## Part I: Historical Background and Overview

**1. Historical Background: Development of Ideas and Knowledge about Stroke and Brain Embolism** . . . . . 1  
*Louis R. Caplan*  
Early Writers—Description of Apoplexy and Interest in Anatomy . . . . 1  
The 18th Century: Morgagni—The Beginning of Modern Pathology . . . . 3  
The First Half of the 19th Century—Recognition of Brain Infarction and a Relationship with Heart Disease . . . . 4  
The Second Half of the 19th Century—Cardiac Embolism Becomes an Established Clinical Entity . . . . 7  
The First Half of the 20th Century—An Emphasis on Vascular Anatomy . . . . 8  
Data Banks and Stroke Registries . . . . 13  
New Technology and Further Studies Clarify More Potential Donor Sources of Emboli . . . . 17  
Brain and Vascular Investigations Bring Embolism to the Forefront as the Major Cause of Brain Infarction . . . . 18  
References . . . . 19

**2. Overview: The Major Components of Brain Embolism** . . . . . 25  
*Louis R. Caplan*  
The Recipient Arteries . . . . 25  
The Embolic Material . . . . 27  
The Donor Source . . . . 28  
References . . . . 29

**Part II: Recipient Arteries and Brain Ischemia**

- 3. Recipient Artery: Anatomy and Pathology** ..... 31  
*Louis R. Caplan*  
 Examining Recipient Arteries to Separate Embolism  
 and Thrombosis .... 31  
 Hemorrhagic Infarction .... 33  
 Location, Types, and Size of Embolic Brain Infarcts .... 36  
 References .... 58
- 4. Recipient Artery: Clinical Symptoms and Signs of  
 Brain Ischemia** ..... 61  
*Louis R. Caplan*  
 General Clinical Features and Diagnosis .... 61  
 Anterior Carotid Artery Circulation Embolism .... 67  
 Posterior Circulation Vertebro-Basilar Arteries Embolism .... 70  
 References .... 77
- 5. The Eye as the Recipient Artery** ..... 81  
*Louis R. Caplan*  
 Anatomy of the Arteries that Supply the Eye .... 81  
 Clinical Symptoms and Signs of Eye Ischemia .... 83  
 Methods of Investigating the Eye as a Recipient  
 Site of Embolism .... 87  
 Differential Diagnosis of Retinal Embolism .... 88  
 Usual Sources of Retinal Embolism .... 89  
 Treatment .... 90  
 References .... 90
- 6. Imaging Evaluation: Recipient Artery Sites** ..... 93  
*Louis R. Caplan*  
 Brain Neuroimaging .... 93  
 Intracranial Vascular Imaging .... 97  
 Magnetic Resonance Perfusion Imaging and Complete  
 Magnetic Resonance Protocols .... 101  
 Computed Tomography Perfusion and Complete Computed  
 Tomography Protocols .... 104  
 Other Techniques for Studying Perfusion .... 106  
 References .... 109
- 7. Transcranial Doppler Ultrasound** ..... 113  
*Carlos A. Molina and Andrei V. Alexandrov*  
 Introduction .... 113  
 TCD Diagnosis of Arterial Occlusions .... 114  
 TCD Monitoring During Thrombolysis .... 117  
 Detection of Intracranial Artery Stenosis and  
 Artery-to-Artery Embolism .... 121  
 Emboli Monitoring .... 122  
 Detection of Right-to-Left Shunts .... 123  
 References .... 124

**Part III: Donor Sources—Nature, Frequency, Recognition**

**8. Cardiac Sources of Embolism: The Usual Suspects . . . . . 129**  
*Louis R. Caplan and Warren J. Manning*  
 Arrhythmias . . . . 130  
 Cardiac Valve Disease . . . . 131  
 Aortic Valve Disease . . . . 132  
 Infective Endocarditis . . . . 137  
 Noninfective Fibrous and Fibrinous Endocardial Lesions  
 (Including Valve Strands) . . . . 139  
 Myocardial and Cardiac Chamber Lesions . . . . 144  
 Cardiac Myxomas and Other Tumors . . . . 147  
 Paradoxical Embolism and Cardiac Septal Lesions . . . . 148  
 References . . . . 151

**9. Cardiac Source of Embolism: Pathophysiology and Identification . . . . . 161**  
*Warren J. Manning*  
 Major Sources of Emboli . . . . 161  
 Left Atrial Anatomy and Imaging . . . . 161  
 Left Atrial Thrombi . . . . 162  
 Mitral Stenosis . . . . 163  
 Atrial Fibrillation . . . . 165  
 Left Ventricular Thrombi . . . . 169  
 Myocardial Infarction . . . . 170  
 Dilated Cardiomyopathy . . . . 171  
 Prosthetic Valve Thrombi . . . . 171  
 Aortic Atherosclerosis . . . . 171  
 Infective Endocarditis . . . . 172  
 Valvular Calcification . . . . 173  
 Valve Excrescences . . . . 173  
 Mitral Annular Calcification . . . . 174  
 Intracardiac Tumors . . . . 174  
 Left Atrial Spontaneous Echo Contrast . . . . 175  
 Abnormalities of the Interatrial Septum . . . . 176  
 Imaging Procedures . . . . 179  
 Summary and Recommendations . . . . 179  
 References . . . . 180

