London School of Economics  6.5.1 The LSE and St. John's, Leatherhead  6.5.2 Bowley's survey of statistics teaching  6.5.3 Bowley, Edgeworth, and the Webbs  6.5.4 Bowley's survey of statistics teaching  6.6 Other developments at LSE  7 The technical colleges  8 Alfred Marshall and the teaching of statistics  8.1 The need for statistics in modern economics  8.2 Marshall, bowett, and the dangers of formalism  8.3.1 The importance of 'instinct'  8.4 Marshall, striendship with Jowett  8.5 Marshall, the BEA, and the RSS  9 Early textbooks  9.1 Continental texts  9.2 The proposal that Edgeworth write a textbook  9.3 Mulhall's Dictionary  65	5.2.2 Benjamin Jowett	31
similarities.  5.4 Jowett's relationship with Nightingale.  5.5 First moves towards a chair at Oxford (1872-)  5.5.1 The contributions of Quetelet and Farr  5.5.2 Correspondence with Quetelet  5.5.3 Education as a "memorial to Quetelet"  5.6.1 William Farr, and Jowett's initiative  5.6.2 Galton's involvement  5.6.3 Begging for funds  6.1 King's College  6.1.1 'Jet' Rogers  6.1.2 The Reverend Richard Jones  6.2 William Farr and London University examinations  6.3 Karl Pearson and Gresham College  6.3.1 Geometry and statistics: Pearson's application to Gresham  6.3.2 KP's lectures at Gresham  6.4 KP and UC  6.4.1 Raphael Weldon, and the two sides of lecture work  6.4.2 Yule, and EDA-type techniques  6.4.3 Pearson and professionalization  6.5 Arthur Bowley (1869-1957) and the London School of Economics  6.5.1 The LSE and St. John's, Leatherhead  6.5.2 Bowley's survey of statistics teaching  6.5.3 Bowley, Edgeworth, and the Webbs  6.5.4 Bowley's survey of statistics teaching  6.6 Other developments at LSE  7 The technical colleges  8 Alfred Marshall and the teaching of statistics  8.1 The need for statistics in modern economics  8.2 Marshall, bowett, and the dangers of formalism  8.3.1 The importance of 'instinct'  8.4 Marshall, striendship with Jowett  8.5 Marshall, the BEA, and the RSS  9 Early textbooks  9.1 Continental texts  9.2 The proposal that Edgeworth write a textbook  9.3 Mulhall's Dictionary  65	5.3 Florence Nightingale, cookery, sexist historiography, and some amazin	g