**10. The Aorta as a Donor Source of Brain Embolism . . . . . 187**  
*Louis R. Caplan*  
 Early Pathology-Based Reports of  
 Embolism from the Aorta . . . . 187  
 Aortic Atherosclerosis . . . . 187  
 Heart Surgery and Aortic Atherosclerosis . . . . 191  
 Encephalopathy, Cognitive, and Neurobehavioral  
 Abnormalities After Heart Surgery . . . . 194  
 Imaging of the Proximal Aorta . . . . 196  
 References . . . . 198

<b>11. Arterial Sources of Embolism</b> .....	<b>203</b>
<i>Louis R. Caplan</i>	
Diseases, Pathology, and Pathophysiology . . . .	203
Atherosclerosis . . . .	203
Arterial Dissections . . . .	205
Fibromuscular Dysplasia . . . .	205
Arterial Aneurysms and Dolichoectatic Arteries . . . .	208
Distribution of Arterial Lesions . . . .	209
Relation of Symptoms to Severity of Atherosclerotic Arterial Stenosis . . . .	213
Imaging and Laboratory Evaluation of Potential Donor Sources of Embolism . . . .	216
References . . . .	219
<b>12. Ultrasound of Cervical Arteries</b> .....	<b>223</b>
<i>Michael Hennerici, Hansjoerg Baezner, and Michael Daffertshofer</i>	
Intima–Media Thickness: The Initial Stage of Arterial Disease . . . .	223
Plaque Development: The Intermediate Stage of Arterial Disease . . . .	226
Plaque Development: The Final Stage . . . .	234
References . . . .	236
<b>Part IV: Pathophysiology</b>	
<b>13. Vascular Hemostasis and Brain Embolism</b> .....	<b>243</b>
<i>Gregory J. del Zoppo</i>	
Thrombosis and the Pathophysiology of Brain Ischemia . . . .	244
Cerebrovascular Thrombosis . . . .	245
Hemorrhagic Transformation . . . .	247
Stroke and Consumptive Coagulopathy . . . .	248
Platelet Activation . . . .	249
Thrombin Generation . . . .	249
Fibrin Degradation . . . .	249
Endogenous Protective Mechanisms . . . .	250
Cerebrovascular Reservoir . . . .	250
Collateral Circuits . . . .	250
Microvessel-Associated Protection . . . .	250
Endogenous Thrombus Lysis . . . .	251
Vascular Matrix Degradation . . . .	251
Modulation of Thrombin Activity . . . .	252
Microvessel Integrity, Hemostasis, and Selective Neuron Vulnerability . . . .	253
Summary . . . .	253
References . . . .	254

**Part V: Embolic Materials**

**14. Embolic Particles** ..... 259  
*Louis R. Caplan*  
 Cardiac-Origin Substances .... 259  
 Arterial Origin Sources .... 264  
 Substances that Originate from Outside the  
     Cardiovascular Systems .... 264  
 Fat Embolism .... 264  
 Air Embolism .... 268  
 Tumor Embolism .... 269  
 Foreign Body Embolism .... 270  
 References .... 271

**Part VI: Treatment**

**15. Treatment of the Acute Embolic Event** ..... 277  
*Louis R. Caplan*  
 Reperfusion .... 277  
 Anticoagulation .... 282  
 Neuroprotective Agents .... 283  
 Managing Brain Edema and Mass Effect .... 284  
 References .... 284

**16. Cardiac Source of Embolism: Treatment** ..... 289  
*Warren J. Manning*  
 Atrial Fibrillation .... 289  
 New Onset Atrial Fibrillation .... 289  
 Recurrent or Persistent Atrial Fibrillation .... 297  
 Atrial Fibrillation Risk Profile .... 298  
 Combination Therapy .... 300  
 Abnormalities of the Interatrial Septum .... 309  
 References .... 311

**17. Treatment of Aortic and Arterial Sources** ..... 319  
*Louis R. Caplan*  
 Treatment of Aortic Atheromatosis .... 319  
 Treatment of Arterial Source Emboli .... 320  
 Substances that Alter Fibrinogen Concentrations .... 323  
 Anticoagulants .... 324  
 Surgical and Interventional Treatments .... 326  
 References .... 328

**Part VII: The Future**

**18. A Look Towards the Future** ..... 335  
*Louis R. Caplan and Warren J. Manning*  
 Diagnostic Advances .... 335

Therapeutic Advances . . . .	338
Thrombolysis . . . .	338
Mechanical Devices . . . .	338
Antiplatelet Agents . . . .	339
Anticoagulants . . . .	339
Neuroprotectants . . . .	340
Personnel and Systems of Care . . . .	340
